Flag description: red square with a bold, equilateral white cross in the center that does not extend to the edges of the flag; various medieval legends purport to describe the origin of the flag; a white cross used as identification for troops of the Swiss Confederation is first attested at the Battle of Laupen (1339)

National symbol(s): Swiss cross (white cross on red field, arms equal length); national colors: red, white

National anthem: the Swiss anthem has four names: “Schweizerpsalm” [German] “Cantique Suisse” [French] “Salmo svizzero,” [Italian] “Psalm svizzer” [Romansch] (Swiss Psalm)

lyrics/music: Leonhard WIDMER [German], Charles CHATELANAT [French], Camillo VALSANGIACOMO [Italian], and Flurin CAMATHIAS [Romansch]/Alberik ZWYSSIG

note: unofficially adopted 1961, officially 1981; the anthem has been popular in a number of Swiss cantons since its composition (in German) in 1841; translated into the other three official languages of the country (French, Italian, and Romansch), it is official in each of those languages

ECONOMY

Economy—overview: Switzerland, a country that espouses neutrality, is a prosperous and modern market economy with low unemployment, a highly skilled labor force, and a per capita GDP

among the highest in the world. Switzerland's economy benefits from a highly developed service sector, led by financial services, and a manufacturing industry that specializes in high-technology, knowledge-based production. Its economic and political stability, transparent legal system, exceptional infrastructure, efficient capital markets, and low corporate tax rates also make Switzerland one of the world's most competitive economies.

The Swiss have brought their economic practices largely into conformity with the EU's to enhance their international competitiveness, but some trade protectionism remains, particularly for its small agricultural sector. The fate of the Swiss economy is tightly linked to that of its neighbors in the euro zone, which purchases half of Swiss exports. The global financial crisis of 2008 and resulting economic downturn in 2009 stalled demand for Swiss exports and put Switzerland into a recession. During this period, the Swiss National Bank (SNB) implemented a zero-interest rate policy to boost the economy, as well as to prevent appreciation of the franc, and Switzerland's economy began to recover in 2010.

The sovereign debt crises unfolding in neighboring euro-zone countries, however, coupled with ongoing economic instability in Russia and other eastern European economies continue to pose a significant risk to the Swiss economy, driving up demand for the Swiss franc by investors seeking a safe-haven currency. In January 2015, the SNB abandoned the Swiss franc's peg to the euro, roiling global currency markets and making active SNB intervention a necessary hallmark of present-day Swiss monetary policy. The independent SNB has upheld its zero interest rate policy and conducted major market interventions to prevent further appreciation of the Swiss franc, but parliamentarians have urged it to do more to weaken the currency. The franc's strength has made Swiss exports less competitive and weakened the country's growth outlook; GDP growth fell below 2% per year from 2011-17.

In recent years, Switzerland has responded to increasing pressure from neighboring countries and trading partners to reform its banking secrecy laws, by agreeing to conform to OECD regulations on administrative assistance in tax matters, including tax evasion. The Swiss government has also renegotiated its double taxation agreements with numerous countries, including the US, to incorporate OECD standards, and is openly considering the possibility of imposing taxes on bank deposits held by foreigners.

SYRIA

INTRODUCTION

Background: Following World War I, France acquired a mandate over the northern portion of the former Ottoman Empire province of Syria. The French administered the area as Syria until granting it independence in 1946. The new country lacked political stability and experienced a series of military coups. Syria united with Egypt in February 1958 to form the United Arab Republic. In September 1961, the two entities separated, and the Syrian Arab Republic was reestablished. In the 1967 Arab-Israeli War, Syria lost the Golan Heights region to Israel. During the 1990s, Syria and Israel held occasional, albeit unsuccessful, peace talks over its return. In November 1970, Hafiz al-ASAD, a member of the socialist Ba'th Party and the minority Alawi sect, seized power in a bloodless coup and brought political stability to the country. Following the death of President Hafiz al-ASAD, his son, Bashar al-ASAD, was approved as president by popular referendum in July 2000. Syrian troops—stationed in Lebanon since 1976 in an ostensible peacekeeping role—were withdrawn in April 2005. During the July-August 2006

conflict between Israel and Hizballah, Syria placed its military forces on alert but did not intervene directly on behalf of its ally Hizballah. In May 2007, Bashar al-ASAD's second term as president was approved by popular referendum.

Influenced by major uprisings that began elsewhere in the region, and compounded by additional social and economic factors, antigovernment protests broke out first in the southern province of Dar'a in March 2011 with protesters calling for the repeal of the restrictive Emergency Law allowing arrests without charge, the legalization of political parties, and the removal of corrupt local officials. Demonstrations and violent unrest spread across Syria with the size and intensity of protests fluctuating. The government responded to unrest with a mix of concessions—including the repeal of the Emergency Law, new laws permitting new political parties, and liberalizing local and national elections—and with military force and detentions. The government's efforts to quell unrest and armed opposition activity led to extended clashes between government forces, their allies, and oppositionists.

International pressure on the ASAD regime intensified after late 2011, as the Arab League, the EU, Turkey, and the US expanded economic sanctions against the regime and those entities that support it. In December 2012, the Syrian National Coalition, was recognized by more than 130 countries as the sole legitimate representative of the Syrian people. In September 2015, Russia launched a military intervention on behalf of the ASAD regime, and government-aligned forces recaptured Aleppo city in December 2016, shifting the conflict in the regime's favor. Political negotiations between the government and opposition delegations at UN-sponsored Geneva conferences since 2014 have failed to produce a resolution of the conflict. Russia, Iran, and Turkey since early 2017 have held negotiations in Astana to establish de-escalation zones to reduce violence in Syria, and Russia has also begun pushing for political negotiations in Sochi. Unrest continues in Syria, and according to an April 2016 UN estimate, the death toll among Syrian Government forces, opposition forces, and civilians was over 400,000. As of December 2017, approximately 13.1 million people were in need of humanitarian assistance in Syria, with 6.3 million people displaced internally, and an additional 5.4 million registered Syrian refugees, making the Syrian situation among the largest humanitarian crises worldwide

note: adopted 1936, restored 1961; between 1958 and 1961, while Syria was a member of the United Arab Republic with Egypt, the country had a different anthem

ECONOMY

Economy—overview: Syria's economy continues to deteriorate amid the ongoing conflict that began in 2011, declining by more than 70% from 2010 to 2017. The government has struggled to address the effects of international sanctions, widespread infrastructure damage, diminished domestic consumption and production, reduced subsidies, and high inflation, which have caused dwindling foreign exchange reserves, rising budget and trade deficits, a decreasing value of the Syrian pound, and falling household purchasing power.

During 2014, the ongoing conflict and continued unrest and economic decline worsened the humanitarian crisis and elicited a greater need for international assistance, as the number of people in need inside Syria increased from 9.3 million to 12.2 million, and the number of Syrian refugees increased from 2.2 million to more than 3.3 million.

Prior to the turmoil, Damascus had begun liberalizing economic policies, including cutting lending interest rates, opening private banks, consolidating multiple exchange rates, raising prices on some subsidized items, and establishing the Damascus Stock Exchange, but the economy remains highly regulated. Long-run economic constraints include foreign trade barriers, declining oil production, high unemployment, rising budget deficits, increasing pressure on water supplies caused by heavy use in agriculture, rapid population growth, industrial expansion, water pollution, and widespread infrastructure damage.

subunit Jund al-Aqsa operates in Idlib and Hama governorates; installs Sharia in areas under its control; targets primarily Syrian regime and proregime forces, some minorities, occasionally other Syrian insurgent groups, and Western interests; openly collaborated with core al-Qa'ida veteran and senior figures until supreme leader Fateh al-JAWLANI announced publicly in mid-2016 that formal ties with al-Qa'ida had been cut and al-Nusrah would henceforth operate under the name Jabhat Fateh al-Sham (Front for the Conquest of the Levant); JAWLANI's disaffiliation claim remained unsubstantiated as of early 2017, according to the US Government; engages in effective online and in-person recruitment campaigns in Syria; majority of members are Syrian, with many al-Qa'ida veterans from other jihad theaters; assessed in mid-2016 to have at least 6,000 active fighters

Islamic State of Iraq and the Levant (ISIL): *aim(s):* replace the Syrian Government with an Sunni Islamic state and implement ISIL's strict interpretation of Sharia

area(s) of operation: maintains extensive networks and an operational presence throughout the country, despite losing large swathes of territory since early 2016; ISIL had lost most of its control in its defacto capital, the city of Ar Raqqa, by mid-2017; continues to operate bases in the Ar Raqqa area and along the Syria-Iraq border; thousands of combatants target Syrian and Russian Government interests, religious and ethnic minorities, and all groups or governments that oppose ISIL's hardline Sunni jihadist ideology, including perceived Sunni rivals; exploits natural resources, especially oil and wheat, and levies taxes and fees on companies and individuals in areas under its control; responsible for millions of Syrians fleeing their homes, including the estimated 5 million who had left Syria by early 2017; fighters have ransacked and demolished numerous ancient sites that pre-date Islam, denouncing them as idolatrous; in May 2015, ISIL overran the ancient city of Palmyra, a UNESCO World Heritage site famed for its well-preserved Graeco-Roman ruins, and went on to destroy its best known structures; has used mustard and chlorine gas against civilian and military targets in Syria, where allies continue to work together to dismantle its chemical weapons production plants; dozens of key leaders have been killed since early 2016, putting ISIL's highly decentralized structure and sprawling network of regional affiliates to the test; senior leader Gulmurod KHALIMOV, a

former Tajik military officer serving as ISIL's chief recruiter, remains based in Syria; ISIL's chief cleric, Turki al-BINALI, was killed on 31 May 2017 during an airstrike in Al Mayadin, Dayr az Zawr Governorate, near the border with Iraq; al-BINALI's recorded lectures and other propaganda were central in recruiting foreign fighters

Terrorist groups—foreign based: Abdallah Azzam Brigades (AAB): aim(s): disrupt and attack Shia Muslim and Western interests in Syria

area(s) of operation: remains operational; conducts attacks against primarily Shia Muslim organizations and individuals, including Hizballah members, and Westerners and their interests

al-Qa'ida (AQ): aim(s): support al-Nusrah Front's efforts to overthrow President Bashar al-ASAD's regime and, ultimately, establish a regional Islamic caliphate

area(s) of operation: operational primarily in Idlib Governorate, with established networks and operating paramilitary training camps; likely continues to collaborate closely with al-Nusrah Front leaders, despite public claims of severing ties; majority of members are not Syrian nationals

Ansar al-Islam (AAI): aim(s): remove Syrian President Bashar al-ASAD from power and install Sharia

area(s) of operation: operationally active in Syria since 2011; remained operational in Aleppo as of late 2016; launches attacks on Syrian Government and security forces and pro-Syrian Government militias; some AAI factions combat ISIL, while others are aligned with ISIL

Hizballah: aim(s): preserve Syrian President Bashar al-ASAD's regime

area(s) of operation: operational activity throughout the country since 2012; centered on providing paramilitary support to President Bashar al-ASAD's regime against armed insurgents; tens of thousands of fighters remained active in Syria as of 2017; thousands of fighters have died on the Syrian battlefield

Kata'ib Hizballah (KH): aim(s): preserve Syrian President Bashar al-ASAD's regime

area(s) of operation: deploys combatants to Syria to fight alongside Syrian Government and Lebanese Hizballah forces

Kurdistan Workers Party (PKK) (Kongra-Gel): *aim(s):* establish Kurdistan, which comprises territory in northern Syria
area(s) of operation: operational in the north combating ISIL, primarily in the Kurdish-populated region known as Rojava and Syrian Kurdistan; Salih MUSLIM Muhammad leads Kurdistan Workers Party's Syrian wing, the Syrian Kurdish Democratic Union Party (PYD); majority of fighters inside Syria are Syrian Kurds, along with Kurds from Iran, Turkey, and Iraq

Mujahidin Shura Council in the Environs of Jerusalem (MSC): *aim(s):* enhance its networks in Syria and, ultimately, destroy the state of Israel

area(s) of operation: maintains limited networks for operational planning against Israel, logistics, transferring funds, and smuggling fighters and arms through Syria from the Gaza Strip and Libya to be used against Israel; by 2017, the majority of veteran members had defected to join other groups

Palestine Liberation Front (PLF): *aim(s):* enhances its networks and, ultimately, destroy the state of Israel and establish a secular, Marxist Palestinian state with Jerusalem as its capital

area(s) of operation: maintains a recruitment and limited training presence in many refugee camps

PFLP-General Command (PFLP-GC): *aim(s):* preserve Syrian President Bashar al-ASAD's regime

area(s) of operation: maintains a political base in Damascus; fighting since early 2012 alongside President al-ASAD's forces and Hizballah in areas where anti-regime paramilitary groups are active; currently, preserving al-ASAD's government is the group's most pressing priority; receives funds and training from the regime

Popular Front for the Liberation of Palestine (PFLP): *aim(s):* enhance its recruitment networks in Syria

area(s) of operation: maintains a recruitment and limited training presence in several refugee camps

TRANSNATIONAL ISSUES

Disputes—international: Golan Heights is Israeli-occupied with the almost 1,000-strong UN Disengagement Observer Force patrolling a buffer zone since 1964; lacking a treaty or other documentation describing the boundary, portions of the Lebanon-Syria boundary

are unclear with several sections in dispute; since 2000, Lebanon has claimed Shab'a Farms in the Golan Heights; 2004 Agreement and pending demarcation would settle border dispute with Jordan

Refugees and internally displaced persons: refugees (country of origin): 438,000 (Palestinian Refugees) (2017); 16,879 (Iraq)

note: the ongoing civil war has resulted almost 5.6 million Syrian refugees—dispersed in Egypt, Iraq, Jordan, Lebanon, and Turkey—as of February 2018

IDPs: 6.3 million (ongoing civil war since 2011) (2017)

stateless persons: 160,000 (2016); *note*—Syria's stateless population consists of Kurds and Palestinians; stateless persons are prevented from voting, owning land, holding certain jobs, receiving food subsidies or public healthcare, enrolling in public schools, or being legally married to Syrian citizens; in 1962, some 120,000 Syrian Kurds were stripped of their Syrian citizenship, rendering them and their descendants stateless; in 2011, the Syrian Government granted citizenship to thousands of Syrian Kurds as a means of appeasement; however, resolving the question of statelessness is not a priority given Syria's ongoing civil war

Trafficking in persons: current situation: as conditions continue to deteriorate due to Syria's civil war, human trafficking has increased; Syrians remaining in the country and those that are refugees abroad are vulnerable to trafficking; Syria is a source and destination country for men, women and children subjected to forced labor and sex trafficking; Syrian children continue to be forcibly recruited by government forces, pro-regime militias, armed opposition groups, and terrorist organizations to serve as soldiers, human shields, and executioners; ISIL forces Syrian women and girls and Yazidi women and girls taken from Iraq to marry its fighters, where they experience domestic servitude and sexual violence; Syrian refugee women and girls are forced into exploitive marriages or prostitution in neighboring countries, while displaced children are forced into street begging domestically and abroad

tier rating: Tier 3—the government does not fully comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so; in 2014, Syria's violent conditions enabled human trafficking to flourish; the government made no effort to investigate, prosecute, or convict trafficking offenders or complicit government officials, including those who

forcibly recruited child soldiers; authorities did not identify victims and failed to ensure victims, including child soldiers, were protected from arrest, detention, and severe abuse as a result of being trafficked (2015)

Illicit drugs: a transit point for opiates, hashish, and cocaine bound for regional and Western markets; weak anti-money-laundering controls and bank privatization may leave it vulnerable to money laundering

TAIWAN

INTRODUCTION

Background: First inhabited by Austronesian people, Taiwan became home to Han immigrants beginning in the late Ming Dynasty (17th century). In 1895, military defeat forced China's Qing Dynasty to cede Taiwan to Japan, which then governed Taiwan for 50 years. Taiwan came under Chinese Nationalist (Kuomintang, KMT) control after World War II. With the communist victory in the Chinese civil war in 1949, the Nationalist-controlled Republic of China government and 2 million Nationalists fled to Taiwan and continued to claim to be the legitimate government for mainland China and Taiwan based on a 1947 Constitution drawn up for all of China. Until 1987, however, the Nationalist government ruled Taiwan under a civil war martial law declaration dating to

1948. Beginning in the 1970s, Nationalist authorities gradually began to incorporate the native population into the governing structure beyond the local level. The democratization process expanded rapidly in the 1980s, leading to the then illegal founding of Taiwan's first opposition party (the Democratic Progressive Party or DPP) in 1986 and the lifting of martial law the following year. Taiwan held legislative elections in 1992, the first in over forty years, and its first direct presidential election in 1996. In the 2000 presidential elections, Taiwan underwent its first peaceful transfer of power with the KMT loss to the DPP and afterwards experienced two additional democratic transfers of power in 2008 and 2016. Throughout this period, the island prospered, became one of East Asia's economic "Tigers," and after 2000 became a major investor in mainland China as cross-strait ties matured. The dominant political issues continue to be economic reform and growth as well as management of sensitive relations between Taiwan and China.

GOVERNMENT

Country name: *conventional long form:* none

conventional short form: Taiwan

local long form: none

local short form: Taiwan

former: Formosa

etymology: “Tayowan” was the name of the coastal sandbank where the Dutch erected their colonial headquarters on the island in the 17th century; the former name “Formosa” means “beautiful” in Portuguese

Government type: semi-presidential republic

Capital: *name*: Taipei

geographic coordinates: 25 02 N, 121 31 E

time difference: UTC + 8 (13 hours ahead of Washington, DC, during Standard Time)

Administrative divisions: includes main island of Taiwan plus smaller islands nearby and off coast of China’s Fujian Province; Taiwan is divided into 13 counties (*xian*, singular and plural), 3 cities (*shi*, singular and plural), and 6 special municipalities directly under the jurisdiction of the Executive Yuan

counties: Changhua, Chiayi, Hsinchu, Hualien, Kinmen, Lienchiang, Miaoli, Nantou, Penghu, Pingtung, Taitung, Yilan, Yunlin

cities: Chiayi, Hsinchu, Keelung

special municipalities: Kaohsiung (city), New Taipei (city), Taichung (city), Tainan (city), Taipei (city), Taoyuan (city)

note: Taiwan uses a variety of romanization systems; while a modified Wade-Giles system still dominates, the city of Taipei has adopted a Pinyin romanization for street and place names within its boundaries; other local authorities use different romanization systems

National holiday: Republic Day (National Day), 10 October (1911); *note*—celebrates the anniversary of the Chinese Revolution, also known as Double Ten (10-10) Day

Constitution: previous 1912, 1931; latest adopted 25 December 1946, promulgated 1 January 1947, effective 25 December 1947; amended/revised several times, last in 2005 (2016)

Legal system: civil law system

International law organization participation: has not submitted an ICJ jurisdiction declaration; non-party state to the ICCT

Citizenship: *citizenship by birth*: no

citizenship by descent only: at least one parent must be a citizen of Taiwan

dual citizenship recognized: yes, except that citizens of Taiwan are

not recognized as dual citizens of the People's Republic of China
residency requirement for naturalization: 5 years

Suffrage: 20 years of age; universal; note—in mid-2016, the Legislative Yuan drafted a constitutional amendment to reduce the voting age to 18, but it has not passed as of December 2017

Executive branch: *chief of state*: President TSAI Ing-wen (since 20 May 2016); Vice President CHEN Chien-jen (since 20 May 2016)

head of government: Premier LAI Ching-te (President of the Executive Yuan) (since 8 September 2017); Vice Premier LIN Hsi-yao, Vice President of the Executive Yuan (since 20 May 2016)

cabinet: Executive Yuan—ministers appointed by president on recommendation of premier

elections/appointments: president and vice president directly elected on the same ballot by simple majority popular vote for a 4-year term (eligible for a second term); election last held on 16 January 2016 (next to be held in 2020); premier appointed by the president; vice premiers appointed by the president on the recommendation of the premier

election results: TSAI Ing-wen elected president; percent of vote—TSAI Ing-wen (DPP) 56.1%, Eric CHU Li-lun (KMT) 31.0%, James SOONG Chu-yu (PFP) 12.8%; note—TSAI is the first woman elected president of Taiwan

Legislative branch: *description*: unicameral Legislative Yuan (113 seats; 73 members directly elected in single-seat constituencies by simple majority vote, 34 directly elected in a single island-wide constituency by proportional representation vote, and 6 directly elected in multi-seat aboriginal constituencies by proportional representation vote; members serve 4-year terms)

elections: last held on 16 January 2016 (next to be held in January 2020)

election results: percent of vote by party—NA; seats by party—DPP 68, KMT 35, NPP 5, PFP 3, NPSU 1, independent 1; note—this is the first non-KMT-led legislature in Taiwan's history

Judicial branch: *highest court(s)*: Supreme Court (consists of the court president, vice president, and approximately 100 judges organized into 8 civil and 12 criminal divisions, each with a division chief justice and 4 associate justices); Constitutional Court (consists of the court president, vice president, and 13 justices)

judge selection and term of office: Supreme Court justices appointed by the president; Constitutional Court justices appointed by the president with approval of the Legislative Yuan; Supreme Court justices appointed for life; Constitutional Court justices appointed for 8-year terms with half the membership renewed every 4 years

subordinate courts: high courts; district courts; hierarchy of administrative courts

Political parties and leaders: Democratic Progressive Party or DPP [TSAI Ing-wen]

Kuomintang or KMT (Nationalist Party) [WU Den-yih]

New Power Party or NPP [HUANG Kuo-chang]

Non-Partisan Solidarity Union or NPSU [LIN Pin-kuan]

People First Party or PFP [James SOONG Chu-yu]

Political pressure groups and leaders: environmental groups; independence movement; various business groups

note: public opinion polls consistently show most Taiwanese conclude the Republic of China—Taiwan's official name for itself—is a sovereign state and support maintaining Taiwan's status quo rather than seeking unification with or permanent separation from the China mainland; advocates of Taiwan independence oppose steps toward future unification with mainland China; most advocates of eventual unification predicate their goal on the democratic transformation of the mainland

International organization participation: ADB (Taipei, China), APEC (Chinese Taipei), BCIE, ICC (national committees), IOC, ITUC (NGOs), SICA (observer), WTO (Taipei, China)

Diplomatic representation in the US: none; commercial and cultural relations with iats citizens in the US are maintained through an unofficial instrumentality, the Taipei Economic and Cultural Representative Office in the United States (TECRO), a private nonprofit corporation that performs citizen and consular services similar to those at diplomatic posts

MOY (since June 2015)

office: telephone: [1] [886] (02) 2162-2000

FAX: [1] [886] (02) 2162-2251

other offices: Kaohsiung (Branch Office)

Flag description: red field with a dark blue rectangle in the upper hoist-side corner bearing a white sun with 12 triangular rays; the blue and white design of the canton (symbolizing the sun of progress) dates to 1895; it was later adopted as the flag of the Kuomintang Party; blue signifies liberty, justice, and democracy; red stands for fraternity, sacrifice, and nationalism, white represents equality, frankness, and the people's livelihood; the 12 rays of the sun are those of the months and the twelve traditional Chinese hours (each ray equals two hours)

note: similar to the flag of Samoa

National symbol(s): white, 12-rayed sun on blue field; national colors: blue, white, red

National anthem: *name:* "Zhonghua Minguo guoge" (National Anthem of the Republic of China)

lyrics/music: HU Han-min, TAI Chi-t'ao, and LIAO Chung-k'ai/CHENG Mao-Yun

note: adopted 1930; also the song of the Kuomintang Party; it is informally known as "San Min Chu I" or "San Min Zhu Yi" (Three Principles of the People); because of political pressure from China, "Guo Qi Ge" (National Banner Song) is used at international events rather than the official anthem of Taiwan; the "National Banner Song" has gained popularity in Taiwan and is commonly used during flag raisings

ECONOMY

Economy—overview: Taiwan has a dynamic capitalist economy that is driven largely by industrial manufacturing, and especially exports of electronics, machinery, and petrochemicals. This heavy dependence on exports exposes the economy to fluctuations in global demand. Taiwan's diplomatic isolation, low birth rate,

rapidly aging population, and increasing competition from China and other Asia Pacific markets are other major long-term challenges.

Following the landmark Economic Cooperation Framework Agreement (ECFA) signed with China in June 2010, Taiwan in July 2013 signed a free trade deal with New Zealand—Taipei's first-ever with a country with which it does not maintain diplomatic relations—and, in November of that year, inked a trade pact with Singapore. However, follow-on components of the ECFA, including a signed agreement on trade in services and negotiations on trade in goods and dispute resolution, have stalled. In early 2014, the government bowed to public demand and proposed a new law governing the oversight of cross-strait agreements, before any additional deals with China are implemented; the legislature has yet to vote on such legislation, leaving the future of ECFA uncertain. President TSAI since taking office in May 2016 has promoted greater economic integration with South and Southeast Asia through the New Southbound Policy initiative and has also expressed interest in Taiwan joining the Trans-Pacific Partnership as well as bilateral trade deals with partners such as the US. These overtures have likely played a role in increasing Taiwan's total exports, which rose 11% during the first half of 2017, buoyed by strong demand for semiconductors.

Taiwan's total fertility rate of just over one child per woman is among the lowest in the world, raising the prospect of future labor shortages, falling domestic demand, and declining tax revenues. Taiwan's population is aging quickly, with the number of people over 65 expected to account for nearly 20% of the island's total population by 2025.

The island runs a trade surplus with many economies, including China and the US, and its foreign reserves are the world's fifth largest, behind those of China, Japan, Saudi Arabia, and Switzerland. In 2006, China overtook the US to become Taiwan's second-largest source of imports after Japan. China is also the island's number one destination for foreign direct investment. Taiwan since 2009 has gradually loosened rules governing Chinese investment and has also secured greater market access for its investors on the mainland. In August 2012, the Taiwan Central Bank signed a memorandum of understanding (MOU) on cross-strait currency settlement with its Chinese counterpart. The MOU

allows for the direct settlement of Chinese renminbi (RMB) and the New Taiwan dollar across the Strait, which has helped Taiwan develop into a local RMB hub.

Closer economic links with the mainland bring opportunities for Taiwan's economy but also pose challenges as political differences remain unresolved and China's economic growth is slowing. President TSAI's administration has made little progress on the domestic economic issues that loomed large when she was elected, including concerns about stagnant wages, high housing prices, youth unemployment, job security, and financial security in retirement. TSAI has made more progress on boosting trade with South and Southeast Asia, however, which may help insulate Taiwan's economy from a fall in mainland demand should China's growth slow in 2018.

Illicit drugs: regional transit point for heroin, methamphetamine, and precursor chemicals; transshipment point for drugs to Japan; major problem with domestic consumption of methamphetamine and heroin; rising problems with use of ketamine and club drugs

TAJIKISTAN

INTRODUCTION

Background: The Tajik people came under Russian rule in the 1860s and 1870s, but Russia's hold on Central Asia weakened following the Revolution of 1917. Bands of indigenous guerrillas (called "basmachi") fiercely contested Bolshevik control of the area, which was not fully reestablished until 1925. Tajikistan was first created as an autonomous republic within Uzbekistan in 1924, but the USSR designated Tajikistan a separate republic in 1929 and transferred to it much of present-day Sughd province. Ethnic Uzbeks form a substantial minority in Tajikistan, and ethnic Tajiks an even larger minority in Uzbekistan. Tajikistan became independent in 1991 following the breakup of the Soviet Union, and experienced a civil war between regional factions from 1992 to 1997. Tajikistan has endured several domestic security incidents since 2010, including armed conflict between government forces and local strongmen in the Rasht Valley and between government forces and criminal groups in Gorno-Badakhshan Autonomous Oblast. In September 2015, government security forces rebuffed attacks led by a former high-ranking official in the Ministry of Defense. President Emomali RAHMOM, who came to power during the civil war, used the attacks to ban the main opposition political party in Tajikistan. In May 2016, RAHMOM further strengthened his position by having himself designated "Leader of the Nation" with limitless terms and lifelong immunity through constitutional

amendments ratified in a referendum. The referendum also lowered the minimum age required to run for president from 35 to 30, which would make RAHMON's son Rustam EMOMALI, eligible to run for president in 2020. The country remains the poorest in the former Soviet sphere. Tajikistan became a member of the WTO in March 2013. However, its economy continues to face major challenges, including dependence on remittances from Tajiks working in Russia, pervasive corruption, and the opiate trade emanating from neighboring Afghanistan.

National anthem: *name:* “Surudi milli” (National Anthem)

lyrics/music: Gulnazar KELDI/Sulaimon YUDAKOV

note: adopted 1991; after the fall of the Soviet Union, Tajikistan kept the music of the anthem from its time as a Soviet republic but adopted new lyrics

ECONOMY

Economy—overview: Tajikistan is a poor, mountainous country with an economy dominated by minerals extraction, metals processing, agriculture, and reliance on remittances from citizens working abroad. The 1992-97 civil war severely damaged an already weak economic infrastructure and caused a sharp decline in industrial and agricultural production. Today, Tajikistan has one of the lowest per capita GDPs among the 15 former Soviet republics. Less than 7% of the land area is arable and cotton is the most important crop. Tajikistan imports approximately 70% of its food. Mineral resources include silver, gold, uranium, antimony, and tungsten. Industry consists mainly of small obsolete factories in food processing and light industry, substantial hydropower facilities, and a large aluminum plant—currently operating well

below its capacity.

Because of a lack of employment opportunities in Tajikistan, more than one million Tajik citizens work abroad—roughly 90% in Russia—supporting families back home through remittances that in 2014 were equivalent to nearly 50% of GDP. Some experts estimate the value of narcotics transiting Tajikistan is equivalent to 30%-50% of GDP.

Since the end of the civil war, the country has pursued half-hearted reforms and privatizations in the economic sphere, but the poor business climate remains a hurdle to attracting foreign investment. Tajikistan has sought to develop its substantial hydroelectricity potential through partnership with Russian, Iranian and Chinese investors, and is pursuing completion of the Roghun Dam—which, if built according to plan, would be the tallest dam in the world. However, the project is a sensitive issue for downstream neighbors and faces large financing shortfalls. In 2016, Tajikistan contracted with the Italian firm Salini Impregilo to build the dam over a 13-year period for \$3.9 billion, and has yet to finance most of the project.

Recent slowdowns in the Russian and Chinese economies, low commodity prices, and currency fluctuations are hampering economic growth in Tajikistan. The dollar value of remittances from Russia to Tajikistan started showing small increases in 2017 after dropping by almost 65% in 2015. The government spent almost \$500 million in 2016 to bail out the country's banking sector, which is still troubled, and the government is facing challenges financing a public debt that is equivalent to approximately 50% of GDP. The National Bank of Tajikistan has aggressively spent its reserves to bolster the weakening somoni, leaving little space for fiscal or monetary measures to counter additional economic shocks.

TANZANIA

INTRODUCTION

Background: Shortly after achieving independence from Britain in the early 1960s, Tanganyika and Zanzibar merged to form the United Republic of Tanzania in 1964. One-party rule ended in 1995 with the first democratic elections held in the country since the 1970s. Zanzibar's semi-autonomous status and popular opposition led to four contentious elections since 1995, which the ruling party won despite international observers' claims of voting irregularities.

GEOGRAPHY

Location: Eastern Africa, bordering the Indian Ocean, between Kenya and Mozambique

Geographic coordinates: 6 00 S, 35 00 E

Map references: Africa

Area: *total:* 947,300 sq km

land: 885,800 sq km

water: 61,500 sq km

note: includes the islands of Mafia, Pemba, and Zanzibar

country comparison to the world: 32

Area—comparative: more than six times the size of Georgia; slightly larger than twice the size of California

Land boundaries: total: 4,161 km

border countries (8): Burundi 589 km, Democratic Republic of the Congo 479 km, Kenya 775 km, Malawi 512 km, Mozambique 840 km, Rwanda 222 km, Uganda 391 km, Zambia 353 km

Coastline: 1,424 km

Maritime claims: *territorial sea:* 12 nm

exclusive economic zone: 200 nm

Climate: varies from tropical along coast to temperate in highlands

Terrain: plains along coast; central plateau; highlands in north, south

Elevation: *mean elevation:* 1,018 m

elevation extremes: *lowest point:* Indian Ocean 0 m

highest point: Kilimanjaro 5,895 m (highest point in Africa)

Natural resources: hydropower, tin, phosphates, iron ore, coal, diamonds, gemstones, gold, natural gas, nickel

Land use: *agricultural land:* 43.7%

arable land: 14.3%;

permanent crops: 2.3%;

permanent pasture: 27.1%

forest: 37.3%

other: 19% (2011 est.)

Irrigated land: 1,840 sq km (2012)

Population—distribution: the largest and most populous East African country; population distribution is extremely uneven, but greater population clusters occur in the northern half of country and along the east coast

Natural hazards: flooding on the central plateau during the rainy season; drought

volcanism: limited volcanic activity; Ol Doinyo Lengai (2,962 m) has

emitted lava in recent years; other historically active volcanoes include Kieyo and Meru

Environment—current issues: soil degradation; deforestation; desertification; destruction of coral reefs threatens marine habitats; recent droughts affected marginal agriculture; wildlife threatened by illegal hunting and trade, especially for ivory

Environment—international agreements: *party to:* Biodiversity, Climate Change, Climate Change-Kyoto Protocol, Desertification, Endangered Species, Hazardous Wastes, Law of the Sea, Ozone Layer Protection, Wetlands

signed, but not ratified: none of the selected agreements

Geography—note: Kilimanjaro is the highest point in Africa and one of only two mountains on the continent that has glaciers (the other is Mount Kenya); bordered by three of the largest lakes on the continent: Lake Victoria (the world's second-largest freshwater lake) in the north, Lake Tanganyika (the world's second deepest) in the west, and Lake Nyasa (Lake Malawi) in the southwest

PEOPLE AND SOCIETY

Population: 53,950,935

note: estimates for this country explicitly take into account the effects of excess mortality due to AIDS; this can result in lower life expectancy, higher infant mortality, higher death rates, lower population growth rates, and changes in the distribution of population by age and sex than would otherwise be expected (July 2017 est.)

country comparison to the world: 26

Nationality: *noun:* Tanzanian(s)

adjective: Tanzanian

Ethnic groups: mainland—African 99% (of which 95% are Bantu consisting of more than 130 tribes), other 1% (consisting of Asian, European, and Arab); Zanzibar—Arab, African, mixed Arab and African

Languages: Kiswahili or Swahili (official), Kiunguja (name for Swahili in Zanzibar), English (official, primary language of commerce, administration, and higher education), Arabic (widely spoken in Zanzibar), many local languages

note: Kiswahili (Swahili) is the mother tongue of the Bantu people

living in Zanzibar and nearby coastal Tanzania; although Kiswahili is Bantu in structure and origin, its vocabulary draws on a variety of sources including Arabic and English; it has become the lingua franca of central and eastern Africa; the first language of most people is one of the local languages

Religions: Christian 61.4%, Muslim 35.2%, folk religion 1.8%, other 0.2%, unaffiliated 1.4%

note: Zanzibar is almost entirely Muslim (2010 est.)

Demographic profile: Tanzania has the largest population in East Africa and the lowest population density; almost a third of the population is urban. Tanzania's youthful population – about two-thirds of the population is under 25 – is growing rapidly because of the high total fertility rate of 4.8 children per woman. Progress in reducing the birth rate has stalled, sustaining the country's nearly 3% annual growth. The maternal mortality rate has improved since 2000, yet it remains very high because of early and frequent pregnancies, inadequate maternal health services, and a lack of skilled birth attendants – problems that are worse among poor and rural women. Tanzania has made strides in reducing under-5 and infant mortality rates, but a recent drop in immunization threatens to undermine gains in child health. Malaria is a leading killer of children under 5, while HIV is the main source of adult mortality

For Tanzania, most migration is internal, rural to urban movement, while some temporary labor migration from towns to plantations takes place seasonally for harvests. Tanzania was Africa's largest refugee-hosting country for decades, hosting hundreds of thousands of refugees from the Great Lakes region, primarily Burundi, over the last fifty years. However, the assisted repatriation and naturalization of tens of thousands of Burundian refugees between 2002 and 2014 dramatically reduced the refugee population. Tanzania is increasingly a transit country for illegal migrants from the Horn of Africa and the Great Lakes region who are heading to southern Africa for security reasons and/or economic opportunities. Some of these migrants choose to settle in Tanzania.

ECONOMY

Economy—overview: Tanzania is one of the world’s poorest economies in terms of per capita income, but has achieved high growth rates based on its vast natural resource wealth and tourism. GDP growth in 2009-17 averaged 6%-7% per year. Dar es Salaam used fiscal stimulus measures and easier monetary policies to lessen the impact of the global recession. Tanzania has largely completed its transition to a market economy, though the government retains a presence in sectors such as telecommunications, banking, energy, and mining.

The economy depends on agriculture, which accounts for more than one-quarter of GDP, provides 85% of exports, and employs about 65% of the work force. All land in Tanzania is owned by the government, which can lease land for up to 99 years. Proposed reforms to allow for land ownership, particularly foreign land ownership, remain unpopular.

The financial sector in Tanzania has expanded in recent years and foreign-owned banks account for about 48% of the banking industry's total assets. Competition among foreign commercial banks has resulted in significant improvements in the efficiency and quality of financial services, though interest rates are still relatively high, reflecting high fraud risk. Recent banking reforms have helped increase private-sector growth and investment.

The World Bank, the IMF, and bilateral donors have provided funds to rehabilitate Tanzania's aging infrastructure, including rail and port, which provide important trade links for inland countries. In 2013, Tanzania completed the world's largest Millennium Challenge Compact (MCC) grant, worth \$698 million, but in late 2015, the MCC Board of Directors deferred a decision to renew Tanzania's eligibility because of irregularities in voting in Zanzibar and concerns over the governments use of a controversial cybercrime bill.

Under the new government elected in 2015, Tanzania has developed an ambitious development agenda focused on creating a better business environment through improved infrastructure, access to financing, and education progress, but implementing budgets remains challenging for the government.

Maritime threats: the International Maritime Bureau reports that

shipping in territorial and offshore waters in the Indian Ocean remain at risk for piracy and armed robbery against ships, especially as Somali-based pirates extend their activities south; numerous commercial vessels have been attacked and hijacked both at anchor and while underway; crews have been robbed and stores or cargoes stolen

TERRORISM

Terrorist groups—foreign based: al-Qa’ida (AQ): aim(s): drive US Government personnel, US business people, and other US influences out of Tanzania and, ultimately, establish a pan-Islamic caliphate under a strict Salafi Muslim interpretation

area(s) of operation: maintains a limited presence; on 7 August 1998, operatives detonated truck bombs that exploded and killed and injured scores of workers and severely damaged the US Embassy in Dar es Salaam, killing approximately 11 people and injuring a few thousand others; almost all of the dead and injured were Tanzanians

TRANSNATIONAL ISSUES

Disputes—international: dispute with Tanzania over the boundary in Lake Nyasa (Lake Malawi) and the meandering Songwe River; Malawi contends that the entire lake up to the Tanzanian shoreline is its territory, while Tanzania claims the border is in the center of the lake; the conflict was reignited in 2012 when Malawi awarded a license to a British company for oil exploration in the lake

Refugees and internally displaced persons: refugees (country of origin): 278,801 (Burundi); 80,176 (Democratic Republic of the Congo) (2017)

Trafficking in persons: current situation: Tanzania is a source, transit, and destination country for men, women, and children subjected to forced labor and sex trafficking; the exploitation of young girls in domestic servitude continues to be Tanzania’s largest human trafficking problem; Tanzanian boys are subject to forced labor mainly on farms but also in mines and quarries, in the informal commercial sector, in factories, in the sex trade, and possibly on small fishing boats; Tanzanian children and adults are subjected to domestic servitude, other forms of forced labor, and sex trafficking in other African countries, the Middle East, Europe,

and the US; internal trafficking is more prevalent than transnational trafficking and is usually facilitated by friends, family members, or intermediaries with false offers of education or legitimate jobs; trafficking victims from Burundi, Kenya, South Asia, and Yemen are forced to work in Tanzania's agricultural, mining, and domestic service sectors or may be sex trafficked

tier rating: Tier 2 Watch List – Tanzania does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; in 2014, Tanzania was granted a waiver from an otherwise required downgrade to Tier 3 because its government has a written plan that, if implemented, would constitute making significant efforts to bring itself into compliance with the minimum standards for the elimination of trafficking; the government adopted a three-year national action plan and implementing regulations for the 2008 anti-trafficking law; authorities somewhat increased their number of trafficking investigations and prosecutions and convicted one offender, but the penalty was a fine in lieu of prison, which was inadequate given the severity of the crime; the government did not operate any shelters for victims and relied on NGOs to provide protective services (2015)

Illicit drugs: targeted by traffickers moving hashish, Afghan heroin, and South American cocaine transported down the East African coastline, through airports, or overland through Central Africa; Zanzibar likely used by traffickers for drug smuggling; traffickers in the past have recruited Tanzanian couriers to move drugs through Iran into East Asia

THAILAND

INTRODUCTION

Background: A unified Thai kingdom was established in the

mid-14th century. Known as Siam until 1939, Thailand is the only Southeast Asian country never to have been colonized by a European power. A bloodless revolution in 1932 led to the establishment of a constitutional monarchy. In alliance with Japan during World War II, Thailand became a US treaty ally in 1954 after sending troops to Korea and later fighting alongside the US in Vietnam. Thailand since 2005 has experienced several rounds of political turmoil including a military coup in 2006 that ousted then Prime Minister THAKSIN Chinnawat, followed by large-scale street protests by competing political factions in 2008, 2009, and 2010. THAKSIN's youngest sister, YINGLAK Chinnawat, in 2011 led the Puea Thai Party to an electoral win and assumed control of the government. A blanket amnesty bill for individuals involved in street protests, altered at the last minute to include all political crimes—including all convictions against THAKSIN—triggered months of large-scale anti-government protests in Bangkok beginning in November 2013.

In early May 2014, YINGLAK was removed from office by the Constitutional Court and in late May 2014 the Royal Thai Army, led by Royal Thai Army Gen. PRAYUT Chan-ocha, staged a coup against the caretaker government. PRAYUT was appointed prime minister in August 2014. The interim military government created several interim institutions to promote reform and draft a new constitution, which was passed in a national referendum in August 2016. Elections are tentatively set for late-2018. King PHUMIPHON Adunyadet passed away in October 2016 after 70 years on the throne; his only son, WACHIRALONGKON Bodinthrathepphayawarangkun, ascended the throne in December 2016. He signed the new constitution in April 2017. Thailand has also experienced violence associated with the ethno-nationalist insurgency in its southern Malay-Muslim majority provinces. Since January 2004, thousands have been killed and wounded in the insurgency.

ECONOMY

Economy—overview: With a relatively well-developed infrastructure, a free-enterprise economy, and generally pro-investment policies, Thailand is highly dependent on international

trade, with exports accounting for about two-thirds of GDP. Thailand's exports include electronics, agricultural commodities, automobiles and parts, and processed foods. The industry and service sectors produce about 90% of GDP. The agricultural sector, comprised mostly of small-scale farms, contributes only 10% of GDP but employs about one-third of the labor force. Thailand has attracted an estimated 3.0-4.5 million migrant workers, mostly from neighboring countries.

Over the last few decades, Thailand has reduced poverty substantially. In 2013, the Thai Government implemented a nationwide 300 baht (roughly \$10) per day minimum wage policy and deployed new tax reforms designed to lower rates on middle-income earners.

Thailand's economy is recovering from slow growth during the years since the 2014 coup. Thailand's economic fundamentals are sound, with low inflation, low unemployment, and reasonable public and external debt levels. Tourism and government spending—mostly on infrastructure and short-term stimulus measures – have helped to boost the economy, and The Bank of Thailand has been supportive, with several interest rate reductions.

Over the longer-term, household debt levels, political uncertainty, and an aging population pose risks to growth.

TRANSNATIONAL ISSUES

Disputes—international: separatist violence in Thailand's predominantly Malay-Muslim southern provinces prompt border closures and controls with Malaysia to stem insurgent activities; Southeast Asian states have enhanced border surveillance to check the spread of avian flu; talks continue on completion of demarcation with Laos but disputes remain over several islands in the Mekong River; despite continuing border committee talks, Thailand must deal with Karen and other ethnic rebels, refugees, and illegal cross-border activities; Cambodia and Thailand dispute sections of boundary; in 2011, Thailand and Cambodia resorted to arms in the dispute over the location of the boundary on the precipice surmounted by Preah Vihear temple ruins, awarded to Cambodia by ICJ decision in 1962 and part of a planned UN World Heritage site; Thailand is studying the feasibility of jointly constructing the Hatgyi Dam on the Salween river near the border with Burma; in 2004, international environmentalist pressure prompted China to halt construction of 13 dams on the Salween River that flows through China, Burma, and Thailand; approximately 105,000 mostly Karen refugees fleeing civil strife, political upheaval and economic stagnation in Burma live in remote camps in Thailand near the border

Refugees and internally displaced persons: refugees (country of origin): 102,633 (Burma) (2016)

IDPs: 35,000 (resurgence in ethno-nationalist violence in south of country since 2004) (2016)

stateless persons: 487,741 (2016); note—about half of Thailand's northern hill tribe people do not have citizenship and make up the bulk of Thailand's stateless population; most lack documentation showing they or one of their parents were born in Thailand; children born to Burmese refugees are not eligible for Burmese or Thai citizenship and are stateless; most Chao Lay, maritime nomadic peoples, who travel from island to island in the Andaman Sea west of Thailand are also stateless; stateless Rohingya refugees from Burma are considered illegal migrants by Thai authorities and are detained in inhumane conditions or expelled; stateless persons are denied access to voting, property, education, employment, healthcare, and driving

note: Thai nationality was granted to more than 18,000 stateless persons in the last 3 years (2015)

Trafficking in persons: current situation: Thailand is a source, transit, and destination country for men, women, and children subjected to forced labor and sex trafficking; victims from Burma, Cambodia, Laos, China, Vietnam, Uzbekistan, and India, migrate to Thailand in search of jobs but are forced, coerced, or defrauded into labor in commercial fishing, fishing-related industries, factories, domestic work, street begging, or the sex trade; some Thai, Burmese, Cambodian, and Indonesian men forced to work on fishing boats are kept at sea for years; sex trafficking of adults and children from Thailand, Laos, Vietnam, and Burma remains a significant problem; Thailand is a transit country for victims from China, Vietnam, Bangladesh, and Burma subjected to sex trafficking and forced labor in Malaysia, Indonesia, Singapore, Russia, South Korea, the US, and countries in Western Europe; Thai victims are also trafficked in North America, Europe, Africa, Asia, and the Middle East

tier rating: Tier 2 Watch List—Thailand does not fully comply with the minimum standards for the elimination of trafficking, and is not making significant efforts to do so; in 2014, authorities investigated, prosecuted, and convicted fewer traffickers and identified fewer victims; some cases of official complicity were investigated and prosecuted, but trafficking-related corruption continues to hinder progress in combatting trafficking; authorities' efforts to screen for victims among vulnerable populations remained inadequate due to a poor understanding of trafficking indicators, a failure to recognize non-physical forms of coercion, and a shortage of language interpreters; the government passed new labor laws increasing the minimum age in the fishing industry to 18 years old, guaranteeing the minimum wage, and requiring work contracts, but weak law enforcement and poor coordination among regulatory agencies enabled exploitive labor practices to continue; the government increased efforts to raise public awareness to the dangers of human trafficking and to deny entry to foreign sex tourists (2015)

Illicit drugs: a minor producer of opium, heroin, and marijuana; transit point for illicit heroin en route to the international drug market from Burma and Laos; eradication efforts have reduced the area of cannabis cultivation and shifted some production to

neighboring countries; opium poppy cultivation has been reduced by eradication efforts; also a drug money-laundering center; minor role in methamphetamine production for regional consumption; major consumer of methamphetamine since the 1990s despite a series of government crackdowns

TIMOR-LESTE

INTRODUCTION

Background: The Portuguese began to trade with the island of Timor in the early 16th century and colonized it in mid-century. Skirmishing with the Dutch in the region eventually resulted in an 1859 treaty in which Portugal ceded the western portion of the island. Imperial Japan occupied Portuguese Timor from 1942 to 1945, but Portugal resumed colonial authority after the Japanese defeat in World War II. East Timor declared itself independent from Portugal on 28 November 1975 and was invaded and occupied by Indonesian forces nine days later. It was incorporated into Indonesia in July 1976 as the province of Timor Timur (East

Timor). An unsuccessful campaign of pacification followed over the next two decades, during which an estimated 100,000 to 250,000 people died. In an August 1999 UN-supervised popular referendum, an overwhelming majority of the people of Timor-Leste voted for independence from Indonesia. However, in the next three weeks, anti-independence Timorese militias—organized and supported by the Indonesian military—commenced a large-scale, scorched-earth campaign of retribution. The militias killed approximately 1,400 Timorese and forced 300,000 people into western Timor as refugees. Most of the country's infrastructure, including homes, irrigation systems, water supply systems, and schools, and nearly all of the country's electrical grid were destroyed. On 20 September 1999, Australian-led peacekeeping troops deployed to the country and brought the violence to an end. On 20 May 2002, Timor-Leste was internationally recognized as an independent state.

In 2006, internal tensions threatened the new nation's security when a military strike led to violence and a breakdown of law and order. At Dili's request, an Australian-led International Stabilization Force (ISF) deployed to Timor-Leste, and the UN Security Council established the UN Integrated Mission in Timor-Leste (UNMIT), which included an authorized police presence of over 1,600 personnel. The ISF and UNMIT restored stability, allowing for presidential and parliamentary elections in 2007 in a largely peaceful atmosphere. In February 2008, a rebel group staged an unsuccessful attack against the president and prime minister. The ringleader was killed in the attack, and most of the rebels surrendered in April 2008. Since the attack, the government has enjoyed one of its longest periods of post-independence stability, including successful 2012 elections for both the parliament and president and a successful transition of power in February 2015. In late 2012, the UN Security Council ended its peacekeeping mission in Timor-Leste and both the ISF and UNMIT departed the country.

ECONOMY

Economy—overview: Since independence in 1999, Timor-Leste has faced great challenges in rebuilding its infrastructure, strengthening the civil administration, and generating jobs for young people entering the work force. The development of offshore oil and gas resources has greatly supplemented government revenues. This technology-intensive industry, however, has done little to create jobs in part because there are no production facilities in Timor-

Leste. Gas is currently piped to Australia for processing, but Timor-Leste has expressed interest in developing a domestic processing capacity.

In June 2005, the National Parliament unanimously approved the creation of the Timor-Leste Petroleum Fund to serve as a repository for all petroleum revenues and to preserve the value of Timor-Leste's petroleum wealth for future generations. The Fund held assets of \$16 billion, as of mid-2016. Oil accounts for over 90% of government revenues, and the drop in the price of oil in 2014-16 has led to concerns about the long-term sustainability of government spending. Timor-Leste compensated for the decline in price by exporting more oil. The Ministry of Finance maintains that the Petroleum Fund is sufficient to sustain government operations for the foreseeable future.

Annual government budget expenditures increased markedly between 2009 and 2012 but dropped significantly through 2016. Historically, the government failed to spend as much as its budget allowed. The government has focused significant resources on basic infrastructure, including electricity and roads, but limited experience in procurement and infrastructure building has hampered these projects. The underlying economic policy challenge the country faces remains how best to use oil-and-gas wealth to lift the non-oil economy onto a higher growth path and to reduce poverty.

TRANSNATIONAL ISSUES

Disputes—international: three stretches of land borders with Timor-Leste have yet to be delimited, two of which are in the Oecussi exclave area, and no maritime or Economic Exclusion Zone boundaries have been established between the countries; maritime boundaries with Indonesia remain unresolved; in 2007, Australia and Timor-Leste signed a 50-year development zone and revenue sharing agreement in lieu of a maritime boundary

Trafficking in persons: current situation: Timor-Leste is a source and destination country for men, women, and children subjected to forced labor and sex trafficking; Timorese women and girls from rural areas are lured to the capital with promises of legitimate jobs or education prospects and are then forced into prostitution or domestic servitude, and other women and girls may be sent to Indonesia for domestic servitude; Timorese family members force children into bonded domestic or agricultural labor to repay debts; foreign migrant women are vulnerable to sex trafficking in Timor-Leste, while men and boys from Burma, Cambodia, and Thailand are forced to work on fishing boats in Timorese waters under inhumane conditions

tier rating: Tier 2 Watch List – Timor-Leste does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; in 2014, legislation was drafted but not finalized or implemented that outlines procedures for screening potential trafficking victims; law enforcement made modest progress, including one conviction for sex trafficking, but efforts are hindered by prosecutors' and judges' lack of expertise in applying anti-trafficking laws effectively; the government rescued two child victims with support from an NGO but did not provide protective services (2015)

TOGO

INTRODUCTION

Background: French Togoland became Togo in 1960. Gen. Gnassingbe EYADEMA, installed as military ruler in 1967, ruled Togo with a heavy hand for almost four decades. Despite the facade of multi-party elections instituted in the early 1990s, the government was largely dominated by President EYADEMA, whose Rally of the Togolese People (RPT) party has been in power almost continually since 1967 and its successor, the Union for the Republic, maintains a majority of seats in today's legislature. Upon EYADEMA's death in February 2005, the military installed the president's son, Faure GNASSINGBE, and then engineered his formal election two months later. Democratic gains since then allowed Togo to hold its first relatively free and fair legislative elections in October 2007. Since 2007, President GNASSINGBE has started the country along a gradual path to political reconciliation and democratic reform, and Togo has held multiple presidential and legislative elections that were deemed generally free and fair by international observers. Despite those positive moves, political reconciliation has moved slowly and many Togolese complain that important political measures such as presidential term limits and

electoral reforms remain undone, leaving the country's politics in a lethargic state. Internationally, Togo is still known as a country where the same family has been in power for five decades.

Nationality: *noun:* Togolese (singular and plural)

adjective: Togolese

Ethnic groups: African (37 tribes; largest and most important are Ewe, Mina, and Kabre) 99%, European and Syrian-Lebanese less than 1%

Languages: French (official, the language of commerce), Ewe and Mina (the two major African languages in the south), Kabye (sometimes spelled Kabiye) and Dagomba (the two major African languages in the north)

Religions: Christian 29%, Muslim 20%, indigenous beliefs 51%

Demographic profile: Togo's population is estimated to have grown to four times its size between 1960 and 2010. With nearly 60% of its populace under the age of 25 and a high annual growth rate attributed largely to high fertility, Togo's population is likely to continue to expand for the foreseeable future. Reducing fertility, boosting job creation, and improving education will be essential to reducing the country's high poverty rate. In 2008, Togo eliminated primary school enrollment fees, leading to higher enrollment but increased pressure on limited classroom space, teachers, and materials. Togo has a good chance of achieving universal primary education, but educational quality, the underrepresentation of girls, and the low rate of enrollment in secondary and tertiary schools remain concerns.

Togo is both a country of emigration and asylum. In the early 1990s, southern Togo suffered from the economic decline of the phosphate sector and ethnic and political repression at the hands of dictator Gnassingbe EYADEMA and his northern, Kabye-dominated administration. The turmoil led 300,000 to 350,000 predominantly southern Togolese to flee to Benin and Ghana, with most not returning home until relative stability was restored in 1997. In 2005, another outflow of 40,000 Togolese to Benin and Ghana occurred when violence broke out between the opposition and security forces over the disputed election of EYADEMA's son Faure GNASSINGBE to the presidency. About half of the refugees reluctantly returned home in 2006, many still fearing for their safety. Despite ethnic tensions and periods of political unrest, Togo in September 2017 was home to more than 9,600 refugees from Ghana.

ECONOMY

Economy—overview: Togo has enjoyed a period of steady economic growth fueled by political stability and a concerted effort by the government to modernize the country's commercial infrastructure, but discontent with President Faure GNASSINGBE has led to a rapid rise in protests, creating downside risks. The country completed an ambitious large-scale infrastructure improvement program, including new principal roads, a new airport terminal, and a new sea-port. The economy depends heavily on both commercial and subsistence agriculture, which provides employment for around 60% of the labor force. Some basic foodstuffs must still be imported. Cocoa, coffee, and cotton and other agricultural products generate about 20% of export earnings with cotton being the most important cash crop. Togo is among the world's largest producers of phosphate and seeks to develop its carbonate phosphate reserves, which provide more than 20% of export earnings.

The government's decade-long effort, supported by the World Bank and the IMF, to implement economic reform measures, encourage foreign investment, and bring revenues in line with expenditures has moved slowly. Togo completed its IMF Extended Credit Facility in 2011 and reached a Heavily Indebted Poor Country debt relief completion point in 2010 at which 95% of the country's debt was forgiven. Togo continues to work with the IMF on structural reforms, and in January 2017, the IMF signed an Extended Credit Facility arrangement consisting of a three-year \$238 million loan package. Progress depends on follow through on privatization, increased openness in government financial operations, progress toward legislative elections, and continued support from foreign donors.

Togo's 2017 economic growth probably remained steady at 5.0%, largely driven by infusions of foreign aid, infrastructure investment in the port and mineral sectors, and improvements in the business climate. Foreign direct investment inflows have slowed in recent years.

TONGA

INTRODUCTION

Background: Tonga—unique among Pacific nations—never completely lost its indigenous governance. The archipelagos of “The Friendly Islands” were united into a Polynesian kingdom in 1845. Tonga became a constitutional monarchy in 1875 and a British protectorate in 1900; it withdrew from the protectorate and joined the Commonwealth of Nations in 1970. Tonga remains the only monarchy in the Pacific; in 2010 it began implementing steps to conduct more representative elections. Tropical Cyclone Gita, the strongest-ever recorded storm to impact Tonga, hit the islands in February 2018 causing extensive damage.

ECONOMY

Economy—overview: Tonga has a small, open island economy and is the last constitutional monarchy among the Pacific Island countries. It has a narrow export base in agricultural goods. Squash, vanilla beans, and yams are the main crops. Agricultural exports, including fish, make up two-thirds of total exports. Tourism is the second-largest source of hard currency earnings following remittances. Tonga had 53,800 visitors in 2015. The country must import a high proportion of its food, mainly from New Zealand.

The country remains dependent on external aid and remittances from overseas Tongans to offset its trade deficit. The government is emphasizing the development of the private sector, encouraging investment, and is committing increased funds for health care and education. Tonga's English-speaking and educated workforce offer a viable labor market, and the tropical climate provides fertile soil. Renewable energy and deep-sea mining also offer opportunities for investment.

Tonga has a reasonably sound basic infrastructure and well developed social services. The government faces high unemployment among the young, moderate inflation, pressures for democratic reform, and rising civil service expenditures.

TRINIDAD AND TOBAGO

INTRODUCTION

Background: First colonized by the Spanish, the islands came under British control in the early 19th century. The islands' sugar industry was hurt by the emancipation of the slaves in 1834. Manpower was replaced with the importation of contract laborers from India between 1845 and 1917, which boosted sugar production as well as the cocoa industry. The discovery of oil on Trinidad in 1910 added another important export. Independence was attained in 1962. The country is one of the most prosperous in the Caribbean thanks largely to petroleum and natural gas production and processing. Tourism, mostly in Tobago, is targeted for expansion and is growing. The government is struggling to reverse a surge in violent crime.

ECONOMY

Economy—overview: Trinidad and Tobago relies on its energy sector for much of its economic activity, and has one of the highest per capita incomes in Latin America. Economic growth between 2000 and 2007 averaged slightly over 8% per year, significantly above the regional average of about 3.7% for that same period; however, GDP has slowed down since then, contracting during 2009-12, making small gains in 2013 and contracting again in 2014-17. Trinidad and Tobago is buffered by considerable foreign reserves and a sovereign wealth fund that equals about one-and-a-half times the national budget, but the country is in a recession and the government faces the dual challenge of gas shortages and a low price environment.

Energy production and downstream industrial use dominate the economy. Oil and gas typically account for about 40% of GDP and 80% of exports but less than 5% of employment. Trinidad and Tobago is home to one of the largest natural gas liquefaction facilities in the Western Hemisphere. Trinidad and Tobago produces about nine times more natural gas than crude oil on an energy equivalent basis with gas contributing about two-thirds of energy sector government revenue. The US is the country's largest trading

partner, accounting for 28% of its total imports and taking 48% of its exports.

Economic diversification is a longstanding government talking point, and Trinidad and Tobago has much potential due to its stable, democratic government and its educated, English speaking workforce. The country is also a regional financial center with a well-regulated and stable financial system. Other sectors the Government of Trinidad and Tobago has targeted for increased investment and projected growth include tourism, agriculture, information and communications technology, and shipping. Unfortunately, a host of other factors, including low labor productivity, inefficient government bureaucracy, and corruption, have hampered economic development.

TRANSNATIONAL ISSUES

Disputes—international: Barbados and Trinidad and Tobago abide by the April 2006 Permanent Court of Arbitration decision delimiting a maritime boundary and limiting catches of flying fish in Trinidad and Tobago's EEZ; in 2005, Barbados and Trinidad and Tobago agreed to compulsory international arbitration under UN Convention on the Law of the Sea challenging whether the northern limit of Trinidad and Tobago's and Venezuela's maritime boundary extends into Barbadian waters; Guyana has expressed its intention to include itself in the arbitration, as the Trinidad and Tobago-Venezuela maritime boundary may also extend into its waters

Trafficking in persons: current situation: Trinidad and Tobago is a destination, transit, and possible source country for adults and children subjected to sex trafficking and forced labor; women and girls from Venezuela, the Dominican Republic, Guyana, and Colombia have been subjected to sex trafficking in Trinidad and Tobago's brothels and clubs; some economic migrants from the Caribbean region and Asia are vulnerable to forced labor in domestic service and the retail sector; the steady flow of vessels transiting Trinidad and Tobago's territorial waters may also increase opportunities for forced labor for fishing; international crime organizations are increasingly involved in trafficking, and boys are coerced to sell drugs and guns; corruption among police

and immigration officials impedes anti-trafficking efforts

tier rating: Tier 2 Watch List – Trinidad and Tobago does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; anti-trafficking law enforcement efforts decreased from the initiation of 12 prosecutions in 2013 to 1 in 2014; the government has yet to convict anyone under its 2011 anti-trafficking law, and all prosecutions from previous years remain pending; the government sustained efforts to identify victims and to refer them for care at NGO facilities, which it provided with funding; the government failed to draft a national action plan as mandated under the 2011 anti-trafficking law and did not launch a sufficiently robust awareness campaign to educate the public and officials (2015)

Illicit drugs: transshipment point for South American drugs destined for the US and Europe; producer of cannabis

TUNISIA

INTRODUCTION

Background: Rivalry between French and Italian interests in Tunisia culminated in a French invasion in 1881 and the creation of a protectorate. Agitation for independence in the decades following World War I was finally successful in convincing the French to recognize Tunisia as an independent state in 1956. The country's first president, Habib BOURGUIBA, established a strict one-party state. He dominated the country for 31 years, repressing Islamic fundamentalism and establishing rights for women unmatched by any other Arab nation. In November 1987, BOURGUIBA was removed from office and replaced by Zine el Abidine BEN ALI in a bloodless coup. Street protests that began in Tunis in December 2010 over high unemployment, corruption, widespread poverty, and high food prices escalated in January 2011, culminating in rioting that led to hundreds of deaths. On 14 January 2011, the same day BEN ALI dismissed the government, he fled the country, and by late January 2011, a "national unity government" was formed. Elections for the new Constituent Assembly were held in late October 2011, and in December, it elected human rights activist Moncef MARZOUKI as interim president. The Assembly began drafting a new constitution in February 2012 and, after several iterations and a months-long political crisis that stalled the transition, ratified the document in January 2014. Parliamentary and presidential elections for a permanent government were held at the end of 2014. Beji CAID ESSEBSI was elected as the first president under the country's new constitution. In 2016, the new unity government continued to seek to balance political cohesion with economic and social pressures.

country comparison to the world: 79

Nationality: *noun:* Tunisian(s)

adjective: Tunisian

Ethnic groups: Arab 98%, European 1%, Jewish and other 1%

Languages: Arabic (official, one of the languages of commerce), French (commerce), Berber (Tamazight)

note: despite having no official status, French plays a major role in the country and is spoken by about two-thirds of the population

Religions: Muslim (official; Sunni) 99.1%, other (includes Christian, Jewish, Shia Muslim, and Baha'i) 1%

Demographic profile: The Tunisian Government took steps in the 1960s to decrease population growth and gender inequality in order to improve socioeconomic development. Through its introduction of a national family planning program (the first in Africa) and by raising the legal age of marriage, Tunisia rapidly reduced its total fertility rate from about 7 children per woman in 1960 to 2 today. Unlike many of its North African and Middle Eastern neighbors, Tunisia will soon be shifting from being a youth-bulge country to having a transitional age structure, characterized by lower fertility and mortality rates, a slower population growth rate, a rising median age, and a longer average life expectancy.

Currently, the sizable young working-age population is straining Tunisia's labor market and education and health care systems. Persistent high unemployment among Tunisia's growing workforce, particularly its increasing number of university graduates and women, was a key factor in the uprisings that led to the overthrow of the BEN ALI regime in 2011. In the near term, Tunisia's large number of jobless young, working-age adults; deficiencies in primary and secondary education; and the ongoing lack of job creation and skills mismatches could contribute to future unrest. In the longer term, a sustained low fertility rate will shrink future youth cohorts and alleviate demographic pressure on Tunisia's labor market, but employment and education hurdles will still need to be

addressed.

Tunisia has a history of labor emigration. In the 1960s, workers migrated to European countries to escape poor economic conditions and to fill Europe's need for low-skilled labor in construction and manufacturing. The Tunisian Government signed bilateral labor agreements with France, Germany, Belgium, Hungary, and the Netherlands, with the expectation that Tunisian workers would eventually return home. At the same time, growing numbers of Tunisians headed to Libya, often illegally, to work in the expanding oil industry. In the mid-1970s, with European countries beginning to restrict immigration and Tunisian-Libyan tensions brewing, Tunisian economic migrants turned toward the Gulf countries. After mass expulsions from Libya in 1983, Tunisian migrants increasingly sought family reunification in Europe or moved illegally to southern Europe, while Tunisia itself developed into a transit point for sub-Saharan migrants heading to Europe.

Following the ousting of BEN ALI in 2011, the illegal migration of unemployed Tunisian youths to Italy and onward to France soared into the tens of thousands. Thousands more Tunisian and foreign workers escaping civil war in Libya flooded into Tunisia and joined the exodus. A readmission agreement signed by Italy and Tunisia in April 2011 helped stem the outflow, leaving Tunisia and international organizations to repatriate, resettle, or accommodate some 1 million Libyans and third-country nationals.

ECONOMY

Economy—overview: Tunisia's diverse, market-oriented economy has long been cited as a success story in Africa and the Middle East, but it faces an array of challenges following the 2011 Arab Spring revolution, including slow economic growth and high unemployment. Following an ill-fated experiment with socialist economic policies in the 1960s, Tunisia embarked on a successful strategy focused on bolstering exports, foreign investment, and tourism, all of which have become central to the country's economy. Key exports now include textiles and apparel, food products, petroleum products, chemicals, and phosphates, with about 80% of exports bound for Tunisia's main economic partner, the EU.

Tunisia's liberal strategy, coupled with investments in education and infrastructure, fueled decades of 4-5% annual GDP growth and improved living standards. Former President Zine el Abidine BEN ALI (1987-2011) continued these policies, but as his reign wore on cronyism and corruption stymied economic performance, and unemployment rose among the country's growing ranks of university graduates. These grievances contributed to the January 2011 overthrow of BEN ALI, sending Tunisia's economy into a tailspin as tourism and investment declined sharply.

Tunisia's government remains under pressure to boost economic growth quickly to mitigate chronic socio-economic challenges, especially high levels of youth unemployment, which has persisted since the revolution in 2011. Successive terrorist attacks against the tourism sector and worker strikes in the phosphate sector, which combined account for nearly 15% of GDP, slowed growth from 2015 to 2017. Tunis is seeking increased foreign investment and working with labor unions to limit labor disruption.

TERRORISM

Terrorist groups—home based: Ansar al-Shari'a in Tunisia (AAS-T): aim(s): expand its influence in Tunisia and, ultimately, replace the Tunisian Government with Sharia

area(s) of operations: headquartered in Tunisia, where members instigate riots and violent demonstrations, engage in attacks, and teach religious classes to locals; assassins and suicide bombers target Tunisian military and security personnel, Tunisian politicians,

religious sites, and groups and places representing Western influence such as tourists and places they frequent; in February and July 2013, members were implicated in the assassination of Tunisian politicians Chokri BELAID and Mohamed BRAHMI; on 14 September 2012, members overran and ransacked the US Embassy and a nearby school in Tunis, causing millions of dollars in damage; manpower strength was unknown as of early 2017; majority of fighters are Tunisian; in recent years, some of the fighters have either left the country or defected to join other armed groups; outlawed in Tunisia

Terrorist groups—foreign based: *al-Qa'ida (AQ):* aim(s): overthrow the Tunisian Government and, ultimately, establish a pan-Islamic caliphate under a strict Salafi Muslim interpretation of Sharia
area(s) of operation: maintains a longtime operational presence and established networks

al-Qaida in the Islamic Maghreb (AQIM): *aim(s):* replace the Tunisian Government with Sharia and, ultimately, establish a regional Islamic caliphate across all of North and West Africa
area(s) of operation: operationally active, primarily in the south near the borders with Algeria; Uqba bin Nafi Battalion, AQIM's branch in Tunisia, has claimed several lethal assaults in recent years against Tunisian military and security forces; AQIM's most deadliest attack on Tunisian forces happened in the Mount Chaambi region of Kasserine Governorate in July 2014, when operatives killed 15 soldiers and wounded at least 20

Islamic State of Iraq and the Levant (ISIL): *aim(s):* replace the Tunisian Government with an Islamic state and implement ISIL's strict interpretation of Sharia

area(s) of operation: Tunisian ISIL fighters stage attacks just across the border in Libya against government facilities and personnel and foreign tourists in Tunisia; bolstering its operational and recruitment presence throughout the country; operatives armed with AK-47 assault rifles and rocket-propelled grenades killed 12 Tunisian security officials and seven civilians during attacks on Army and police posts on 7 March 2016 in the southeastern border town of Ben Guerdane, Medenine Governorate; assessed in 2016 to have recruited 4,000-6,000 Tunisians from all walks of life in person and online to fight in Syria and Iraq but primarily in Libya, where some have become key ISIL figures; Tunisia is a top source

country for ISIL recruits

TRANSNATIONAL ISSUES

Disputes—international: none

Trafficking in persons: current situation: Tunisia is a source, destination, and possible transit country for men, women, and children subjected to forced labor and sex trafficking; Tunisia's increased number of street children, rural children working to support their families, and migrants who have fled unrest in neighboring countries are vulnerable to human trafficking; organized gangs force street children to serve as thieves, beggars, and drug transporters; Tunisian women have been forced into prostitution domestically and elsewhere in the region under false promises of legitimate work; East and West African women may be subjected to forced labor as domestic workers

tier rating: Tier 2 Watch List – Tunisia does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; in 2014, Tunisia was granted a waiver from an otherwise required downgrade to Tier 3 because its government has a written plan that, if implemented would constitute making significant efforts to bring itself into compliance with the minimum standards for the elimination of trafficking; in early 2015, the government drafted a national anti-trafficking action plan outlining proposals to raise awareness and enact draft anti-trafficking legislation; authorities did not provide data on the prosecution and conviction of offenders but reportedly identified 24 victims, as opposed to none in 2013, and operated facilities specifically dedicated to trafficking victims, regardless of nationality and gender; the government did not fully implement its national victim referral mechanism; some unidentified victims were not protected from punishment for unlawful acts directly resulting from being trafficked (2015)

TURKEY

INTRODUCTION

Background: Modern Turkey was founded in 1923 from the remnants of the defeated Ottoman Empire by national hero Mustafa KEMAL, who was later honored with the title Atatürk or “Father of the Turks.” Under his leadership, the country adopted radical social, legal, and political reforms. After a period of one-party rule, an experiment with multi-party politics led to the 1950 election victory of the opposition Democrat Party and the peaceful transfer of power. Since then, Turkish political parties have multiplied, but democracy has been fractured by periods of instability and military coups (1960, 1971, 1980), which in each case eventually resulted in a return of formal political power to civilians. In 1997, the military again helped engineer the ouster—popularly dubbed a “post-modern coup”—of the then Islamic-oriented government. A coup attempt was made in July 2016 by a faction of the Turkish Armed Forces.

Turkey intervened militarily on Cyprus in 1974 to prevent a Greek takeover of the island and has since acted as patron state to the “Turkish Republic of Northern Cyprus,” which only Turkey recognizes. A separatist insurgency begun in 1984 by the Kurdistan Workers’ Party (PKK), a US-designated terrorist organization, has long dominated the attention of Turkish security forces and claimed more than 40,000 lives. In 2013, the Turkish Government and the PKK conducted negotiations aimed at ending the violence, however intense fighting resumed in 2015. Turkey joined the UN in 1945 and in 1952 it became a member of NATO. In 1963, Turkey became

an associate member of the European Community; it began accession talks with the EU in 2005. Over the past decade, economic reforms, coupled with some political reforms, have contributed to a growing economy, although economic growth slowed in recent years.

From 2015 and continuing through 2016, Turkey witnessed an uptick in terrorist violence, including major attacks in Ankara, Istanbul, and throughout the predominantly Kurdish southeastern region of Turkey. On 15 July 2016, elements of the Turkish Armed forces attempted a coup that ultimately failed following widespread popular resistance. More than 240 people were killed and over 2,000 injured when Turkish citizens took to the streets en masse to confront the coup forces. In response, Turkish Government authorities arrested, suspended, or dismissed more than 100,000 security personnel, journalists, judges, academics, and civil servants due to their alleged connection with the attempted coup. The government accused followers of an Islamic transnational religious and social movement for allegedly instigating the failed coup and designates the followers as terrorists. Following the failed coup, the Turkish Government instituted a State of Emergency in July 2016 that has been extended to July 2017. The Turkish Government conducted a referendum on 16 April 2017 that will, when implemented, change Turkey from a parliamentary to a presidential system.

Flag description: red with a vertical white crescent moon (the closed portion is toward the hoist side) and white five-pointed star centered just outside the crescent opening; the flag colors and designs closely resemble those on the banner of the Ottoman Empire, which preceded modern-day Turkey; the crescent moon and star serve as insignia for Turkic peoples; according to one interpretation, the flag represents the reflection of the moon and a star in a pool of blood of Turkish warriors

National symbol(s): star and crescent; national colors: red, white

National anthem: *name:* "Istiklal Marsi" (Independence March)

lyrics/music: Mehmet Akif ERSOY/Zeki UNGOR

note: lyrics adopted 1921, music adopted 1932; the anthem's original music was adopted in 1924; a new composition was agreed upon in 1932

ECONOMY

Economy—overview: Turkey's largely free-market economy is driven by its industry and, increasingly, service sectors, although its traditional agriculture sector still accounts for about 25% of employment. The automotive, petrochemical, and electronics industries have risen in importance and surpassed the traditional textiles and clothing sectors within Turkey's export mix. However, the recent period of political stability and economic dynamism has given way to domestic uncertainty and security concerns, which are generating financial market volatility and weighing on Turkey's economic outlook.

Current government policies emphasize populist spending measures and credit breaks, while implementation of structural economic reforms has slowed. The government is playing a more active role in some strategic sectors and has used economic institutions and regulators to target political opponents, undermining private sector confidence in the judicial system. Between July 2016 and March 2017, three credit ratings agencies downgraded Turkey's sovereign credit ratings, citing concerns about the rule of law and the pace of economic reforms.

Turkey remains highly dependent on imported oil and gas but is pursuing energy relationships with a broader set of international partners and taking steps to increase use of domestic energy sources including renewables, nuclear, and coal. The joint Turkish-Azerbaijani Trans-Anatolian Natural Gas Pipeline is moving forward to increase transport of Caspian gas to Turkey and Europe, and when completed will help diversify Turkey's sources of imported gas.

After Turkey experienced a severe financial crisis in 2001, Ankara adopted financial and fiscal reforms as part of an IMF program. The reforms strengthened the country's economic fundamentals and ushered in an era of strong growth averaging more than 6% annually until 2008. An aggressive privatization program also reduced state involvement in basic industry, banking, transport, power generation, and communication. Global economic conditions

and tighter fiscal policy caused GDP to contract in 2009, but Turkey's well-regulated financial markets and banking system helped the country weather the global financial crisis, and GDP growth rebounded to around 9% in 2010 and 2011, as exports and investment recovered following the crisis.

Since 2014, productivity and growth has slowed to reveal persistent underlying imbalances in the Turkish economy. In particular, Turkey's large current account deficit means it must rely on external investment inflows to finance growth, leaving the economy vulnerable to destabilizing shifts in investor confidence. Other troublesome trends include rising unemployment and inflation, which increased in 2017, given the Turkish lira's continuing depreciation against the dollar. Although government debt remains low at about 30% of GDP, bank and corporate borrowing has almost tripled as a percent of GDP during the past decade, outpacing its emerging-market peers and prompting investor concerns about its long-term sustainability.

Military branches: Turkish Armed Forces (TSK): Turkish Land Forces (Turk Kara Kuvvetleri), Turkish Naval Forces (Turk Deniz Kuvvetleri; includes naval air and naval infantry), Turkish Air Forces (Turk Hava Kuvvetleri) (2013)

Military service age and obligation: 21-41 years of age for male compulsory military service (in case of mobilization, up to 65 years of age); 18 years of age for voluntary service; 12-month conscript obligation for non-university graduates, 6-12 months for university graduates (graduates of higher education may perform 6 months of military service as short-term privates, or 12 months as reserve officers); conscripts are called to register at age 20, for service at 21; women serve in the Turkish Armed Forces only as officers; reserve obligation to age 41; Turkish citizens with a residence or work permit who have worked abroad for at least 3 years (1095 days) can be exempt from military service in exchange for 6,000 EUR or its equivalent in foreign currencies; a law passed in December 2014 introduced a one-time payment scheme which exempted Turkish citizens 27 and older from conscription in exchange for a payment of \$8,150 (2013)

Military—note: the ruling Justice and Development Party (AKP) has actively pursued the goal of asserting civilian control over the military since first taking power in 2002; the Turkish Armed Forces (TSK) role in internal security has been significantly reduced; the TSK leadership continues to be an influential institution within Turkey, but plays a much smaller role in politics; the Turkish military remains focused on the threats emanating from the Syrian civil war, Russia's actions in Ukraine, and the PKK insurgency; primary domestic threats are listed as fundamentalism (with the definition in some dispute with the civilian government), separatism (Kurdish discontent), and the extreme left wing; Ankara strongly opposed establishment of an autonomous Kurdish region in Iraq; an overhaul of the Turkish Land Forces Command (TLFC) taking place under the "Force 2014" program is to produce 20-30% smaller, more highly trained forces characterized by greater mobility and firepower and capable of joint and combined operations; the TLFC has taken on increasing international peacekeeping responsibilities including in Afghanistan; the Turkish Navy is a regional naval power that wants to develop the capability to project power beyond Turkey's coastal waters; the Navy is heavily involved in NATO, multinational, and UN operations; its roles include control of territorial waters and security for sea lines of communications; the Turkish Air Force adopted an "Aerospace and Missile Defense Concept" in 2002 and has initiated project work on an integrated missile defense system; Air Force priorities

include attaining a modern deployable, survivable, and sustainable force structure, and establishing a sustainable command and control system; Turkey is a NATO ally and hosts NATO's Land Forces Command in Izmir, as well as the AN/TPY-2 radar as part of NATO Missile Defense (2014)

TERRORISM

Terrorist groups—home based: Revolutionary People's Liberation Party/Front (DHKP/C): **aim(s):** install a Marxist-Leninist government in Turkey

area(s) of operation: headquartered in Turkey, where the group has assassinated numerous Turkish businessmen, security officers, judiciary personnel, and attacked US personnel and facilities in Turkey over the years; has revived its attacks, primarily in Istanbul, against Turkish Government elements in recent years; launched rocket attacks on police and government buildings in Istanbul as recently as 21 January 2017; known for employing youths sympathetic to the group's cause to participate in violent riots; participates in terrorist acts with other armed groups, such as in August 2015, when a female member and a female from another group shot at the US Consulate in Istanbul, resulting in no fatalities; DHKP/C's central leadership directs the group's affairs in Turkey and abroad; senior leaders' whereabouts are unknown; numerous senior leaders and operatives have been arrested in recent years; assessed to have several dozen members operating in Turkey; outlawed in Turkey

Terrorist groups—foreign based: *Islamic State of Iraq and the Levant (ISIL):* **aim(s):** replace the Turkish Government with an Islamic state and implement ISIL's strict interpretation of Sharia

area(s) of operation: launches rocket attacks into southern Turkey from northern Syria; moves fighters and supplies across the Turkey-Syria border; responsible for suicide bombings and gunfire attacks on 28 June 2016 at Ataturk Airport in Istanbul, killing 44 locals and foreigners and injuring at least 240; suicide bombers killed 102 people at a peace rally in Ankara on 10 October 2015, marking the deadliest attack in modern Turkish history; actively recruits fighters

Kurdistan Workers Party (PKK) (Kongra-Gel): **aim(s):** establish Kurdistan, which includes land in eastern and southeastern Turkey

area(s) of operation: PKK attacks have surged since 2016 in the

southeast and spilled over to the country's western cities; targets primarily tourist locations and government, military, and security personnel and facilities; in October 2016, the Turkish Government reported thousands of PKK fighters had been killed and over 600 Turkish security force members had lost their lives and Human Rights groups reported hundreds of civilian deaths since the conflict between the Turkish Government and PKK resumed in July 2015, following a 2-1/2-year ceasefire; outlawed in Turkey

TRANSNATIONAL ISSUES

Disputes—international: complex maritime, air, and territorial disputes with Greece in the Aegean Sea; status of north Cyprus question remains; Turkey has expressed concern over the status of Kurds in Iraq; in 2009, Swiss mediators facilitated an accord reestablishing diplomatic ties between Armenia and Turkey, but neither side has ratified the agreement and the rapprochement effort has faltered; Turkish authorities have complained that blasting from quarries in Armenia might be damaging the medieval ruins of Ani, on the other side of the Arpacay valley

Refugees and internally displaced persons: *refugees (country of origin):* 157,000 (Afghanistan); 152,000 (Iraq); 33,000 (Iran) (2017); 3,506,532 (Syria) (2018)

IDPs: 1.108 million (displaced from 1984-2005 because of fighting between the Kurdish PKK and Turkish military; most IDPs are Kurds from eastern and southeastern provinces; no information available on persons displaced by development projects) (2016)

stateless persons: 780 (2016)

Illicit drugs: key transit route for Southwest Asian heroin to Western Europe and, to a lesser extent, the US—via air, land, and sea routes; major Turkish and other international trafficking organizations operate out of Istanbul; laboratories to convert imported morphine base into heroin exist in remote regions of Turkey and near Istanbul; government maintains strict controls over areas of legal opium poppy cultivation and over output of poppy straw concentrate; lax enforcement of money-laundering controls

TURKMENISTAN

INTRODUCTION

Background: Present-day Turkmenistan covers territory that has been at the crossroads of civilizations for centuries. The area was ruled in antiquity by various Persian empires, and was conquered by Alexander the Great, Muslim armies, the Mongols, Turkic warriors, and eventually the Russians. In medieval times, Merv (located in present-day Mary province) was one of the great cities of the Islamic world and an important stop on the Silk Road. Annexed by Russia in the late 1800s, Turkmenistan later figured prominently in the anti-Bolshevik movement in Central Asia. In 1924, Turkmenistan became a Soviet republic; it achieved independence upon the dissolution of the USSR in 1991. Extensive hydrocarbon/natural gas reserves, which have yet to be fully exploited, have begun to transform the country. The Government of Turkmenistan is moving to expand its extraction and delivery projects and has attempted to diversify its gas export routes beyond Russia's pipeline network. In 2010, new gas export pipelines that carry Turkmen gas to China and to northern Iran began operating, effectively ending the Russian monopoly on Turkmen gas exports. In 2016, Russia and Iran halted their purchase of gas from Turkmenistan making China

the only buyer of Turkmen gas. President for Life Saparmurat NYIAZOW died in December 2006, and Turkmenistan held its first multi-candidate presidential election in February 2007. Gurbanguly BERDIMUHAMEDOW, a deputy cabinet chairman under NYIAZOW, emerged as the country's new president. He was reelected in 2012 and again in 2017 with over 97% of the vote in both instances, in elections widely regarded as undemocratic.

ECONOMY

Economy—overview: Turkmenistan is largely a desert country with intensive agriculture in irrigated oases and significant natural gas and oil resources. The two largest crops are cotton, most of which is produced for export, and wheat, which is domestically consumed. Although agriculture accounts for almost 8% of GDP, it continues to employ nearly half of the country’s workforce. Hydrocarbon exports, the bulk of which is natural gas going to China, make up 25% of Turkmenistan’s GDP. Ashgabat has explored two initiatives to bring gas to new markets: a trans-Caspian pipeline that would carry gas to Europe and the Turkmenistan-Afghanistan-Pakistan-India gas pipeline. Both face major financing and security hurdles

and are unlikely to be completed soon.

Turkmenistan's autocratic governments under presidents NIYAZOW (1991-2006) and BERDIMUHAMEDOW (since 2007) have made little progress improving the business climate, privatizing state-owned industries, and combatting corruption, limiting economic development outside the energy sector. High energy prices in the mid-2000s allowed the government to undertake extensive development and social spending, including providing heavy utility subsidies.

Low energy prices since mid-2014 are hampering Turkmenistan's economic growth and reducing government revenues. The government has cut subsidies in several areas, and wage arrears have increased. In January 2014, the Central Bank of Turkmenistan devalued the manat by 19%, and downward pressure on the currency continues. There is a widening spread between the official exchange rate (4.1 TMM per US dollar) and the black market exchange rate (approximately 7 TMM per US dollar). Currency depreciation, corruption, isolationist policies, and limited spending on public services has resulted in a stagnate economy that is nearing crisis. Turkmenistan claims substantial foreign currency reserves, but non-transparent data limit international institutions' ability to verify this information.

Telephone system: *general assessment:* telecommunications network is gradually improving

domestic: Turkmentelekom, in cooperation with foreign partners, has installed high-speed fiber-optic lines and has upgraded most of the country's telephone exchanges and switching centers with new digital technology; combined fixed-line and mobile teledensity is about 170 per 100 persons; Russia's Mobile Telesystems, the only foreign mobile-cellular service provider in Turkmenistan, had its operating license suspended in December 2010 but was able to resume operations in September 2012; Turkmenistan's first telecommunication satellite was launched in 2015 and is expected to greatly improve connectivity in the country

international: country code—993; linked by fiber-optic cable and microwave radio relay to other CIS republics and to other countries by leased connections to the Moscow international gateway switch; an exchange in Ashgabat switches international traffic through Turkey via Intelsat; satellite earth stations—1 Orbita and 1 Intelsat (2016)

Broadcast media: broadcast media is government controlled and censored; 7 state-owned TV and 4 state-owned radio networks;

satellite dishes and programming provide an alternative to the state-run media; officials sometimes limit access to satellite TV by removing satellite dishes (2007)

MILITARY AND SECURITY

Military branches: Turkmen Armed Forces: Ground Forces, Navy, Air and Air Defense Forces (2013)

Military service age and obligation: 18-27 years of age for compulsory male military service; 2-year conscript service obligation; 20 years of age for voluntary service; males may enroll in military schools from age 15 (2015)

TRANSNATIONAL ISSUES

Disputes—international: cotton monoculture in Uzbekistan and Turkmenistan creates water-sharing difficulties for Amu Darya river states; field demarcation of the boundaries with Kazakhstan commenced in 2005, but Caspian seabed delimitation remains stalled with Azerbaijan, Iran, and Kazakhstan due to Turkmenistan's indecision over how to allocate the sea's waters and seabed; bilateral talks continue with Azerbaijan on dividing the seabed and contested oilfields in the middle of the Caspian

Refugees and internally displaced persons: stateless persons: 5,744 (2016)

Trafficking in persons: current situation: Turkmenistan is a source country for men, women, and children subjected to forced labor and sex trafficking; Turkmen who migrate abroad are forced to work in the textile, agriculture, construction, and domestic service industries, while women and girls may also be sex trafficked; in 2014, men surpassed women as victims; Turkey and Russia are primary trafficking destinations, followed by the Middle East, South and Central Asia, and other parts of Europe; Turkmen also experience forced labor domestically in the informal construction industry; participation in the cotton harvest is still mandatory for some public sector employees

tier rating: Tier 2 Watch List – Turkmenistan does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; in 2014,

Turkmenistan was granted a waiver from an otherwise required downgrade to Tier 3 because its government has a written plan that, if implemented, would constitute making significant efforts to bring itself into compliance with the minimum standards for the elimination of trafficking; the government made some progress in its law enforcement efforts in 2014, convicting more offenders than in 2013; authorities did not make adequate efforts to identify and protect victims and did not fund international organizations or NGOs that offered protective services; some victims were punished for crimes as a result of being trafficked (2015)

Illicit drugs: transit country for Afghan narcotics bound for Russian and Western European markets; transit point for heroin precursor chemicals bound for Afghanistan

TURKS AND CAICOS ISLANDS

INTRODUCTION

Background: The islands were part of the UK's Jamaican colony until 1962, when they assumed the status of a separate crown

colony upon Jamaica's independence. The governor of The Bahamas oversaw affairs from 1965 to 1973. With Bahamian independence, the islands received a separate governor in 1973. Although independence was agreed upon for 1982, the policy was reversed and the islands remain a British overseas territory. Grand Turk island suffered extensive damage from Hurricane Maria on 22 September 2017 resulting in loss of power and communications as well as damage to housing and businesses.

TUVALU

INTRODUCTION

Background: In 1974, ethnic differences within the British colony of the Gilbert and Ellice Islands caused the Polynesians of the Ellice Islands to vote for separation from the Micronesians of the Gilbert Islands. The following year, the Ellice Islands became the separate British colony of Tuvalu. Independence was granted in 1978. In 2000, Tuvalu negotiated a contract leasing its Internet domain

name “.tv” for \$50 million in royalties over a 12-year period. The agreement was subsequently renegotiated but details were not disclosed.

GEOGRAPHY

Location: Oceania, island group consisting of nine coral atolls in the South Pacific Ocean, about half way from Hawaii to Australia

Geographic coordinates: 8 00 S, 178 00 E

Map references: Oceania

Area: *total:* 26 sq km

land: 26 sq km

water: 0 sq km

country comparison to the world: 239

Maritime claims: *territorial sea:* 12 nm

contiguous zone: 24 nm

exclusive economic zone: 200 nm

Climate: tropical; moderated by easterly trade winds (March to November); westerly gales and heavy rain (November to March)

Terrain: low-lying and narrow coral atolls

Elevation: *mean elevation:* 2 m

elevation extremes: *lowest point:* Pacific Ocean 0 m

highest point: unnamed location 5 m

Natural resources: fish, coconut (copra)

Land use: *agricultural land:* 60%

forest: 33.3%

other: 6.7% (2011 est.)

Irrigated land: 0 sq km (2012)

Population—distribution: over half of the population resides on the atoll of Funafuti

Natural hazards: severe tropical storms are usually rare, but in 1997 there were three cyclones; low levels of islands make them sensitive to changes in sea level

Environment—current issues: water needs met by catchment systems; the use of sand as a building material has led to beachhead erosion; excessive clearance of forest undergrowth for use as fuel; damage to coral reefs from increasing ocean temperatures and acidification; rising sea levels threaten water table; in 2000, the government appealed to Australia and New Zealand to take in Tuvaluans if rising sea levels should make evacuation necessary

Environment—international agreements: *party to:* Biodiversity, Climate Change, Climate Change-Kyoto Protocol, Desertification, Law of the Sea, Ozone Layer Protection, Ship Pollution, Whaling
signed, but not ratified: none of the selected agreements

Geography—note: one of the smallest and most remote countries on Earth; six of the nine coral atolls—Nanumea, Nui, Vaitupu, Nukufetau, Funafuti, and Nukulaelae—have lagoons open to the ocean; Nanumaya and Niutao have landlocked lagoons; Niulakita does not have a lagoon

ECONOMY

Economy—overview: Tuvalu consists of a densely populated, scattered group of nine coral atolls with poor soil. Only eight of the atolls are inhabited. It is one of the smallest countries in the world, with its highest point at 4.6 meters above sea level. The country is isolated, almost entirely dependent on imports, particularly of food and fuel, and vulnerable to climate change and rising sea levels, which pose significant challenges to development.

The public sector dominates economic activity. Tuvalu has few natural resources, except for its fisheries. Earnings from fish exports and fishing licenses for Tuvalu’s territorial waters are a significant source of government revenue. In 2013, revenue from fishing licenses doubled and totaled more than 45% of GDP.

Official aid from foreign development partners has also increased. Tuvalu has substantial assets abroad. The Tuvalu Trust Fund, an international trust fund established in 1987 by development partners, has grown to \$104 million (A\$141 million) in 2014 and is an important cushion for meeting shortfalls in the government’s budget. While remittances are another substantial source of income, the value of remittances has declined since the 2008-09 global financial crisis, but has stabilized at nearly \$4 million per year. The financial impact of climate change and the cost of climate related

adaptation projects is one of many concerns for the nation.

UKRAINE

INTRODUCTION

Background: Ukraine was the center of the first eastern Slavic state, Kyivan Rus, which during the 10th and 11th centuries was the largest and most powerful state in Europe. Weakened by internecine quarrels and Mongol invasions, Kyivan Rus was incorporated into the Grand Duchy of Lithuania and eventually into the Polish-Lithuanian Commonwealth. The cultural and religious legacy of Kyivan Rus laid the foundation for Ukrainian nationalism through subsequent centuries. A new Ukrainian state, the Cossack Hetmanate, was established during the mid-17th century after an uprising against the Poles. Despite continuous Muscovite pressure, the Hetmanate managed to remain autonomous for well over 100 years. During the latter part of the 18th century, most Ukrainian ethnographic territory was absorbed by the Russian Empire. Following the collapse of czarist Russia in 1917, Ukraine achieved a short-lived period of independence (1917-20), but was reconquered and endured a brutal Soviet rule that engineered two forced famines (1921-22 and 1932-33) in which over 8 million died. In World War II, German and Soviet armies were responsible for 7 to 8

million more deaths. Although Ukraine achieved independence in 1991 with the dissolution of the USSR, democracy and prosperity remained elusive as the legacy of state control and endemic corruption stalled efforts at economic reform, privatization, and civil liberties.

A peaceful mass protest referred to as the “Orange Revolution” in the closing months of 2004 forced the authorities to overturn a rigged presidential election and to allow a new internationally monitored vote that swept into power a reformist slate under Viktor YUSHCHENKO. Subsequent internal squabbles in the YUSHCHENKO camp allowed his rival Viktor YANUKOVYCH to stage a comeback in parliamentary (Rada) elections, become prime minister in August 2006, and be elected president in February 2010. In October 2012, Ukraine held Rada elections, widely criticized by Western observers as flawed due to use of government resources to favor ruling party candidates, interference with media access, and harassment of opposition candidates. President YANUKOVYCH’s backtracking on a trade and cooperation agreement with the EU in November 2013—in favor of closer economic ties with Russia—and subsequent use of force against students, civil society activists, and other civilians in favor of the agreement led to a three-month protest occupation of Kyiv’s central square. The government’s use of violence to break up the protest camp in February 2014 led to all out pitched battles, scores of deaths, international condemnation, and the president’s abrupt departure for Russia. New elections in the spring allowed pro-West president Petro POROSHENKO to assume office on 7 June 2014.

Shortly after YANUKOVYCH’s departure in late February 2014, Russian President PUTIN ordered the invasion of Ukraine’s Crimean Peninsula claiming the action was to protect ethnic Russians living there. Two weeks later, a “referendum” was held regarding the integration of Crimea into the Russian Federation. The “referendum” was condemned as illegitimate by the Ukrainian Government, the EU, the US, and the UN General Assembly (UNGA). In response to Russia’s purported annexation of Crimea, 100 members of the UN passed UNGA resolution 68/262, rejecting the “referendum” as baseless and invalid and confirming the sovereignty, political independence, unity, and territorial integrity of Ukraine. Russia also continues to supply so-called separatists in two of Ukraine’s eastern provinces with manpower, funding, and

materiel resulting in an armed conflict with the Ukrainian Government. Representatives from Ukraine, Russia, and the unrecognized separatist republics signed the Minsk Protocol and Memorandum in September 2014 to end the conflict. However, this agreement failed to stop the fighting. In a renewed attempt to alleviate ongoing clashes, leaders of Ukraine, Russia, France, and Germany negotiated a follow-on package of measures in February 2015 to implement the Minsk Agreements. Representatives from Ukraine, Russia, and the Organization for Security and Cooperation in Europe also meet regularly to facilitate implementation of the peace deal. More than 33,000 civilians have been killed or wounded in the fighting resulting from Russian aggression in eastern Ukraine.

GOVERNMENT

Country name: *conventional long form:* none

conventional short form: Ukraine

local long form: none

local short form: Ukrayina

former: Ukrainian National Republic, Ukrainian State, Ukrainian Soviet Socialist Republic

etymology: name derives from the Old East Slavic word “ukraina” meaning “borderland or march (militarized border region)” and began to be used extensively in the 19th century; originally Ukrainians referred to themselves as Rusyny (Rusyns, Ruthenians, or Ruthenes), an endonym derived from the medieval Rus state (Kyivan Rus)

Government type: semi-presidential republic

Capital: name: Kyiv (Kiev)

note: pronounced KAY-yiv

geographic coordinates: 50 26 N, 30 31 E

time difference: UTC + 2 (7 hours ahead of Washington, DC, during Standard Time)

daylight saving time: +1hr, begins last Sunday in March; ends last Sunday in October

Administrative divisions: 24 provinces (oblasti, singular—oblast'), 1 autonomous republic* (avtonomna respublika), and 2 municipalities** (mista, singular—misto) with oblast status; Cherkasy, Chernihiv, Chernivtsi, Crimea or Avtonomna Respublika Krym* (Simferopol'), Dnipropetrovs'k (Dnipro), Donetsk, Ivano-Frankivs'k, Kharkiv, Kherson, Khmel'nyts'kyy, Kirovohrad (Kropyvnyts'kyy), Kyiv**, Kyiv, Luhans'k, L'viv, Mykolayiv, Odesa, Poltava, Rivne, Sevastopol'**, Sumy, Ternopil', Vinnytsya, Volyn' (Luts'k), Zakarpattia (Uzhhorod), Zaporizhzhya, Zhytomyr

note 1: administrative divisions have the same names as their administrative centers (exceptions have the administrative center name following in parentheses); plans include the eventual renaming of Dnipropetrovsk and Kirovohrad oblasts, but because these names are mentioned in the Constitution of Ukraine, the change will require a constitutional amendment

note 2: the US Government does not recognize Russia's annexation of Ukraine's Autonomous Republic of Crimea and the municipality of Sevastopol, nor their redesignation as the Republic of Crimea and the Federal City of Sevastopol

Independence: 24 August 1991 (from the Soviet Union); notable earlier dates: ca. 982 (VOLODYMYR I consolidates Kyivan Rus); 1648 (establishment of the Cossack Hetmanate)

National holiday: Independence Day, 24 August (1991); note—22 January 1918, the day Ukraine first declared its independence from Soviet Russia, and the date the short-lived Western and Greater (Eastern) Ukrainian republics united (1919), is now celebrated as Unity Day

Constitution: *history:* several previous; latest adopted and ratified 28 June 1996

amendments: proposed by the president of Ukraine or by at least one-third of the Supreme Council members; adoption requires simple majority vote by the Council and at least two-thirds majority

vote in its next regular session; adoption of proposals relating to general constitutional principles, elections, and amendment procedures requires two-thirds majority vote by the Council and approval in a referendum; constitutional articles on personal rights and freedoms, national independence, and territorial integrity cannot be amended; amended 2004, 2010, 2015 (2016)

Legal system: civil law system; judicial review of legislative acts

International law organization participation: has not submitted an ICJ jurisdiction declaration; non-party state to the ICCt

Citizenship: *citizenship by birth:* no

citizenship by descent only: at least one parent must be a citizen of Ukraine

ECONOMY

Economy—overview: After Russia, the Ukrainian Republic was the most important economic component of the former Soviet Union, producing about four times the output of the next-ranking republic. Its fertile black soil generated more than one-fourth of Soviet agricultural output, and its farms provided substantial quantities of meat, milk, grain, and vegetables to other republics. Likewise, its diversified heavy industry supplied unique equipment, such as, large diameter pipes and vertical drilling apparatus, and raw materials to industrial and mining sites in other regions of the former USSR.

Shortly after independence in August 1991, the Ukrainian Government liberalized most prices and erected a legal framework for privatization, but widespread resistance to reform within the government and the legislature soon stalled reform efforts and led to some backtracking. Output by 1999 had fallen to less than 40% of the 1991 level. Outside institutions—particularly the IMF encouraged Ukraine to quicken the pace and scope of reforms to foster economic growth. Ukrainian Government officials eliminated most tax and customs privileges in a March 2005 budget law, bringing more economic activity out of Ukraine’s large shadow economy. From 2000 until mid-2008, Ukraine’s economy was buoyant despite political turmoil between the prime minister and president. The economy contracted nearly 15% in 2009, among the worst economic performances in the world. In April 2010, Ukraine negotiated a price discount on Russian gas imports in exchange for extending Russia’s lease on its naval base in Crimea.

Ukraine’s oligarch-dominated economy grew slowly from 2010 to 2013. After former President YANUKOVYCH fled the country during the Revolution of Dignity, the international community began efforts to stabilize the Ukrainian economy, including a March 2014 IMF assistance package of \$17.5 billion, of which Ukraine has received four disbursements, most recently in April 2017, bringing

the total disbursed as of that date to approximately \$8.4 billion. Ukraine has made significant progress on reforms designed to make the country prosperous, democratic, and transparent. But more improvements are needed, including fighting corruption, developing capital markets, and improving the legislative framework.

Russia's occupation of Crimea in March 2014 and ongoing aggression in eastern Ukraine have hurt economic growth. With the loss of a major portion of Ukraine's heavy industry in Donbas and ongoing violence, Ukraine's economy contracted by 6.6% in 2014 and by 9.8% in 2015, but grew by 2.3% in 2016 and 2.0% in 2017 as key reforms took hold. After the EU and Ukraine enacted the Deep and Comprehensive Free Trade Area and Russia imposed a series of trade restrictions, the EU replaced Russia as Ukraine's largest trading partner. A new prohibition on commercial trade with separatist-controlled territories has had an uncertain effect on Ukraine's key industrial sectors.

Telephone system: *general assessment:* Ukraine's telecommunication development plan emphasizes improving domestic trunk lines, international connections, and the mobile-cellular system

domestic: the country's former sole telephone provider, Ukrtelekom, was successfully privatized 2011 and independent foreign-invested private companies now provide substantial telecommunications services; the mobile-cellular telephone system's expansion has slowed, largely due to saturation of the market that is now about 130 mobile phones per 100 persons

international: country code—380; 2 new domestic trunk lines are a part of the fiber-optic Trans-Asia-Europe (TAE) system and 3 Ukrainian links have been installed in the fiber-optic Trans-European Lines (TEL) project that connects 18 countries; additional international service is provided by the Italy-Turkey-Ukraine-Russia (ITUR) fiber-optic submarine cable and by an unknown number of earth stations in the Intelsat, Inmarsat, and Intersputnik satellite systems (2016)

Broadcast media: state-controlled nationwide TV broadcast channel (UT1) and a number of privately owned TV networks provide basic TV coverage; multi-channel cable and satellite TV services are available; Russian television broadcasts have a small audience nationwide, but larger audiences in the eastern and southern regions; the radio broadcast market, a mix of independent and state-owned networks, is comprised of some 300 stations (2007)

TRANSNATIONAL ISSUES

Disputes—international: 1997 boundary delimitation treaty with Belarus remains unratified due to unresolved financial claims, stalling demarcation and reducing border security; delimitation of land boundary with Russia is complete and demarcation began in 2012; the dispute over the boundary between Russia and Ukraine through the Kerch Strait and Sea of Azov is suspended due to the occupation of Crimea by Russia; Ukraine and Moldova signed an agreement officially delimiting their border in 1999, but the border has not been demarcated due to Moldova's difficulties with the break-away region of Transnistria; Moldova and Ukraine operate joint customs posts to monitor transit of people and commodities through Moldova's Transnistria Region, which remains under the auspices of an Organization for Security and Cooperation in Europe-mandated peacekeeping mission comprised of Moldovan, Transnistrian, Russian, and Ukrainian troops; the ICJ ruled largely in favor of Romania in its dispute submitted in 2004 over Ukrainian-administered Zmiinyi/Serpilor (Snake) Island and Black Sea maritime boundary delimitation; Romania opposes Ukraine's reopening of a navigation canal from the Danube border through Ukraine to the Black Sea

Refugees and internally displaced persons: IDPs: 1,494,806 (Russian-sponsored separatist violence in Crimea and eastern Ukraine) (2017)

stateless persons: 35,363 (2016); note—citizens of the former USSR who were permanently resident in Ukraine were granted citizenship upon Ukraine's independence in 1991, but some missed this window of opportunity; people arriving after 1991, Crimean Tatars, ethnic Koreans, people with expired Soviet passports, and people with no documents have difficulty acquiring Ukrainian citizenship; following the fall of the Soviet Union in 1989, thousands of Crimean Tatars and their descendants deported from Ukraine under the STALIN regime returned to their homeland, some being stateless

and others holding the citizenship of Uzbekistan or other former Soviet republics; a 1998 bilateral agreement between Ukraine and Uzbekistan simplified the process of renouncing Uzbek citizenship and obtaining Ukrainian citizenship

Trafficking in persons: current situation: Ukraine is a source, transit, and destination country for men, women, and children subjected to forced labor and sex trafficking; Ukrainian victims are sex trafficked within Ukraine as well as in Russia, Poland, Iraq, Spain, Turkey, Cyprus, Greece, Seychelles, Portugal, the Czech Republic, Israel, Italy, South Korea, Moldova, China, the United Arab Emirates, Montenegro, UK, Kazakhstan, Tunisia, and other countries; small numbers of foreigners from Moldova, Russia, Vietnam, Uzbekistan, Pakistan, Cameroon, and Azerbaijan were victims of labor trafficking in Ukraine; Ukrainian recruiters most often target Ukrainians from rural areas with limited job prospects using fraud, coercion, and debt bondage

tier rating: Tier 2 Watch List—Ukraine does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; the government's focus on its security situation constrained its anti-trafficking capabilities; law enforcement efforts to pursue trafficking cases weakened in 2014, continuing a multi-year decline, and no investigations, prosecutions, or convictions of government officials were made, despite reports of official complicity in the sex and labor trafficking of children living in state-run institutions; fewer victims were identified and referred to NGOs, which continued to provide and to fund the majority of victims' services (2015)

Illicit drugs: limited cultivation of cannabis and opium poppy, mostly for CIS consumption; some synthetic drug production for export to the West; limited government eradication program; used as transshipment point for opiates and other illicit drugs from Africa, Latin America, and Turkey to Europe and Russia; Ukraine has improved anti-money-laundering controls, resulting in its removal from the Financial Action Task Force's (FATF's) Noncooperative Countries and Territories List in February 2004; Ukraine's anti-money-laundering regime continues to be monitored by FATF

UNITED ARAB EMIRATES

INTRODUCTION

Background: The Trucial States of the Persian Gulf coast granted the UK control of their defense and foreign affairs in 19th century treaties. In 1971, six of these states—Abu Dhabi, ‘Ajman, Al Fujayrah, Ash Shariqah, Dubayy, and Umm al Qaywayn—merged to form the United Arab Emirates (UAE). They were joined in 1972 by Ra’s al Khaymah. The UAE’s per capita GDP is on par with those of leading West European nations. For more than three decades, oil and global finance drove the UAE’s economy. However, in 2008-09, the confluence of falling oil prices, collapsing real estate prices, and the international banking crisis hit the UAE especially hard. The UAE essentially avoided the “Arab Spring” unrest seen elsewhere in the Middle East in 2010-11 and in an effort to stem potential unrest, the government announced a multi-year, \$1.6-billion infrastructure investment plan for the poorer northern emirates and aggressively pursued advocates of political reform. The UAE in recent years has played a vital role in regional affairs. In addition to donating billions of dollars in economic aid to help stabilize Egypt, the UAE is a member of a US-led global coalition to defeat the Islamic State in Iraq and the Levant (ISIL) and a coalition partner in a Saudi-led military campaign to restore the Government of Yemen.

ECONOMY

Economy—overview: The UAE has an open economy with a high per capita income and a sizable annual trade surplus. Successful efforts at economic diversification have reduced the portion of GDP from the oil and gas sector to 30%.

Since the discovery of oil in the UAE nearly 60 years ago, the country has undergone a profound transformation from an impoverished region of small desert principalities to a modern state with a high standard of living. The government has increased spending on job creation and infrastructure expansion and is opening up utilities to greater private sector involvement. The

country's free trade zones—offering 100% foreign ownership and zero taxes—are helping to attract foreign investors.

The global financial crisis of 2008-09, tight international credit, and deflated asset prices constricted the economy in 2009. UAE authorities tried to blunt the crisis by increasing spending and boosting liquidity in the banking sector. The crisis hit Dubai hardest, as it was heavily exposed to depressed real estate prices. Dubai lacked sufficient cash to meet its debt obligations, prompting global concern about its solvency and ultimately a \$20 billion bailout from the UAE Central Bank and Abu Dhabi Government that was refinanced in March 2014.

The UAE's dependence on oil is a significant long-term challenge. Low oil prices have prompted the UAE to cut expenditures, including on some social programs, but the UAE has sufficient assets in its sovereign investment funds to cover its deficits. The government reduced fuel subsidies in August 2015, and has announced plans to introduce excise and value-added taxes by January 1, 2018. The UAE's strategic plan for the next few years focuses on economic diversification, promoting the UAE as a global trade and tourism hub, developing industry, and creating more job opportunities for nationals through improved education and increased private sector employment.

TRANSNATIONAL ISSUES

Disputes—international: boundary agreement was signed and ratified with Oman in 2003 for entire border, including Oman's Musandam Peninsula and Al Madhah enclaves, but contents of the agreement and detailed maps showing the alignment have not been published; Iran and UAE dispute Tunb Islands and Abu Musa Island, which Iran occupies

Illicit drugs: the UAE is a drug transshipment point for traffickers given its proximity to Southwest Asian drug-producing countries; the UAE's position as a major financial center makes it vulnerable

to money laundering; anti-money-laundering controls improving,
but informal banking remains unregulated

UNITED KINGDOM

INTRODUCTION

Background: The United Kingdom has historically played a leading

role in developing parliamentary democracy and in advancing literature and science. At its zenith in the 19th century, the British Empire stretched over one-fourth of the earth's surface. The first half of the 20th century saw the UK's strength seriously depleted in two world wars and the Irish Republic's withdrawal from the union. The second half witnessed the dismantling of the Empire and the UK rebuilding itself into a modern and prosperous European nation. As one of five permanent members of the UN Security Council and a founding member of NATO and the Commonwealth, the UK pursues a global approach to foreign policy. The Scottish Parliament, the National Assembly for Wales, and the Northern Ireland Assembly were established in 1998.

The UK has been an active member of the EU since its accession in 1973, although it chose to remain outside the Economic and Monetary Union. However, motivated in part by frustration at a remote bureaucracy in Brussels and massive migration into the country, UK citizens on 23 June 2016 narrowly voted to leave the EU. The UK and the EU are currently negotiating the terms of the UK's withdrawal and will discuss a framework for their future relationship ahead of the UK's scheduled departure from the bloc on 29 March 2019.

GEOGRAPHY

Location: Western Europe, islands—including the northern one-sixth of the island of Ireland—between the North Atlantic Ocean and the North Sea; northwest of France

Geographic coordinates: 54 00 N, 2 00 W

Map references: Europe

Area: *total:* 243,610 sq km

land: 241,930 sq km

water: 1,680 sq km

note: includes Rockall and Shetland Islands

country comparison to the world: 81

Area—comparative: twice the size of Pennsylvania; slightly smaller than Oregon

Land boundaries: *total:* 443 km

Coastline: 12,429 km

Maritime claims: *territorial sea:* 12 nm

exclusive fishing zone: 200 nm

continental shelf: as defined in continental shelf orders or in accordance with agreed upon boundaries

Climate: temperate; moderated by prevailing southwest winds over the North Atlantic Current; more than one-half of the days are overcast

Terrain: mostly rugged hills and low mountains; level to rolling plains in east and southeast

Elevation: *mean elevation:* 162 m

elevation extremes: *lowest point:* The Fens -4 m

highest point: Ben Nevis 1,343 m

Natural resources: coal, petroleum, natural gas, iron ore, lead, zinc, gold, tin, limestone, salt, clay, chalk, gypsum, potash, silica sand, slate, arable land

Land use: *agricultural land:* 71%

arable land: 25.1%;

National symbol(s): lion (Britain in general); lion, Tudor rose, oak (England); lion, unicorn, thistle (Scotland); dragon, daffodil, leek (Wales); shamrock, flax (Northern Ireland); national colors: red, white, blue (Britain in general); red, white (England); blue, white (Scotland); red, white, green (Wales)

National anthem: name: “God Save the Queen”

lyrics/music: unknown

note: in use since 1745; by tradition, the song serves as both the national and royal anthem of the UK; it is known as either “God Save the Queen” or “God Save the King,” depending on the gender of the reigning monarch; it also serves as the royal anthem of many Commonwealth nations

ECONOMY

Economy—overview: The UK, a leading trading power and financial center, is the third largest economy in Europe after Germany and France. Agriculture is intensive, highly mechanized, and efficient by European standards, producing about 60% of food needs with less than 2% of the labor force. The UK has large coal, natural gas, and oil resources, but its oil and natural gas reserves are declining; the UK has been a net importer of energy since 2005. Services, particularly banking, insurance, and business services, are key drivers of British GDP growth. Manufacturing, meanwhile, has declined in importance but still accounts for about 10% of

economic output.

In 2008, the global financial crisis hit the economy particularly hard, due to the importance of its financial sector. Falling home prices, high consumer debt, and the global economic slowdown compounded the UK's economic problems, pushing the economy into recession in the latter half of 2008 and prompting the then BROWN (Labour) government to implement a number of measures to stimulate the economy and stabilize the financial markets. Facing burgeoning public deficits and debt levels, in 2010 the then CAMERON-led coalition government (between Conservatives and Liberal Democrats) initiated an austerity program, which has continued under the Conservative government. However, the deficit still remains one of the highest in the G7, standing at 3.6% of GDP as of 2017, and the UK has pledged to lower its corporation tax from 20% to 17% by 2020. The UK had a debt burden of 90.4% GDP at the end of 2017.

The UK's economy has begun to slow since the referendum vote to leave the EU in June 2016. A sustained depreciation of the British pound has increased consumer and producer prices, weighing on consumer spending without spurring a meaningful increase in exports. The UK has an extensive trade relationship with other EU members through its single market membership and economic observers have warned the exit will jeopardize its position as the central location for European financial services. Prime Minister MAY is seeking a new "deep and special" trade relationship with the EU following the UK's exit. However, economists doubt that the UK will be able to preserve the benefits of EU membership without the obligations.

TERRORISM

Terrorist groups—home based: Continuity Irish Republican Army (CIRA): aim(s): disrupt the Northern Ireland peace process, remove British rule in Northern Ireland and, ultimately, unify Ireland

area(s) of operation: based and operationally active primarily in Belfast and along the border areas of Northern Ireland, where operatives have carried out bombings, assassinations, kidnappings, hijackings, extortion, and robberies over the years; articulates its intent to target drug dealers and other criminals, especially those who harm any Republican, including RIRA members; remains sporadically operational targeting primarily the British military,

Northern Ireland security forces, and Loyalist paramilitary groups; attacks in recent years involve shootings and small-scale bombings; does not have an established presence on the UK mainland; accused in 1996 of directing operatives to park a vehicle with 1,500 pounds of homemade explosives at the Killyhelvin Hotel in Enniskillen, County Fermanagh, Northern Ireland; on 15 July 1996, at least 11 people were injured and most of the immensely popular and newly refurbished hotel was demolished; the attack occurred during the original IRA's first ceasefire; estimated in 2016 to have 50-100 members

Real Irish Republican Army (RIRA): *aim(s):* committed to using violence to remove British rule in Northern Ireland, disrupt the Northern Ireland peace process, and unify Ireland

area(s) of operation: based and operationally active in Northern Ireland, where operatives continue to conduct occasional shootings and small-scale bombings; RIRA claimed responsibility for the 2 April 2011 murder of the Police Services of Northern Ireland's Constable Ronan Kerr, who was killed when a booby-trap bomb exploded under his car in Omagh; RIRA conducted its deadliest attack in the UK on 15 August 1998, when operatives detonated a vehicle-borne improvised explosive device with 500 pounds of explosives on a busy street in Omagh, killing 29 people and injuring at least 220; maintains a limited presence in Great Britain; estimated in 2015 to have a 100 active members

Terrorist groups—foreign based: *Islamic State of Iraq and the Levant (ISIL):* *aim(s):* bolster its support and recruitment networks in the UK and, ultimately, destabilize the UK economy

area(s) of operation: maintains support and recruitment networks; Anjem CHOUDARY and associate Mizanur RAHMAN pled guilty on 16 August 2016 to inviting support for ISIL; CHOUDARY founded the banned UK-based extremist movement known as al-Muhajiroun, which UK authorities accuse of recruiting and facilitating activities on ISIL's behalf; the UK is a top source country in Europe for ISIL recruits; as of early 2017, approximately 750 to 850 British citizens were fighting in Syria or Iraq alongside ISIL, planning to go to fight, or had returned from the fight

TRANSNATIONAL ISSUES

Disputes—international: in 2002, Gibraltar residents voted

overwhelmingly by referendum to reject any “shared sovereignty” arrangement between the UK and Spain; the Government of Gibraltar insisted on equal participation in talks between the two countries; Spain disapproved of UK plans to grant Gibraltar greater autonomy; Mauritius and Seychelles claim the Chagos Archipelago (British Indian Ocean Territory); in 2001, the former inhabitants of the archipelago, evicted 1967—1973, were granted UK citizenship and the right of return, followed by Orders in Council in 2004 that banned rehabilitation, a High Court ruling reversed the ban, a Court of Appeal refusal to hear the case, and a Law Lords’ decision in 2008 denied the right of return; in addition, the UK created the world’s largest marine protection area around the Chagos islands prohibiting the extraction of any natural resources therein; UK rejects sovereignty talks requested by Argentina, which still claims the Falkland Islands (Islas Malvinas) and South Georgia and the South Sandwich Islands; territorial claim in Antarctica (British Antarctic Territory) overlaps Argentine claim and partially overlaps Chilean claim; Iceland, the UK, and Ireland dispute Denmark’s claim that the Faroe Islands’ continental shelf extends beyond 200 nm

Refugees and internally displaced persons: refugees (country of origin): 14,363 (Iran); 13,720 (Eritrea); 9,752 (Afghanistan); 8,790 (Zimbabwe); 8,269 (Syria); 7,326 (Sudan); 6,814 (Pakistan); 5,954 (Somalia); 5,809 (Sri Lanka) (2016)

stateless persons: 64 (2016)

Illicit drugs: producer of limited amounts of synthetic drugs and synthetic precursor chemicals; major consumer of Southwest Asian heroin, Latin American cocaine, and synthetic drugs; money-laundering center

UNITED STATES

INTRODUCTION

Background: Britain's American colonies broke with the mother country in 1776 and were recognized as the new nation of the United States of America following the Treaty of Paris in 1783. During the 19th and 20th centuries, 37 new states were added to the original 13 as the nation expanded across the North American continent and acquired a number of overseas possessions. The two most traumatic experiences in the nation's history were the Civil War (1861-65), in which a northern Union of states defeated a secessionist Confederacy of 11 southern slave states, and the Great Depression of the 1930s, an economic downturn during which about a quarter of the labor force lost its jobs. Buoyed by victories in World Wars I and II and the end of the Cold War in 1991, the US remains the world's most powerful nation state. Since the end of World War II, the economy has achieved relatively steady growth, low unemployment and inflation, and rapid advances in technology.

GEOGRAPHY

Location: North America, bordering both the North Atlantic Ocean and the North Pacific Ocean, between Canada and Mexico

Geographic coordinates: 38 00 N, 97 00 W

Map references: North America

Area: *total:* 9,833,517 sq km

land: 9,147,593 sq km

water: 685,924 sq km

note: includes only the 50 states and District of Columbia, no overseas territories (2010)

country comparison to the world: 4

Area—comparative: about half the size of Russia; about three-tenths the size of Africa; about half the size of South America (or slightly larger than Brazil); slightly larger than China; more than twice the size of the European Union

Land boundaries: *total:* 12,048 km

border countries (2): Canada 8,893 km (including 2,477 km with Alaska), Mexico 3,155 km

note: US Naval Base at Guantanamo Bay, Cuba is leased by the US and is part of Cuba; the base boundary is 28.5 km

Coastline: 19,924 km

Maritime claims: *territorial sea:* 12 nm

contiguous zone: 24 nm

exclusive economic zone: 200 nm

continental shelf: not specified

Climate: mostly temperate, but tropical in Hawaii and Florida, arctic in Alaska, semiarid in the great plains west of the Mississippi River, and arid in the Great Basin of the southwest; low winter temperatures in the northwest are ameliorated occasionally in January and February by warm chinook winds from the eastern slopes of the Rocky Mountains

Terrain: vast central plain, mountains in west, hills and low mountains in east; rugged mountains and broad river valleys in Alaska; rugged, volcanic topography in Hawaii

Elevation: *mean elevation:* 760 m

elevation extremes: *lowest point:* Death Valley -86 m (lowest point in North America)

highest point: Denali (Mount McKinley) 6,190 m (highest point in North America)

note: the peak of Mauna Kea (4,205 m above sea level) on the island of Hawaii rises about 10,200 m above the Pacific Ocean floor; by this measurement, it is the world's tallest mountain—higher than Mount Everest (8,850 m), which is recognized as the tallest mountain above sea level

Natural resources: coal, copper, lead, molybdenum, phosphates,

rare earth elements, uranium, bauxite, gold, iron, mercury, nickel, potash, silver, tungsten, zinc, petroleum, natural gas, timber, arable land

note: the US has the world's largest coal reserves with 491 billion short tons accounting for 27% of the world's total

Land use: *agricultural land:* 44.5%

arable land: 16.8%;

permanent crops: 0.3%;

permanent pasture: 27.4%

forest: 33.3%

other: 22.2% (2011 est.)

Irrigated land: 264,000 sq km (2012)

Population—distribution: large urban clusters are spread throughout the eastern half of the US (particularly the Great Lakes area, northeast, east, and southeast) and the western tier states; mountainous areas, principally the Rocky Mountains and Appalachian chain, deserts in the southwest, the dense boreal forests in the extreme north, and the central prairie states are less densely populated; Alaska's population is concentrated along its southern coast—with particular emphasis on the city of Anchorage—and Hawaii's is centered on the island of Oahu

Natural hazards: tsunamis; volcanoes; earthquake activity around Pacific Basin; hurricanes along the Atlantic and Gulf of Mexico coasts; tornadoes in the Midwest and Southeast; mud slides in California; forest fires in the west; flooding; permafrost in northern Alaska, a major impediment to development

volcanism: volcanic activity in the Hawaiian Islands, Western Alaska, the Pacific Northwest, and in the Northern Mariana Islands; both Mauna Loa (4,170 m) in Hawaii and Mount Rainier (4,392 m) in Washington have been deemed Decade Volcanoes by the International Association of Volcanology and Chemistry of the Earth's Interior, worthy of study due to their explosive history and close proximity to human populations; Pavlof (2,519 m) is the most active volcano in Alaska's Aleutian Arc and poses a significant threat to air travel since the area constitutes a major flight path between North America and East Asia; St. Helens (2,549 m), famous for the devastating 1980 eruption, remains active today; numerous other historically active volcanoes exist, mostly concentrated in the Aleutian arc and Hawaii; they include: in Alaska: Aniakchak,

Augustine, Chiginagak, Fourpeaked, Iliamna, Katmai, Kupreanof, Martin, Novarupta, Redoubt, Spurr, Wrangell; in Hawaii: Trident, Ugashik-Peulik, Ukinrek Maars, Veniaminof; in the Northern Mariana Islands: Anatahan; and in the Pacific Northwest: Mount Baker, Mount Hood

Environment—current issues: large emitter of carbon dioxide from the burning of fossil fuels; air pollution resulting in acid rain in both the US and Canada; water pollution from runoff of pesticides and fertilizers; limited natural freshwater resources in much of the western part of the country require careful management; desertification

Environment—international agreements: *party to:* Air Pollution, Air Pollution-Nitrogen Oxides, Antarctic-Environmental Protocol, Antarctic-Marine Living Resources, Antarctic Seals, Antarctic Treaty, Climate Change, Desertification, Endangered Species, Environmental Modification, Marine Dumping, Marine Life Conservation, Ozone Layer Protection, Ship Pollution, Tropical Timber 83, Tropical Timber 94, Wetlands, Whaling

signed, but not ratified: Air Pollution-Persistent Organic Pollutants, Air Pollution-Volatile Organic Compounds, Biodiversity, Climate Change-Kyoto Protocol, Hazardous Wastes

Geography—note: world's third-largest country by size (after Russia and Canada) and by population (after China and India); Denali (Mt. McKinley) is the highest point in North America and Death Valley the lowest point on the continent

note: the design and colors have been the basis for a number of other flags, including Chile, Liberia, Malaysia, and Puerto Rico

National symbol(s): bald eagle; national colors: red, white, blue

National anthem: name: “The Star-Spangled Banner”

lyrics/music: Francis Scott KEY/John Stafford SMITH

note: adopted 1931; during the War of 1812, after witnessing the successful American defense of Fort McHenry in Baltimore following British naval bombardment, Francis Scott KEY wrote the lyrics to what would become the national anthem; the lyrics were set to the tune of “The Anacreontic Song”; only the first verse is sung

ECONOMY

Economy—overview: The US has the most technologically powerful

economy in the world, with a per capita GDP of \$57,300. US firms are at or near the forefront in technological advances, especially in computers, pharmaceuticals, and medical, aerospace, and military equipment; however, their advantage has narrowed since the end of World War II. Based on a comparison of GDP measured at purchasing power parity conversion rates, the US economy in 2014, having stood as the largest in the world for more than a century, slipped into second place behind China, which has more than tripled the US growth rate for each year of the past four decades.

In the US, private individuals and business firms make most of the decisions, and the federal and state governments buy needed goods and services predominantly in the private marketplace. US business firms enjoy greater flexibility than their counterparts in Western Europe and Japan in decisions to expand capital plant, to lay off surplus workers, and to develop new products. At the same time, businesses face higher barriers to enter their rivals' home markets than foreign firms face entering US markets.

Long-term problems for the US include stagnation of wages for lower-income families, inadequate investment in deteriorating infrastructure, rapidly rising medical and pension costs of an aging population, energy shortages, and sizable current account and budget deficits.

The onrush of technology has been a driving factor in the gradual development of a "two-tier" labor market in which those at the bottom lack the education and the professional/technical skills of those at the top and, more and more, fail to get comparable pay raises, health insurance coverage, and other benefits. But the globalization of trade, and especially the rise of low-wage producers such as China, has put additional downward pressure on wages and upward pressure on the return to capital. Since 1975, practically all the gains in household income have gone to the top 20% of households. Since 1996, dividends and capital gains have grown faster than wages or any other category of after-tax income.

Imported oil accounts for nearly 55% of US consumption and oil has a major impact on the overall health of the economy. Crude oil prices doubled between 2001 and 2006, the year home prices peaked; higher gasoline prices ate into consumers' budgets and many individuals fell behind in their mortgage payments. Oil prices climbed another 50% between 2006 and 2008, and bank foreclosures more than doubled in the same period. Besides

dampening the housing market, soaring oil prices caused a drop in the value of the dollar and a deterioration in the US merchandise trade deficit, which peaked at \$840 billion in 2008. Because the US economy is energy-intensive, falling oil prices since 2013 have alleviated many of the problems the earlier increases had created.

The sub-prime mortgage crisis, falling home prices, investment bank failures, tight credit, and the global economic downturn pushed the US into a recession by mid-2008. GDP contracted until the third quarter of 2009, making this the deepest and longest downturn since the Great Depression. To help stabilize financial markets, the US Congress established a \$700 billion Troubled Asset Relief Program (TARP) in October 2008. The government used some of these funds to purchase equity in US banks and industrial corporations, much of which had been returned to the government by early 2011. In January 2009, Congress passed and President Barack OBAMA signed a bill providing an additional \$787 billion fiscal stimulus to be used over 10 years—two-thirds on additional spending and one-third on tax cuts—to create jobs and to help the economy recover. In 2010 and 2011, the federal budget deficit reached nearly 9% of GDP. In 2012, the Federal Government reduced the growth of spending and the deficit shrank to 7.6% of GDP. US revenues from taxes and other sources are lower, as a percentage of GDP, than those of most other countries.

Wars in Iraq and Afghanistan required major shifts in national resources from civilian to military purposes and contributed to the growth of the budget deficit and public debt. Through 2014, the direct costs of the wars totaled more than \$1.5 trillion, according to US Government figures.

In March 2010, President OBAMA signed into law the Patient Protection and Affordable Care Act, a health insurance reform that was designed to extend coverage to an additional 32 million Americans by 2016, through private health insurance for the general population and Medicaid for the impoverished. Total spending on healthcare—public plus private—rose from 9.0% of GDP in 1980 to 17.9% in 2010.

In July 2010, the president signed the DODD-FRANK Wall Street Reform and Consumer Protection Act, a law designed to promote financial stability by protecting consumers from financial abuses, ending taxpayer bailouts of financial firms, dealing with troubled banks that are “too big to fail,” and improving accountability and

transparency in the financial system—in particular, by requiring certain financial derivatives to be traded in markets that are subject to government regulation and oversight.

In December 2012, the Federal Reserve Board (Fed) announced plans to purchase \$85 billion per month of mortgage-backed and Treasury securities in an effort to hold down long-term interest rates, and to keep short-term rates near zero until unemployment dropped below 6.5% or inflation rose above 2.5%. In late 2013, the Fed announced that it would begin scaling back long-term bond purchases to \$75 billion per month in January 2014 and further reduce them as conditions warranted; the Fed ended the purchases during the summer of 2014. In 2014, the unemployment rate dropped to 6.2%, and continued to fall to 5.5% by mid-2015, the lowest rate of joblessness since before the global recession began; inflation stood at 1.7%, and public debt as a share of GDP continued to decline, following several years of increases. In December 2015, the Fed raised its target for the benchmark federal funds rate by 0.25%, the first increase since the recession began. With US GDP growth below 2%, the Fed opted to raise rates three times since then, and in mid-June 2017, the range for the target rate stood at 1% to 1.25%.

TERRORISM

Terrorist groups—foreign based: *al-Qa'ida* (AQ): aim(s): drive the US and US influence out of Muslim countries, destabilize the US economy and, ultimately, destroy the US

area(s) of operation: maintains a limited presence; authorities continue to pursue operatives and supporters; on 11 September 2001, 19 operatives hijacked four commercial airliners in the US and took control of the cockpits; the hijackers crashed two planes into the World Trade Center's twin towers in New York City, one plane into the Pentagon in Arlington County, Virginia, and the fourth hijacked plane is thought to have been intended to crash into either the White House or Capitol Building; passengers overpowered the hijackers on the fourth plane that crashed in Stonycreek Township, Somerset County, Pennsylvania; approximately 2,993 people died and over 8,900 more were injured; these coordinated hijackings marked the deadliest terrorist attack to date in the US; on

26 February 1993, operatives detonated a massive VBIED inside the World Trade Center's North Tower in New York City in the US, killing six people and injuring 1,000

TRANSNATIONAL ISSUES

Disputes—international: the US has intensified domestic security measures and is collaborating closely with its neighbors, Canada and Mexico, to monitor and control legal and illegal personnel, transport, and commodities across the international borders; abundant rainfall in recent years along much of the Mexico-US border region has ameliorated periodically strained water-sharing arrangements; 1990 Maritime Boundary Agreement in the Bering Sea still awaits Russian Duma ratification; Canada and the United States dispute how to divide the Beaufort Sea and the status of the Northwest Passage but continue to work cooperatively to survey the Arctic continental shelf; The Bahamas and US have not been able to agree on a maritime boundary; US Naval Base at Guantanamo Bay is leased from Cuba and only mutual agreement or US abandonment of the area can terminate the lease; Haiti claims US-administered Navassa Island; US has made no territorial claim in Antarctica (but has reserved the right to do so) and does not recognize the claims of any other states; Marshall Islands claims Wake Island; Tokelau included American Samoa's Swains Island among the islands listed in its 2006 draft constitution

Refugees and internally displaced persons: *refugees (country of origin):* the US admitted 84,994 refugees during FY2016 including: 16,370 (Democratic Republic of the Congo); 12,587 (Syria); 12,347 (Burma); 9,880 (Iraq); 9,020 (Somalia); 5,817 (Bhutan); 3,750 (Iran)

note: more than 46,000 Venezuelans have claimed asylum since 2014 because of the economic and political crisis (2017)

Illicit drugs: world's largest consumer of cocaine (shipped from Colombia through Mexico and the Caribbean), Colombian heroin, and Mexican heroin and marijuana; major consumer of ecstasy and Mexican methamphetamine; minor consumer of high-quality Southeast Asian heroin; illicit producer of cannabis, marijuana, depressants, stimulants, hallucinogens, and methamphetamine; money-laundering center

**UNITED STATES PACIFIC ISLAND WILDLIFE
REFUGES**

INTRODUCTION

Background: All of the following US Pacific island territories except Midway Atoll constitute the Pacific Remote Islands National Wildlife Refuge (NWR) Complex and as such are managed by the Fish and Wildlife Service of the US Department of the Interior.

Midway Atoll NWR has been included in a Refuge Complex with the Hawaiian Islands NWR and also designated as part of Papahānaumokuākea Marine National Monument. These remote refuges are the most widespread collection of marine- and terrestrial-life protected areas on the planet under a single country's jurisdiction. They sustain many endemic species including corals, fish, shellfish, marine mammals, seabirds, water birds, land birds, insects, and vegetation not found elsewhere.

Baker Island: The US took possession of the island in 1857. Its guano deposits were mined by US and British companies during the second half of the 19th century. In 1935, a short-lived attempt at colonization began on this island but was disrupted by World War II and thereafter abandoned. The island was established as a NWR in 1974.

Howland Island: Discovered by the US early in the 19th century, the uninhabited atoll was officially claimed by the US in 1857. Both US and British companies mined for guano deposits until about 1890. In 1935, a short-lived attempt at colonization began on this island, similar to the effort on nearby Baker Island, but was disrupted by World War II and thereafter abandoned. The famed American aviatrix Amelia EARHART disappeared while seeking out Howland Island as a refueling stop during her 1937 round-the-world flight; Earhart Light, a day beacon near the middle of the west coast, was named in her memory. The island was established as a NWR in 1974.

Jarvis Island: First discovered by the British in 1821, the uninhabited island was annexed by the US in 1858 but abandoned in 1879 after tons of guano had been removed. The UK annexed the island in 1889 but never carried out plans for further exploitation. The US occupied and reclaimed the island in 1935. It was abandoned in 1942 during World War II. The island was established as a NWR in 1974.

Johnston Atoll: Both the US and the Kingdom of Hawaii annexed Johnston Atoll in 1858, but it was the US that mined the guano deposits until the late 1880s. Johnston and Sand Islands were designated wildlife refuges in 1926. The US Navy took over the atoll in 1934. Subsequently, the US Air Force assumed control in 1948. The site was used for high-altitude nuclear tests in the 1950s and 1960s. Until late in 2000 the atoll was maintained as a storage and disposal site for chemical weapons. Munitions destruction,

cleanup, and closure of the facility were completed by May 2005. The Fish and Wildlife Service and the US Air Force are currently discussing future management options; in the interim, Johnston Atoll and the three-mile Naval Defensive Sea around it remain under the jurisdiction and administrative control of the US Air Force.

Kingman Reef: The US annexed the reef in 1922. Its sheltered lagoon served as a way station for flying boats on Hawaii-to-American Samoa flights during the late 1930s. There are no terrestrial plants on the reef, which is frequently awash, but it does support abundant and diverse marine fauna and flora. In 2001, the waters surrounding the reef out to 12 nm were designated a NWR.

Midway Islands: The US took formal possession of the islands in 1867. The laying of the transpacific cable, which passed through the islands, brought the first residents in 1903. Between 1935 and 1947, Midway was used as a refueling stop for transpacific flights. The US naval victory over a Japanese fleet off Midway in 1942 was one of the turning points of World War II. The islands continued to serve as a naval station until closed in 1993. Today the islands are a NWR and are the site of the world's largest Laysan albatross colony.

Palmyra Atoll: The Kingdom of Hawaii claimed the atoll in 1862, and the US included it among the Hawaiian Islands when it annexed the archipelago in 1898. The Hawaii Statehood Act of 1959 did not include Palmyra Atoll, which is now partly privately owned by the Nature Conservancy with the rest owned by the Federal government and managed by the US Fish and Wildlife Service. These organizations are managing the atoll as a wildlife refuge. The lagoons and surrounding waters within the 12-nm US territorial seas were transferred to the US Fish and Wildlife Service and designated a NWR in January 2001.

Kingman Reef: wet or awash most of the time, maximum elevation of less than 2 m makes Kingman Reef a maritime hazard

Midway Islands, Johnston, and Palmyra Atolls: NA

Environment—current issues: Baker, Howland, and Jarvis Islands, and Johnston Atoll: no natural freshwater resources

Kingman Reef: none

Midway Islands and Palmyra Atoll: NA

Geography—note: Baker, Howland, and Jarvis Islands: scattered vegetation consisting of grasses, prostrate vines, and low growing shrubs; primarily a nesting, roosting, and foraging habitat for seabirds, shorebirds, and marine wildlife; closed to the public

Johnston Atoll: Johnston Island and Sand Island are natural islands, which have been expanded by coral dredging; North Island (Akau) and East Island (Hikina) are manmade islands formed from coral dredging; the egg-shaped reef is 34 km in circumference; closed to the public

Kingman Reef: barren coral atoll with deep interior lagoon; closed to the public

Midway Islands: a coral atoll managed as a National Wildlife Refuge and open to the public for wildlife-related recreation in the form of wildlife observation and photography

Palmyra Atoll: the high rainfall and resulting lush vegetation make the environment of this atoll unique among the US Pacific Island

territories; supports a large undisturbed stand of *Pisonia* beach forest

PEOPLE AND SOCIETY

Population: no indigenous inhabitants

note: public entry is only by special-use permit from US Fish and Wildlife Service and generally restricted to scientists and educators; visited annually by US Fish and Wildlife Service

Jarvis Island: Millersville settlement on western side of island occasionally used as a weather station from 1935 until World War II, when it was abandoned; reoccupied in 1957 during the International Geophysical Year by scientists who left in 1958; currently unoccupied

Johnston Atoll: in previous years, an average of 1,100 US military and civilian contractor personnel were present; as of May 2005, all US Government personnel had left the island

Midway Islands: approximately 40 people make up the staff of US Fish and Wildlife Service and their services contractor living at the atoll

Palmyra Atoll: four to 20 Nature Conservancy, US Fish and Wildlife staff, and researchers

URUGUAY

INTRODUCTION

Background: Montevideo, founded by the Spanish in 1726 as a military stronghold, soon took advantage of its natural harbor to become an important commercial center. Claimed by Argentina but annexed by Brazil in 1821, Uruguay declared its independence four years later and secured its freedom in 1828 after a three-year struggle. The administrations of President Jose BATLLE in the early 20th century launched widespread political, social, and economic reforms that established a statist tradition. A violent Marxist urban guerrilla movement named the Tupamaros, launched in the late 1960s, led Uruguay's president to cede control of the government to the military in 1973. By yearend, the rebels had been crushed, but the military continued to expand its hold over the government. Civilian rule was restored in 1985. In 2004, the left-of-center Frente Amplio Coalition won national elections that effectively ended 170 years of political control previously held by the Colorado and National (Blanco) parties. Uruguay's political and labor conditions are among the freest on the continent.

Population—distribution: most of the country's population resides in the southern half of the country; approximately 80% of the populace is urban, living in towns or cities; nearly half of the population lives in and around the capital of Montevideo

Natural hazards: seasonally high winds (the pampero is a chilly and occasional violent wind that blows north from the Argentine pampas), droughts, floods; because of the absence of mountains, which act as weather barriers, all locations are particularly vulnerable to rapid changes from weather fronts

Environment—current issues: water pollution from meat packing/tannery industry; inadequate solid/hazardous waste disposal

Demographic profile: Uruguay rates high for most development indicators and is known for its secularism, liberal social laws, and well-developed social security, health, and educational systems. It is one of the few countries in Latin America and the Caribbean where the entire population has access to clean water. Uruguay's provision of free primary through university education has contributed to the country's high levels of literacy and educational attainment. However, the emigration of human capital has diminished the

state's return on its investment in education. Remittances from the roughly 18% of Uruguayans abroad amount to less than 1 percent of national GDP. The emigration of young adults and a low birth rate are causing Uruguay's population to age rapidly.

In the 1960s, Uruguayans for the first time emigrated en masse—primarily to Argentina and Brazil—because of economic decline and the onset of more than a decade of military dictatorship. Economic crises in the early 1980s and 2002 also triggered waves of emigration, but since 2002 more than 70% of Uruguayan emigrants have selected the US and Spain as destinations because of better job prospects. Uruguay had a tiny population upon its independence in 1828 and welcomed thousands of predominantly Italian and Spanish immigrants, but the country has not experienced large influxes of new arrivals since the aftermath of World War II. More recent immigrants include Peruvians and Arabs.

Flag description: nine equal horizontal stripes of white (top and bottom) alternating with blue; a white square in the upper hoist-side corner with a yellow sun bearing a human face (delineated in black) known as the Sun of May with 16 rays that alternate between triangular and wavy; the stripes represent the nine original departments of Uruguay; the sun symbol evokes the legend of the sun breaking through the clouds on 25 May 1810 as independence was first declared from Spain (Uruguay subsequently won its independence from Brazil); the sun features are said to represent those of Inti, the Inca god of the sun

note: the banner was inspired by the national colors of Argentina and by the design of the US flag

National symbol(s): Sun of May (a sun-with-face symbol); national colors: blue, white, yellow

National anthem: name: “Himno Nacional” (National Anthem of Uruguay)

lyrics/music: Francisco Esteban ACUNA de Figueroa/Francisco Jose DEBALI

note: adopted 1848; the anthem is also known as “Orientales, la Patria o la tumba!” (“Uruguayans, the Fatherland or Death!”); it is the world’s longest national anthem in terms of music (105 bars; almost five minutes); generally only the first verse and chorus are sung

ECONOMY

Economy—overview: Uruguay has a free market economy characterized by an export-oriented agricultural sector, a well-educated workforce, and high levels of social spending. Uruguay has sought to expand trade within the Common Market of the South (Mercosur) and with non-Mercosur members, and President VAZQUEZ has maintained his predecessor’s mix of pro-market policies and a strong social safety net.

Following financial difficulties in the late 1990s and early 2000s, Uruguay’s economic growth averaged 8% annually during the period 2004-08. The 2008-09 global financial crisis put a brake on Uruguay’s vigorous growth, which decelerated to 2.6% in 2009. Nevertheless, the country managed to avoid a recession and keep positive growth rates, mainly through higher public expenditure and investment; GDP growth reached 8.9% in 2010 but slowed markedly in the period 2012-16 as a result of a renewed slowdown in the global economy and in Uruguay’s main trade partners and Mercosur counterparts, Argentina and Brazil. Reforms in those countries should give Uruguay an economic boost. Growth picked up in 2017.

TRANSNATIONAL ISSUES

Disputes—international: in 2010, the ICJ ruled in favor of Uruguay's operation of two paper mills on the Uruguay River, which forms the border with Argentina; the two countries formed a joint pollution monitoring regime; uncontested boundary dispute between Brazil and Uruguay over Braziliera/Brasiliera Island in the Quaraí/Cuareim River leaves the tripoint with Argentina in question; smuggling of firearms and narcotics continues to be an issue along the Uruguay-Brazil border

Illicit drugs: small-scale transit country for drugs mainly bound for Europe, often through sea-borne containers; law enforcement corruption; money laundering because of strict banking secrecy laws; weak border control along Brazilian frontier; increasing consumption of cocaine base and synthetic drugs

UZBEKISTAN

INTRODUCTION

Background: Russia conquered the territory of present-day Uzbekistan in the late 19th century. Stiff resistance to the Red Army after the Bolshevik Revolution was eventually suppressed and a socialist republic established in 1924. During the Soviet era, intensive production of “white gold” (cotton) and grain led to overuse of agrochemicals and the depletion of water supplies, which have left the land degraded and the Aral Sea and certain rivers half dry. Independent since 1991 upon the dissolution of the USSR, the country has reduced its dependence on the cotton monoculture by diversifying agricultural production while developing its mineral and petroleum export capacity and increasing its manufacturing base. Uzbekistan’s first president, Islom KARIMOV, led Uzbekistan for 25 years until his death in September 2016. The political transition to his successor, then-Prime Minister Shavkat MIRZIYOYEV was peaceful, but sidelined the constitutional process where the chairman of the Senate would have served as the acting president. MIRZIYOYEV, who won the presidential election in December 2016, has improved relations with Uzbekistan’s neighbors and introduced wide-ranging economic and judicial reforms.

Flag description: three equal horizontal bands of blue (top), white, and green separated by red fimbriations with a white crescent moon (closed side to the hoist) and 12 white stars shifted to the hoist on the top band; blue is the color of the Turkic peoples and of the sky, white signifies peace and the striving for purity in thoughts and deeds, while green represents nature and is the color of Islam; the red stripes are the vital force of all living organisms that links good and pure ideas with the eternal sky and with deeds on earth; the crescent represents Islam and the 12 stars the months and constellations of the Uzbek calendar

National symbol(s): khumo (mythical bird); national colors: blue, white, red, green

National anthem: name: "O'zbekiston Respublikasining Davlat Madhiyasi" (National Anthem of the Republic of Uzbekistan)

lyrics/music: Abdulla ARIPOV/Mutal BURHANOV

note: adopted 1992; after the fall of the Soviet Union, Uzbekistan kept the music of the anthem from its time as a Soviet Republic but adopted new lyrics

ECONOMY

Economy—overview: Uzbekistan is a doubly landlocked country in which 51% of the population lives in urban settlements; the agriculture-rich Fergana Valley, in which Uzbekistan's eastern borders are situated, has been counted among the most densely populated parts of Central Asia. Since its independence in September 1991, the government has largely maintained its Soviet-style command economy with subsidies and tight controls on production, prices, and access to foreign currency. Despite ongoing efforts to diversify crops, Uzbek agriculture remains largely

centered on cotton; Uzbekistan is the world's fifth-largest cotton exporter and seventh-largest producer. Uzbekistan's growth has been driven primarily by state-led investments, and export of natural gas, gold, and cotton provides a significant share of foreign exchange earnings.

Recently, lower global commodity prices and economic slowdowns in neighboring Russia and China have hurt Uzbekistan's trade and investment and worsened its foreign currency shortage. Aware of the need to improve the investment climate, the government is taking incremental steps to reform the business sector and address impediments to foreign investment in the country. Since the death of first President Islam KARIMOV and election of President Shavkat MIRZIYOYEV, emphasis on such initiatives and government efforts to improve the private sector have increased. In the past, Uzbek authorities accused US and other foreign companies operating in Uzbekistan of violating Uzbek laws and have frozen and seized their assets.

As a part of its economic reform efforts, the Uzbek Government is looking to expand opportunities for small and medium enterprises and prioritizes increasing foreign direct investment. In September 2017, the government devalued the official currency rate by almost 50% and announced the loosening of currency restrictions to eliminate the currency black market, increase access to hard currency, and boost investment.

domestic: the state-owned telecommunications company, Uzbeektelecom, owner of the fixed-line telecommunications system, has used loans from the Japanese government and the China Development Bank to upgrade fixed-line services including conversion to digital exchanges; mobile-cellular services are provided by three private and two state-owned operators with a

total subscriber base of 23 million as of mid-2016

international: country code—998; linked by fiber-optic cable or microwave radio relay with CIS member states and to other countries by leased connection via the Moscow international gateway switch; the country also has a link to the Trans-Asia-Europe (TAE) fiber-optic cable; Uzbekistan has supported the national fiber-optic backbone project of Afghanistan since 2008 (2016)

Broadcast media: government controls media; 18 state-owned broadcasters—14 TV and 4 radio—provide service to virtually the entire country; about 20 privately owned TV stations, overseen by local officials, broadcast to local markets; privately owned TV stations are required to lease transmitters from the government-owned Republic TV and Radio Industry Corporation; in 2013, the government closed TV and radio broadcasters affiliated with the National Association of Electronic Mass Media (NAEMM) of Uzbekistan, a government-sponsored NGO for private broadcast media; in 2015, the NAEMM relaunched its TV channel under a different name (2017)

MILITARY AND SECURITY

Military branches: Armed Forces: Army, Air and Air Defense Forces, National Guard (2017)

Military service age and obligation: 18 years of age for compulsory military service; 1-month or 1-year conscript service obligation for males; moving toward a professional military, but conscription in some form will continue; the military cannot accommodate everyone who wishes to enlist, and competition for entrance into the military is similar to the competition for admission to universities; note—widely considered to have one of the strongest militaries in Central Asia, although it is untested (2016)

TERRORISM

Terrorist groups—foreign based: Islamic Jihad Union (IJU): aim(s): overthrow the Government of Uzbekistan

area(s) of operation: maintains a limited operational presence; IJU's attack tempo diminished after suicide bombers conducted three simultaneous lethal explosions in Tashkent on 30 July 2004 aimed at the US and Israeli embassies and the Uzbek chief prosecutor's headquarters; two Uzbek security guards at the Israeli Embassy

were killed; the bombings occurred as the trial began for 15 IJU operatives accused in a wave of attacks in the spring of 2004 that killed approximately 50 people in the first known cases of suicide bombings in Central Asia

Islamic Movement of Uzbekistan (IMU): *aim(s):* overthrow the Uzbekistan and Kyrgyzstan Governments and establish an Islamic state in the Fergana Valley, a fertile valley in eastern Uzbekistan, southern Kyrgyzstan, and northern Tajikistan

area(s) of operation: maintains a limited operational presence; attack tempo against government personnel and facilities has diminished dramatically since 2015

TRANSNATIONAL ISSUES

Disputes—international: prolonged drought and cotton monoculture in Uzbekistan and Turkmenistan created water-sharing difficulties for Amu Darya river states; field demarcation of the boundaries with Kazakhstan commenced in 2004; border delimitation of 130 km of border with Kyrgyzstan is hampered by serious disputes around enclaves and other areas

Refugees and internally displaced persons: stateless persons: 86,524 (2016)

Trafficking in persons: current situation: Uzbekistan is a source country for men, women, and children subjected to forced labor and women and children subjected to sex trafficking; government-compelled forced labor of adults remained endemic during the 2014 cotton harvest; despite a decree banning the use of persons under 18, children were mobilized to harvest cotton by local officials in some districts; in some regions, local officials forced teachers, students, private business employees, and others to work in construction, agriculture, and cleaning parks; Uzbekistani women and children are victims of sex trafficking domestically and in the Middle East, Eurasia, and Asia; Uzbekistani men and, to a lesser extent, women are subjected to forced labor in Kazakhstan, Russia, and Ukraine in the construction, oil, agriculture, retail, and food sectors

tier rating: Tier 2 Watch List—Uzbekistan does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; law enforcement efforts in 2014 were mixed; the government made efforts to combat

sex and transnational labor trafficking, but government-compelled forced labor of adults in the cotton harvest went unaddressed, and the decree prohibiting forced child labor was not applied universally; official complicity in human trafficking in the cotton harvest remained prevalent; authorities made efforts to identify and protect sex and transnational labor victims, although a systematic process is still lacking; minimal efforts were made to assist victims of forced labor in the cotton harvest, as the government does not openly acknowledge the existence of this forced labor; the ILO did not have permission or funding to monitor the 2014 harvest, but the government authorized the UN's International Labour Organization to conduct a survey on recruitment practices and working conditions in agriculture, particularly the cotton sector, and to monitor the 2015-17 cotton harvests for child and forced labor in project areas (2015)

Illicit drugs: transit country for Afghan narcotics bound for Russian and, to a lesser extent, Western European markets; limited illicit cultivation of cannabis and small amounts of opium poppy for domestic consumption; poppy cultivation almost wiped out by government crop eradication program; transit point for heroin precursor chemicals bound for Afghanistan

VANUATU

INTRODUCTION

Background: Multiple waves of colonizers, each speaking a distinct

language, migrated to the New Hebrides in the millennia preceding European exploration in the 18th century. This settlement pattern accounts for the complex linguistic diversity found on the archipelago to this day. The British and French, who settled the New Hebrides in the 19th century, agreed in 1906 to an Anglo-French Condominium, which administered the islands until independence in 1980, when the new name of Vanuatu was adopted.

GEOGRAPHY

Location: Oceania, group of islands in the South Pacific Ocean, about three-quarters of the way from Hawaii to Australia

Geographic coordinates: 16 00 S, 167 00 E

Map references: Oceania

Area: *total:* 12,189 sq km

land: 12,189 sq km

water: 0 sq km

note: includes more than 80 islands, about 65 of which are inhabited

country comparison to the world: 163

Area—comparative: slightly larger than Connecticut

Land boundaries: 0 km

Coastline: 2,528 km

Maritime claims: measured from claimed archipelagic baselines

territorial sea: 12 nm

contiguous zone: 24 nm

exclusive economic zone: 200 nm

continental shelf: 200 nm or to the edge of the continental margin

Climate: tropical; moderated by southeast trade winds from May to October; moderate rainfall from November to April; may be affected by cyclones from December to April

Terrain: mostly mountainous islands of volcanic origin; narrow coastal plains

Elevation: *mean elevation:* NA

elevation extremes: *lowest point:* Pacific Ocean 0 m

highest point: Tabwemasana 1,877 m

Natural resources: manganese, hardwood forests, fish

ECONOMY

Economy—overview: This South Pacific island economy is based primarily on small-scale agriculture, which provides a living for about two-thirds of the population. Fishing, offshore financial services, and tourism, with nearly 350,000 visitors in 2016, are other mainstays of the economy. Tourism has struggled after Efate, the most populous and popular island for tourists, was damaged by Tropical Cyclone Pam in 2015. Ongoing infrastructure difficulties at Port Vila’s Bauerfield Airport have caused air travel disruptions, further hampering tourism numbers. Australia and New Zealand are the main source of tourists and foreign aid. A small light industry sector caters to the local market. Tax revenues come mainly from import duties. Mineral deposits are negligible; the country has no known petroleum deposits.

Economic development is hindered by dependence on relatively few commodity exports, vulnerability to natural disasters, and long distances from main markets and between constituent islands. In response to foreign concerns, the government has promised to tighten regulation of its offshore financial center.

Since 2002, the government has stepped up efforts to boost tourism through improved air connections, resort development, and cruise ship facilities. Agriculture, especially livestock farming, is a second target for growth.

VENEZUELA

INTRODUCTION

Background: Venezuela was one of three countries that emerged from the collapse of Gran Colombia in 1830 (the others being Ecuador and New Granada, which became Colombia). For most of the first half of the 20th century, Venezuela was ruled by generally benevolent military strongmen who promoted the oil industry and allowed for some social reforms. Democratically elected governments have held sway since 1959. Under Hugo CHAVEZ, president from 1999 to 2013, and his hand-picked successor, President Nicolas MADURO, the executive branch has exercised increasingly authoritarian control over other branches of

government. At the same time, democratic institutions have deteriorated, freedoms of expression and the press have been curtailed, and political polarization has grown. The ruling party's economic policies have expanded the state's role in the economy through expropriations of major enterprises, strict currency exchange and price controls that discourage private sector investment and production, and overdependence on the petroleum industry for revenues, among others. Current concerns include: human rights abuses, rampant violent crime, high inflation, and widespread shortages of basic consumer goods, medicine, and medical supplies.

Languages: Spanish (official), numerous indigenous dialects

Religions: nominally Roman Catholic 96%, Protestant 2%, other 2%

Demographic profile: Social investment in Venezuela during the CHAVEZ administration reduced poverty from nearly 50% in 1999 to about 27% in 2011, increased school enrollment, substantially decreased infant and child mortality, and improved access to potable water and sanitation through social investment. “Missions” dedicated to education, nutrition, healthcare, and sanitation were funded through petroleum revenues. The sustainability of this progress remains questionable, however, as the continuation of these social programs depends on the prosperity of Venezuela’s oil industry. In the long-term, education and health care spending may increase economic growth and reduce income inequality, but rising costs and the staffing of new health care jobs with foreigners are slowing development.

While CHAVEZ was in power, more than one million predominantly middle- and upper-class Venezuelans are estimated to have emigrated. The brain drain is attributed to a repressive political system, lack of economic opportunities, steep inflation, a high crime rate, and corruption. Thousands of oil engineers emigrated to Canada, Colombia, and the United States following CHAVEZ’s firing of over 20,000 employees of the state-owned petroleum company during a 2002-03 oil strike. Additionally, thousands of Venezuelans of European descent have taken up residence in their ancestral homelands. Nevertheless, Venezuela has attracted hundreds of thousands of immigrants from South America and southern Europe because of its lenient migration policy and the availability of education and health care. Venezuela also has been a fairly accommodating host to Colombian refugees, numbering about 170,000 as of year-end 2016. However, since 2014, falling oil prices have driven a major economic crisis that has pushed Venezuelans from all walks of life to migrate or to seek asylum abroad to escape severe shortages of food, water, and medicine; soaring inflation; unemployment; and violence. Tens of thousands of Venezuelans have migrated, often illegally, to Colombia, Brazil, Mexico, Panama, Chile, Guyana, the Dominican Republic, or taken perilous journeys by raft to Aruba and Curacao. Asylum applications increased

significantly in the US and Brazil in 2016 and 2017. Although several receiving countries are making efforts to increase immigration restrictions and to deport illegal Venezuelan migrants, Venezuelans continue to migrate to avoid economic collapse at home.

Flag description: three equal horizontal bands of yellow (top), blue, and red with the coat of arms on the hoist side of the yellow band and an arc of eight white five-pointed stars centered in the blue band; the flag retains the three equal horizontal bands and three main colors of the banner of Gran Colombia, the South American republic that broke up in 1830; yellow is interpreted as standing for

the riches of the land, blue for the courage of its people, and red for the blood shed in attaining independence; the seven stars on the original flag represented the seven provinces in Venezuela that united in the war of independence; in 2006, then President Hugo CHAVEZ ordered an eighth star added to the star arc—a decision that sparked much controversy—to conform with the flag proclaimed by Simon Bolivar in 1827 and to represent the historic province of Guayana

National symbol(s): troupial (bird); national colors: yellow, blue, red

National anthem: name: “Gloria al bravo pueblo” (Glory to the Brave People)

lyrics/music: Vicente SALIAS/Juan Jose LANDAETA

note: adopted 1881; lyrics written in 1810, the music some years later; both SALIAS and LANDAETA were executed in 1814 during Venezuela’s struggle for independence

ECONOMY

Economy—overview: Venezuela remains highly dependent on oil revenues, which account for almost all export earnings and nearly half of the government’s revenue. In 2017, GDP contracted 12%, inflation exceeded 650%, people faced widespread shortages of consumer goods, the exchange rate tumbled, and central bank international reserves dwindled. On the other hand, Venezuela managed to pay down its external debt and narrow its current account deficit. Domestic production and industry continues to severely underperform and the Venezuelan government continues to rely on imports to meet its basic food and consumer goods needs.

Falling oil prices since 2014 have aggravated Venezuela’s economic crisis. Insufficient access to dollars, price controls, and rigid labor regulations have led some US and multinational firms to reduce or shut down their Venezuelan operations. Market uncertainty and state oil company PDVSA’s poor cash flow have slowed investment in the petroleum sector, resulting in a decline in oil production.

Under President Nicolas MADURO, the Venezuelan Government’s response to the economic crisis has been to increase state control over the economy and blame the private sector for the shortages. MADURO has ceded increasing authority for the production and

distribution of scarce goods to the military and to local socialist party member committees. The Venezuelan Government has maintained strict currency controls since 2003. On 17 February 2016, the Venezuelan Government announced a change from three official currency exchange mechanisms to only two official rates for the sale of dollars to private-sector firms and individuals, with rates based on the government's import priorities. The official exchange rate used for food and medicine imports was devalued to 10 bolivars per dollar from 6.3 bolivars per dollar. The second rate moved to a managed float. These currency controls present significant obstacles to trade with Venezuela because importers cannot obtain sufficient dollars to purchase goods needed to maintain their operations. Meting out access to the multiple exchange rates has created opportunities for arbitrage and corruption. MADURO has used decree powers to enact legislation to deepen the state's role as the primary buyer and distributor of imports, further tighten currency controls, cap business profits, and extend price controls.

Military branches: Bolivarian National Armed Forces (Fuerza Armada Nacional Bolivariana, FANB): Bolivarian Army (Ejercito Bolivariano, EB), Bolivarian Navy (Armada Bolivariana, AB; includes Naval Infantry, Coast Guard, Naval Aviation), Bolivarian Military Aviation (Aviacion Militar Bolivariana, AMB; includes Air National Guard), Bolivarian National Guard (Guardia Nacional Bolivaria, GNB), Bolivarian Militia (Milicia Bolivariana, NMB) (2016)

Military service age and obligation: all citizens of military service age (18-60 years old) are obligated to register for military service, though mandatory recruitment is forbidden; the minimum service obligation is 12 months (2016)

Maritime threats: the International Maritime Bureau continues to report the territorial and offshore waters in the Caribbean Sea as at risk for piracy and armed robbery against ships; numerous vessels, including commercial shipping and pleasure craft, have been attacked and hijacked both at anchor and while underway; crews have been robbed and stores or cargoes stolen; in 2016, there were five attacks reported and this increased to six attacks in the first half of 2017 making Venezuela the fourth most dangerous area in the World

TERRORISM

Terrorist groups—foreign based: National Liberation Army (Ejercito de Liberacion Nacional, ELN): aim(s): enhance its narcotics trafficking networks in Venezuela

area(s) of operation: maintains a narcotics trafficking presence, facilitating the transshipment of narcotics through the country; has a history of transporting and holding hostages in Venezuela who were abducted in Colombia

TRANSNATIONAL ISSUES

Disputes—international: claims all of the area west of the Essequibo River in Guyana, preventing any discussion of a maritime boundary; Guyana has expressed its intention to join Barbados in

asserting claims before the UN Convention on the Law of the Sea that Trinidad and Tobago's maritime boundary with Venezuela extends into their waters; dispute with Colombia over maritime boundary and Venezuelan administered Los Monjes Islands near the Gulf of Venezuela; Colombian organized illegal narcotics and paramilitary activities penetrate Venezuela's shared border region; US, France, and the Netherlands recognize Venezuela's granting full effect to Aves Island, thereby claiming a Venezuelan Economic Exclusion Zone/continental shelf extending over a large portion of the eastern Caribbean Sea; Dominica, Saint Kitts and Nevis, Saint Lucia, and Saint Vincent and the Grenadines protest Venezuela's full effect claim

Refugees and internally displaced persons: refugees (country of origin): 171,920 (Colombia) (2016)

Trafficking in persons: current situation: Venezuela is a source and destination country for men, women, and children subjected to sex trafficking and forced labor; Venezuelan women and girls, sometimes lured from poor interior regions to urban and tourist areas, are trafficked for sexual exploitation within the country, as well as in the Caribbean; Venezuelan children are exploited, frequently by their families, in domestic servitude; people from South America, the Caribbean, Asia, and Africa are sex and labor trafficking victims in Venezuela; thousands of Cuban citizens, particularly doctors, who work in Venezuela on government social programs in exchange for the provision of resources to the Cuban Government experience conditions of forced labor

tier rating: Tier 3—Venezuela does not fully comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so; in 2014, the government appeared to increase efforts to hold traffickers criminally accountable, but a lack of government data made anti-trafficking law enforcement efforts difficult to assess; publically available information indicated many cases pursued under anti-trafficking law involved illegal adoption rather than sex and labor trafficking; authorities identified a small number of trafficking victims, and victim referrals to limited government services were made on an ad hoc basis; because no specialized facilities are available for trafficking victims, women and child victims accessed centers for victims of domestic violence or at-risk youth, and services for men

were virtually non-existent; NGOs provided some services to sex and labor trafficking victims; Venezuela has no permanent anti-trafficking interagency body, no national anti-trafficking plan, and still has not passed anti-trafficking legislation drafted in 2010 (2015)

Illicit drugs: small-scale illicit producer of opium and coca for the processing of opiates and coca derivatives; however, large quantities of cocaine, heroin, and marijuana transit the country from Colombia bound for US and Europe; significant narcotics-related money-laundering activity, especially along the border with Colombia and on Margarita Island; active eradication program primarily targeting opium; increasing signs of drug-related activities by Colombian insurgents on border

VIETNAM

INTRODUCTION

Background: The conquest of Vietnam by France began in 1858

and was completed by 1884. It became part of French Indochina in 1887. Vietnam declared independence after World War II, but France continued to rule until its 1954 defeat by communist forces under Ho Chi MINH. Under the Geneva Accords of 1954, Vietnam was divided into the communist North and anti-communist South. US economic and military aid to South Vietnam grew through the 1960s in an attempt to bolster the government, but US armed forces were withdrawn following a cease-fire agreement in 1973. Two years later, North Vietnamese forces overran the South reuniting the country under communist rule. Despite the return of peace, for over a decade the country experienced little economic growth because of conservative leadership policies, the persecution and mass exodus of individuals—many of them successful South Vietnamese merchants—and growing international isolation. However, since the enactment of Vietnam’s “doi moi” (renovation) policy in 1986, Vietnamese authorities have committed to increased economic liberalization and enacted structural reforms needed to modernize the economy and to produce more competitive, export-driven industries. The communist leaders maintain tight control on political expression but have demonstrated some modest steps toward better protection of human rights. The country continues to experience small-scale protests, the vast majority connected to either land-use issues, calls for increased political space, or the lack of equitable mechanisms for resolving disputes. The small-scale protests in the urban areas are often organized by human rights activists, but many occur in rural areas and involve various ethnic minorities such as the Montagnards of the Central Highlands, Hmong in the Northwest Highlands, and the Khmer Krom in the southern delta region.

ECONOMY

Economy—overview: Vietnam is a densely populated developing country that has been transitioning since 1986 from the rigidities of

a centrally planned, highly agrarian economy to a more industrial and market based economy, and it has raised incomes substantially. In 2016 and 2017, Vietnam missed its yearly growth target of 6.7% due to environmental issues—drought and salinization—impacting the agricultural sector, and low oil prices affecting the extractive sector. However, annual GDP growth reached 6.3%, reflecting strengthening domestic demand and strong manufacturing exports.

Vietnam has a young population, stable political system, commitment to sustainable growth, relatively low inflation, stable currency, strong FDI inflows, and strong manufacturing sector. In addition, the country is committed to continuing its global economic integration. Vietnam joined the WTO in January 2007 and concluded several free trade agreements in 2015-16, including the EU-Vietnam Free Trade Agreement, the Korean Free Trade Agreement, and the Eurasian Economic Union Free Trade Agreement. In 2017, Vietnam successfully chaired the Asia-Pacific Economic Cooperation (APEC) Conference with its key priorities including inclusive growth, innovation, strengthening small and medium enterprises, food security and climate change. Seeking to diversify its opportunities, Vietnam also continued to pursue other multilateral relationships, including the Comprehensive and Progressive Agreement for the Transpacific Partnership and the Regional Comprehensive Economic Partnership.

To continue its trajectory of strong economic growth, the government acknowledges the need to spark a second wave' of reforms, including reforming state-owned-enterprises, reducing red tape, increasing business sector transparency, reducing the level of non-performing loans in the banking sector, and increasing financial sector transparency. Vietnam's public debt to GDP ratio is nearing the government mandated ceiling of 65%.

In 2016, Vietnam cancelled its civilian nuclear energy development program, citing public concerns about safety and the high cost of the program; it faces growing pressure on energy infrastructure. Overall, the country's infrastructure fails to meet the needs of an expanding middle class. Vietnam has demonstrated a commitment to sustainable growth over the last several years, but the recent slowdown in economic growth could test the government's resolve.

Military service age and obligation: 18-25 years of age for male compulsory and voluntary military service; females may volunteer for active duty military service; conscription typically takes place twice annually and service obligation is 18 months (Army, Air Defense), 2 years (Navy and Air Force); 18-45 years of age (male) or 18-40 years of age (female) for Militia Force or Self Defense Force service; males may enroll in military schools at age 17 (2013)

Maritime threats: the International Maritime Bureau reports the

territorial and offshore waters in the South China Sea as high risk for piracy and armed robbery against ships; numerous commercial vessels have been attacked and hijacked both at anchor and while underway; hijacked vessels are often disguised and cargo diverted to ports in East Asia; crews have been murdered or cast adrift; the number of reported incidents declined from 15 in 2015 to seven in 2016, primarily near the port of Vung Tau

TRANSNATIONAL ISSUES

Disputes—international: southeast Asian states have enhanced border surveillance to check the spread of avian flu; Cambodia and Laos protest Vietnamese squatters and armed encroachments along border; Cambodia accuses Vietnam of a wide variety of illicit cross-border activities; progress on a joint development area with Cambodia is hampered by an unresolved dispute over sovereignty of offshore islands; an estimated 300,000 Vietnamese refugees reside in China; establishment of a maritime boundary with Cambodia is hampered by unresolved dispute over the sovereignty of offshore islands; the decade-long demarcation of the China-Vietnam land boundary was completed in 2009; China occupies the Paracel Islands also claimed by Vietnam and Taiwan; Brunei claims a maritime boundary extending beyond as far as a median with Vietnam, thus asserting an implicit claim to Lousia Reef; the 2002 “Declaration on the Conduct of Parties in the South China Sea” has eased tensions but falls short of a legally binding “code of conduct” desired by several of the disputants; Vietnam continues to expand construction of facilities in the Spratly Islands; in March 2005, the national oil companies of China, the Philippines, and Vietnam signed a joint accord to conduct marine seismic activities in the Spratly Islands; Economic Exclusion Zone negotiations with Indonesia are ongoing, and the two countries in Fall 2011 agreed to work together to reduce illegal fishing along their maritime boundary

Refugees and internally displaced persons: *stateless persons:* 11,000 (2016); note—Vietnam’s stateless ethnic Chinese Cambodian population dates to the 1970s when thousands of Cambodians fled to Vietnam to escape the Khmer Rouge and were no longer recognized as Cambodian citizens; Vietnamese women who gave up their citizenship to marry foreign men have found themselves stateless after divorcing and returning home to Vietnam; the

government addressed this problem in 2009, and Vietnamese women are beginning to reclaim their citizenship

Illicit drugs: minor producer of opium poppy; probable minor transit point for Southeast Asian heroin; government continues to face domestic opium/heroin/methamphetamine addiction problems despite longstanding crackdowns; enforces the death penalty for drug trafficking

VIRGIN ISLANDS

INTRODUCTION

Background: The Danes secured control over the southern Virgin Islands of Saint Thomas, Saint John, and Saint Croix during the 17th and early 18th centuries. Sugarcane, produced by African slave labor, drove the islands' economy during the 18th and early 19th centuries. In 1917, the US purchased the Danish holdings, which had been in economic decline since the abolition of slavery in 1848. On 6 September 2017, Hurricane Irma passed over the

northern Virgin Islands of Saint Thomas and Saint John and inflicted severe damage to structures, roads, the airport on Saint Thomas, communications, and electricity. Less than two weeks later, Hurricane Maria passed over the island of Saint Croix in the southern Virgin Islands, inflicting considerable damage with heavy winds and flooding rains.

Major infectious diseases: note: active local transmission of Zika virus by Aedes species mosquitoes has been identified in this country (as of August 2016); it poses an important risk (a large number of cases possible) among US citizens if bitten by an infective mosquito; other less common ways to get Zika are through sex, via blood transfusion, or during pregnancy, in which the pregnant woman passes Zika virus to her fetus (2016)

GOVERNMENT

Country name: *conventional long form*: United States Virgin Islands

conventional short form: Virgin Islands

former: Danish West Indies

abbreviation: USVI

etymology: the myriad islets, cays, and rocks surrounding the major islands reminded Christopher COLUMBUS in 1493 of Saint Ursula and her 11,000 virgin followers (Santa Ursula y las Once Mil Virgenes), which over time shortened to the Virgins (las Virgenes)

Dependency status: organized, unincorporated territory of the US with policy relations between the Virgin Islands and the US under

the jurisdiction of the Office of Insular Affairs, US Department of the Interior

Government type: presidential democracy; a self-governing territory of the US

Capital: name: Charlotte Amalie

geographic coordinates: 18 21 N, 64 56 W

time difference: UTC-4 (1 hour ahead of Washington, DC, during Standard Time)

Administrative divisions: none (territory of the US); there are no first-order administrative divisions as defined by the US Government, but there are 3 islands at the second order; Saint Croix, Saint John, Saint Thomas

Independence: none (territory of the US)

National holiday: Transfer Day (from Denmark to the US), 31 March (1917)

Constitution: 22 July 1954—the Revised Organic Act of the Virgin Islands functions as a constitution for this territory of the US; revised 1962, 2000 (2016)

Legal system: US common law

Citizenship: see United States

Suffrage: 18 years of age; universal; note— island residents are US citizens but do not vote in US presidential elections

Executive branch: *chief of state:* President Donald J. TRUMP (since 20 January 2017); Vice President Michael R. PENCE (since 20 January 2017)

head of government: Governor Kenneth MAPP (since 5 January 2015), Lieutenant Governor Osbert POTTER (since 5 January 2015)

cabinet: Territorial Cabinet appointed by the governor and confirmed by the Senate

elections/appointments: president and vice president indirectly elected on the same ballot by an Electoral College of ‘electors’ chosen from each state; president and vice president serve a 4-year term (eligible for a second term); under the US Constitution, residents of the Virgin Islands do not vote in elections for US president and vice president; however, they may vote in the Democratic and Republican presidential primary elections; governor and lieutenant governor directly elected on the same ballot by

absolute majority vote in 2 rounds if needed for a 4-year term (eligible for a second term); election last held on 4 November 2014 (next to be held in November 2018)

election results: Kenneth MAPP elected governor in second round; percent of vote—Kenneth MAPP (independent) 63.9%, Donna CHRISTIAN-CHRISTIANSEN (Democratic Party) 36.1%

National anthem: name: “Virgin Islands March”

lyrics/music: multiple/Alton Augustus ADAMS, Sr.

note: adopted 1963; serves as a local anthem; as a territory of the US, “The Star-Spangled Banner” is official (see United States)

ECONOMY

Economy—overview: Tourism, trade, and other services are the primary economic activities, accounting for nearly 60% of the Virgin Island’s GDP and about half of total civilian employment. The islands host nearly 3 million tourists per year, mostly from visiting cruise ships. The islands are vulnerable to damage from storms. The agriculture sector is small, with most food being imported. Industry and government each account for about one-fifth of GDP. The manufacturing sector consists of rum distilling, electronics, pharmaceuticals, and watch assembly. A refinery on St. Croix, one of the world’s largest, processed 350,000 barrels of crude oil a day until it was shut down in February 2012, after operating for 45 years.

Federal programs and grants, totaling \$241.4 million in 2013, contributed 19.7% of the territory’s total revenues. The economy declined in 2013, due to decreases in exports resulting from the loss of refined oil products. Nevertheless, the economy remains relatively diversified. Along with a vibrant tourism industry, rum exports, trade, and services will be major income sources in future years.

WAKE ISLAND

INTRODUCTION

Background: The US annexed Wake Island in 1899 for a cable station. An important air and naval base was constructed in 1940-41. In December 1941, the island was captured by the Japanese and held until the end of World War II. In subsequent years, Wake became a stopover and refueling site for military and commercial aircraft transiting the Pacific. Since 1974, the island's airstrip has been used by the US military, as well as for emergency landings. Operations on the island were temporarily suspended and all personnel evacuated in 2006 with the approach of super typhoon IOKE (category 5), but resultant damage was comparatively minor. A US Air Force repair team restored full capability to the airfield and facilities, and the island remains a

vital strategic link in the Pacific region.

WALLIS AND FUTUNA

INTRODUCTION

Background: The Futuna island group was discovered by the Dutch in 1616 and Wallis by the British in 1767, but it was the French who declared a protectorate over the islands in 1842, and took official control of them between 1886 and 1888. Notably, Wallis and Futuna was the only French colony to side with the Vichy regime during World War II, a phase that ended in May of 1942 with the arrival of 2,000 American troops. In 1959, the inhabitants of the islands voted to become a French overseas territory and officially assumed that status in 1961. In 2003, Wallis and Futuna's designation changed to that of an overseas collectivity.

ECONOMY

Economy—overview: The economy is limited to traditional subsistence agriculture, with 80% of labor force earnings coming from agriculture (coconuts and vegetables), livestock (mostly pigs), and fishing. However, roughly 70% of the labor force is employed in the public sector, although only about 20% of the population is in salaried employment.

Revenues come from French Government subsidies, licensing of fishing rights to Japan and South Korea, import taxes, and remittances from expatriate workers in New Caledonia. France directly finances the public sector and healthcare and education services. It also provides funding for key development projects in a range of areas, including infrastructure, economic development, environmental management, and healthcare facilities.

A key concern for Wallis and Futuna is an aging population with consequent economic development issues. Very few people aged 18-30 live on the islands due to the limited formal employment opportunities. Improving job creation is a current priority for the territorial government.

WEST BANK

INTRODUCTION

Background: From the early 16th century through 1917, the area

now known as the West Bank fell under Ottoman rule. Following World War I, the Allied powers (France, UK, Russia) allocated the area to the British Mandate of Palestine. After World War II, the UN passed a resolution to establish two states within the Mandate, and designated a territory including what is now known as the West Bank as part of the proposed Arab state. During the 1948 Arab-Israeli War, the area was captured by Transjordan (later renamed Jordan). Jordan annexed the West Bank in 1950. In June 1967, Israel captured the West Bank and East Jerusalem during the 1967 Six-Day War. With the exception of East Jerusalem, roughly 60% of the West Bank remains under Israeli military control. Israel transferred security and civilian responsibility for a number of Palestinian-populated areas of the West Bank and Gaza Strip to the Palestinian Authority (PA) under a series of agreements signed between 1993 and 1999, the so-called “Oslo Accords.” Negotiations to determine the permanent status of the West Bank and Gaza Strip stalled after the outbreak of an intifada in mid-2000. In early 2003, the “Quartet” of the US, EU, UN, and Russia, presented a roadmap to a final peace settlement by 2005, calling for two states—Israel and a democratic Palestine.

Following Palestinian leader Yassir ARAFAT’s death in late 2004 and the subsequent election of Mahmud ABBAS (head of the Fatah political faction) as PA president, Israel and the Palestinians agreed to move the peace process forward. Israel in late 2005 unilaterally withdrew all of its settlers and soldiers, dismantled its military facilities in the Gaza Strip, and redeployed its military from several West Bank settlements, but it continues to control maritime, airspace, and other access. In early 2006, the Islamic Resistance Movement, HAMAS, won the Palestinian Legislative Council election and took control of the PA government. Attempts to form a unity government failed, and violent clashes between Fatah and HAMAS supporters ensued, culminating in HAMAS’s violent seizure of all military and governmental institutions in the Gaza Strip. Fatah and HAMAS have made several attempts at reconciliation, but the factions have been unable to implement details on governance and security. In an attempt to reenergize peace talks between the Israelis and Palestinians, France in June 2016 hosted a ministerial meeting that included participants from 29 countries, although not Israel or the Palestinians, to lay the groundwork for an envisioned “multilateral peace conference” later in the year.

GOVERNMENT

Country name: *conventional long form:* none

conventional short form: West Bank

etymology: name refers to the location of the region—occupied and administered by Jordan after 1948—that fell on the far side (west bank) of the Jordan River in relation to Jordan proper; the designation was retained following the 1967 Six-Day War and the subsequent changes in government

ECONOMY

Economy—overview: In 2017, the economic outlook in the West Bank—the larger of the two areas comprising the Palestinian Territories—remained fragile, as security concerns and political friction slowed economic growth. Unemployment in the West Bank remained high at 19.0% in the third quarter of 2017, only slightly better than 19.6% at the same point in the previous year, while the labor force participation rate remained flat, year-on-year.

Longstanding Israeli restrictions on imports, exports, and movement continue to disrupt labor and trade flows and the territory's industrial capacity, and constrain private sector development. The PA's budget benefited from an effort to improve tax collection, coupled with lower spending in 2017, but the PA for the foreseeable future will continue to rely heavily on donor aid for its budgetary needs and infrastructure development.

TERRORISM

Terrorist groups—home based: *Al-Aqsa Martyrs Brigade (AAMB):* *aim(s):* drive the Israeli military and Jewish settlers from the West Bank, impel Israelis to leave Jerusalem and, ultimately, establish a Palestinian state comprising the West Bank, Gaza Strip, and Jerusalem

area(s) of operation: headquartered in the West Bank, where AAMB is operationally active targeting Israeli soldiers and Israeli civilians living in Jewish settlements in the West Bank; estimated in 2015 to have a few hundred members, who operate in small decentralized cells, with each cell reporting to a local leader

Terrorist groups—foreign based: *Army of Islam (AOI):* *aim(s):* enhance its networks in the West Bank and, ultimately, establish an Islamic caliphate

area(s) of operation: maintains a limited operational presence

HAMAS: *aim(s):* bolster recruitment networks in the West Bank and, ultimately, destroy the state of Israel

area(s) of operation: actively recruits youths and grooms young school children to embrace the group's ideology; in late 2016, an Islamic faction identified with HAMAS was known to recruit at the al-Quds University in Abu Dis, a Palestinian town in the Jerusalem Governorate bordering Israeli-controlled Jerusalem

Kahane Chai (Kach): *aim(s):* expel Arabs from Israel's biblical lands and, ultimately, restore the biblical state of Israel

area(s) of operation: present in West Bank Jewish settlements,

especially the Qiryat Arba' settlement in Hebron, where operatives have previously conducted bombings and shootings against Muslim and Christian Palestinians; considered to be operationally inactive in recent years

Palestinian Islamic Jihad (PIJ): *aim(s)*: create an Islamic state in all of historic Palestine as defined by the British Mandate, which includes the West Bank

area(s) of operation: maintains a limited operational presence

Palestine Liberation Front (PLF): *aim(s)*: enhance its networks in the West Bank and, ultimately, destroy the state of Israel and establish a secular, Marxist Palestinian state with Jerusalem as its capital

area(s) of operation: maintains a recruitment and limited training presence in some of the West Bank's refugee camps

Popular Front for the Liberation of Palestine (PFLP): *aim(s)*: bolster its recruitment networks in the West Bank

area(s) of operation: maintains a recruitment presence targeting youths

TRANSNATIONAL ISSUES

Disputes—international: the current status of the West Bank is subject to the Israeli-Palestinian Interim Agreement—permanent status to be determined through further negotiation; Israel continues construction of a “seam line” separation barrier along parts of the Green Line and within the West Bank; Israel withdrew from Gaza and four settlements in the northern West Bank in August 2005; since 1948, about 350 peacekeepers from the UN Truce Supervision Organization (UNTSO), headquartered in Jerusalem, monitor ceasefires, supervise armistice agreements, prevent isolated incidents from escalating, and assist other UN personnel in the region

Refugees and internally displaced persons: refugees (country of origin): 809,738 (Palestinian refugees) (2017)

IDPs: 193,000 (includes persons displaced within the Gaza strip due to the intensification of the Israeli-Palestinian conflict since June 2014 and other Palestinian IDPs in the Gaza Strip and West Bank who fled as long ago as 1967, although confirmed cumulative data do not go back beyond 2006) (2016)

WESTERN SAHARA

INTRODUCTION

Background: Western Sahara is a disputed territory on the northwest coast of Africa bordered by Morocco, Mauritania, and Algeria. After Spain withdrew from its former colony of Spanish Sahara in 1976, Morocco annexed the northern two-thirds of Western Sahara and claimed the rest of the territory in 1979, following Mauritania's withdrawal. A guerrilla war with the Polisario Front contesting Morocco's sovereignty ended in a 1991 cease-fire and the establishment of a UN peacekeeping operation. As part of this effort, the UN sought to offer a choice to the peoples of Western Sahara between independence (favored by the Polisario Front) or integration into Morocco. A proposed referendum never took place due to lack of agreement on voter eligibility. The 2,700 km- (1,700 mi-) long defensive sand berm, built by the Moroccans from 1980 to 1987 and running the length of the territory, continues to separate the opposing forces with Morocco controlling the roughly 80 percent of the territory west of the berm. Local demonstrations criticizing the Moroccan authorities occur regularly,

and there are periodic ethnic tensions between the native Sahrawi population and Moroccan immigrants. Morocco maintains a heavy security presence in the territory.

Demographic profile: Western Sahara is a disputed territory; 85% is under Moroccan control. It was inhabited almost entirely by Sahrawi pastoral nomads until the mid-20th century. Their traditional vast migratory ranges, based on following unpredictable rainfall, did not coincide with colonial and later international borders. Since the 1930s, most Sahrawis have been compelled to adopt a sedentary lifestyle and to live in urban settings as a result of fighting, the presence of minefields, job opportunities in the phosphate industry, prolonged drought, the closure of Western Sahara's border with Mauritania from 1979-2002, and the construction of the defensive berm separating Moroccan- and Polisario-controlled (Sahrawi liberalization movement) areas. Morocco supported rapid urbanization to facilitate surveillance and security.

Today more than 80% of Western Sahara's population lives in urban areas; more than 40% live in the administrative center

Laayoune. Moroccan immigration has altered the composition and dramatically increased the size of Western Sahara's population. Morocco maintains a large military presence in Western Sahara and has encouraged its citizens to settle there, offering bonuses, pay raises, and food subsidies to civil servants and a tax exemption, in order to integrate Western Sahara into the Moroccan Kingdom and, Sahrawis contend, to marginalize the native population.

Western Saharan Sahrawis have been migrating to Europe, principally to former colonial ruler Spain, since the 1950s. Many who moved to refugee camps in Tindouf, Algeria, also have migrated to Spain and Italy, usually alternating between living in cities abroad with periods back at the camps. The Polisario claims that the population of the Tindouf camps is about 155,000, but this figure may include thousands of Arabs and Tuaregs from neighboring countries. Because international organizations have been unable to conduct an independent census in Tindouf, the UNHCR bases its aid on a figure of 90,000 refugees. Western Saharan coastal towns emerged as key migration transit points (for reaching Spain's Canary Islands) in the mid-1990s, when Spain's and Italy's tightening of visa restrictions and EU pressure on Morocco and other North African countries to control illegal migration pushed sub-Saharan African migrants to shift their routes to the south.

Country name: *conventional long form:* none

conventional short form: Western Sahara

former: Rio de Oro, Saguia el Hamra, Spanish Sahara

etymology: self-descriptive name specifying the territory's western location on the African continent's vast desert

Government type: legal status of territory and issue of sovereignty unresolved—territory contested by Morocco and Polisario Front (Popular Front for the Liberation of the Saguia el Hamra and Rio de Oro), which in February 1976 formally proclaimed a government-in-exile of the Sahrawi Arab Democratic Republic (SADR), near Tindouf, Algeria, was led by President Mohamed ABDELAZIZ until his death in May 2016; current President Brahim GHALI elected in July 2016; territory partitioned between Morocco and Mauritania in April 1976 when Spain withdrew, with Morocco acquiring northern two-thirds; Mauritania, under pressure from Polisario guerrillas, abandoned all claims to its portion in August 1979; Morocco moved to occupy that sector shortly thereafter and has since asserted administrative control; the Polisario's government-in-exile was seated as an Organization of African Unity (OAU) member in 1984—Morocco between 1980 and 1987 built a fortified sand berm delineating the roughly 80 percent of Western Sahara west of the barrier that currently is controlled by Morocco; guerrilla activities continued sporadically until a UN-monitored cease-fire was implemented on 6 September 1991 (Security Council Resolution 690) by the United Nations Mission for the Referendum in Western Sahara (MINURSO)

ECONOMY

Economy—overview: Western Sahara has a small market-based economy whose main industries are fishing, phosphate mining, and pastoral nomadism. The territory's arid desert climate makes sedentary agriculture difficult, and Western Sahara imports much of its food. The Moroccan Government administers Western Sahara's economy and is a key source of employment, infrastructure development, and social spending in the territory.

Western Sahara's unresolved legal status makes the exploitation of its natural resources a contentious issue between Morocco and the Polisario. Morocco and the EU in December 2013 finalized a four-year agreement allowing European vessels to fish off the coast of Morocco, including disputed waters off the coast of Western Sahara.

Oil has never been found in Western Sahara in commercially significant quantities, but Morocco and the Polisario have quarreled over who has the right to authorize and benefit from oil exploration in the territory. Western Sahara's main long-term economic challenge is the development of a more diverse set of industries capable of providing greater employment and income to the territory. However, following King MOHAMMED VI's November 2015 visit to Western Sahara, the Government of Morocco announced a series of investments aimed at spurring economic activity in the region, while the General Confederation of Moroccan Enterprises announced a \$609 million investment initiative in the region in March 2015.

TRANSNATIONAL ISSUES

Disputes—international: many neighboring states reject Moroccan administration of Western Sahara; several states have extended diplomatic relations to the “Sahrawi Arab Democratic Republic” represented by the Polisario Front in exile in Algeria, while others recognize Moroccan sovereignty over Western Sahara; approximately 90,000 Sahrawi refugees continue to be sheltered in camps in Tindouf, Algeria, which has hosted Sahrawi refugees since the 1980s

YEMEN

INTRODUCTION

Background: North Yemen became independent from the Ottoman Empire in 1918. The British, who had set up a protectorate area around the southern port of Aden in the 19th century, withdrew in 1967 from what became South Yemen. Three years later, the southern government adopted a Marxist orientation. The massive exodus of hundreds of thousands of Yemenis from the south to the north contributed to two decades of hostility between the states. The two countries were formally unified as the Republic of Yemen in 1990. A southern secessionist movement and brief civil war in 1994 was quickly subdued. In 2000, Saudi Arabia and Yemen agreed to delineate their border. Fighting in the northwest between the government and the Huthis, a Zaydi Shia Muslim minority,

continued intermittently from 2004 to 2010. The southern secessionist movement was revitalized in 2007.

Public rallies in Sana'a against then President SALIH—inspired by similar demonstrations in Tunisia and Egypt—slowly built momentum starting in late January 2011 fueled by complaints over high unemployment, poor economic conditions, and corruption. By the following month, some protests had resulted in violence, and the demonstrations had spread to other major cities. By March the opposition had hardened its demands and was unifying behind calls for SALIH's immediate ouster. In April 2011, the Gulf Cooperation Council (GCC), in an attempt to mediate the crisis in Yemen, proposed the GCC Initiative, an agreement in which the president would step down in exchange for immunity from prosecution. SALIH's refusal to sign an agreement led to further violence. The UN Security Council passed Resolution 2014 in October 2011 calling for an end to the violence and completing a power transfer deal. In November 2011, SALIH signed the GCC Initiative to step down and to transfer some of his powers to Vice President Abd Rabuh Mansur HADI. Following HADI's uncontested election victory in February 2012, SALIH formally transferred his powers. In accordance with the GCC initiative, Yemen launched a National Dialogue Conference (NDC) in March 2013 to discuss key constitutional, political, and social issues. HADI concluded the NDC in January 2014 and planned to begin implementing subsequent steps in the transition process, including constitutional drafting, a constitutional referendum, and national elections.

The Huthis, perceiving their grievances were not addressed in the NDC, joined forces with SALIH and expanded their influence in northwestern Yemen, culminating in a major offensive against military units and rival tribes and enabling their forces to overrun the capital, Sanaa, in September 2014. In January 2015, the Huthis surrounded the presidential palace, HADI's residence, and key government facilities, prompting HADI and the cabinet to submit their resignations. HADI fled to Aden in February 2015 and rescinded his resignation. He subsequently escaped to Oman and then moved to Saudi Arabia and asked the GCC to intervene militarily in Yemen to protect the legitimate government from the Huthis. In March, Saudi Arabia assembled a coalition of Arab militaries and began airstrikes against the Huthis and Huthi-affiliated forces. Ground fighting between Huthi-aligned forces and

resistance groups backed by the Saudi-led coalition continued through 2016. In 2016, the UN brokered a months-long cessation of hostilities that reduced airstrikes and fighting, and initiated peace talks in Kuwait. However, the talks ended without agreement. The Huthis and SALIH's political party announced a Supreme Political Council in August 2016 and a National Salvation Government, including a prime minister and several dozen cabinet members, in November 2016, to govern in Sanaa and further challenge the legitimacy of HADI's government. Further attempts at peace have failed while neither side has made decisive battlefield gains, perpetuating the conflict and deepening the divisions between northern and southern Yemen. Amid rising tensions between the Huthis and SALIH, sporadic clashes erupted in mid-2017, and Huthi forces killed SALIH in early December 2017.

lyrics/music: Abdullah Abdulwahab NOA'MAN/Ayyoab Tarish ABSI

note: adopted 1990; the music first served as the anthem for South Yemen before unification with North Yemen in 1990

ECONOMY

Economy—overview: Yemen is a low-income country that faces difficult long-term challenges to stabilizing and growing its economy, and the current conflict has only exacerbated those issues. The ongoing war has halted Yemen's exports, pressured the currency's exchange rate, accelerated inflation, severely limited food and fuel imports, and caused widespread damage to infrastructure. The conflict has also created a severe humanitarian crisis—the world's largest cholera outbreak currently at nearly 1 million cases, more than 7 million people at risk of famine, and more than 80% of the population in need of humanitarian assistance.

Prior to the start of the conflict in 2014, Yemen was highly dependent on declining oil and gas resources for revenue. Oil and gas earnings accounted for roughly 25% of GDP and 65% of government revenue. The Yemeni Government regularly faced annual budget shortfalls and tried to diversify the Yemeni economy through a reform program designed to bolster non-oil sectors of the economy and foreign investment. In July 2014, the government continued reform efforts by eliminating some fuel subsidies and in August 2014, the IMF approved a three-year, \$570 million Extended Credit Facility for Yemen.

However, the conflict that began in 2014 stalled these reform efforts and ongoing fighting continues to accelerate the country's economic decline. In September 2016, President HADI announced the move of the main branch of Central Bank of Yemen from Sanaa to Aden where his government could exert greater control over the central bank's dwindling resources. Regardless of which group controls the main branch, the central bank system is struggling to function. Yemen's Central Bank's foreign reserves, which stood at roughly \$5.2 billion prior to the conflict, have declined to negligible amounts. The Central Bank can no longer fully support imports of critical goods or the country's exchange rate. The country also is facing a growing liquidity crisis and rising inflation. The private sector is hemorrhaging, with almost all businesses making substantial layoffs. Access to food and other critical commodities such as medical equipment is limited across the country due to security issues on the ground. The Social Welfare Fund, a cash transfer program for Yemen's neediest, is no longer operational and has not made any disbursements since late 2014.

Yemen will require significant international assistance during and after the protracted conflict to stabilize its economy. Long-term challenges include a high population growth rate, high unemployment, declining water resources, and severe food scarcity.

Military service age and obligation: 18 is the legal minimum age for voluntary military service; no conscription; 2-year service obligation (2012)

Maritime threats: the International Maritime Bureau reports offshore waters in the Gulf of Aden are high risk for piracy; numerous vessels, including commercial shipping and pleasure craft, have

been attacked and hijacked both at anchor and while underway; crew, passengers, and cargo are held for ransom; the presence of several naval task forces in the Gulf of Aden and additional anti-piracy measures on the part of ship operators reduced the incidence of piracy in that body of water; one attack was reported in 2016 and one reported during the first half of 2017

Military—note:

TERRORISM

Terrorist groups—home based: *al-Qa'ida in the Arabian Peninsula (AQAP): aim(s):* overthrow the Yemen Government and, ultimately, establish a regional Islamic caliphate; eradicate Western influence and presence from Yemen and the rest of the Arabian Peninsula

area(s) of operation: a core al-Qa'ida affiliate that was headquartered in Al Mukalla, Hadramawt Governorate, until Yemeni forces and their allies drove AQAP from the city in April 2016; most active in southern, eastern, and central Yemen, especially in Abyan, Al Baydah, Hadramawt, Sabwah, and Ma'rib governorates; conducts ongoing attacks against Yemeni Government forces, officials, and facilities and Western embassies, diplomats, tourists, and Shia Muslims, oil facilities, and merchant ships, as well as Western and Saudi Arabian interests; assessed in 2015 to have up to 4,000 members

Terrorist groups—foreign based: *al-Qa'ida (AQ): aim(s):* overthrow the Yemen Government and, ultimately, establish a pan-Islamic caliphate under a strict Salafi Muslim interpretation of Sharia

area(s) of operation: operational throughout Yemen, in collaboration with its affiliate organization, al-Qa'ida in the Arabian Peninsula (AQAP)

Islamic State of Iraq and the Levant (ISIL): aim(s): replace the Yemen Government with an Islamic state and implement ISIL's strict interpretation of Sharia

area(s) of operation: operational primarily in 'Adan and the capital, Sanaa, where operatives conduct attacks against Shia Muslims and government facilities and personnel; claimed responsibility for the deadliest attack in to 'Adan, where a suicide bomber detonated a vehicle-borne improvised explosive device on 29 August 2016, killing approximately 70 new recruits standing in line to register to join the military; suicide bombers detonated explosives on 20

March 2015 inside two Shia Muslim mosques in Sanaa, killing at least 137 worshippers and injuring over 300, which marked the first attack ISIL had claimed in Yemen; actively recruits Sunni Muslim youths; ISIL refers to Yemen as its Wilayat Sanaa; ISIL-Yemen was placed in the US State Department's designated global terror category under Executive Order 13224 on 19 May 2016

TRANSNATIONAL ISSUES

Disputes—international: Saudi Arabia has reinforced its concrete-filled security barrier along sections of the fully demarcated border with Yemen to stem illegal cross-border activities

Refugees and internally displaced persons: refugees (country of origin): 5,877 (Ethiopia) (2016); 256,283 (Somalia) (2017)

IDPs: 2,014,026 (conflict in Sa'ada Governorate; clashes between al-Qa'ida in the Arabian Peninsula and government forces) (2017)

Trafficking in persons: current situation: Yemen is a source and, to a lesser extent, transit and destination country for men, women, and children subjected to forced labor and women and children subjected to sex trafficking; trafficking activities grew in Yemen in 2014, as the country's security situation deteriorated and poverty worsened; armed groups increased their recruitment of Yemeni children as combatants or checkpoint guards, and the Yemeni military and security forces continue to use child soldiers; some other Yemeni children, mostly boys, migrate to Yemeni cities or Saudi Arabia and, less frequently Oman, where they end up as beggars, drug smugglers, prostitutes, or forced laborers in domestic service or small shops; Yemeni children increasingly are also subjected to sex trafficking in country and in Saudi Arabia; tens of thousands of Yemeni migrant workers deported from Saudi Arabia and thousands of Syrian refugees are vulnerable to trafficking; additionally, Yemen is a destination and transit country for women and children from the Horn of Africa who are looking for work or receive fraudulent job offers in the Gulf states but are subjected to sexual exploitation or forced labor upon arrival; reports indicate that adults and children are still sold or inherited as slaves in Yemen

tier rating: Tier 3—Yemen does not fully comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so; weak government institutions,

corruption, economic problems, security threats, and poor law enforcement capabilities impeded the government's ability to combat human trafficking; not all forms of trafficking are criminalized, and officials continue to conflate trafficking and smuggling; the status of an anti-trafficking law drafted with assistance from an international organization remains unknown following the dissolution of the government in January 2015; the government did not report efforts to investigate, prosecute, or convict anyone of trafficking or slavery offenses, including complicit officials, despite reports of officials willfully ignoring trafficking crimes and using child soldiers in the government's armed forces; the government acknowledged the use of child soldiers and signed a UN action plan to end the practice in 2014 but made no efforts to release child soldiers from the military and provide them with rehabilitative services; authorities failed to identify victims and refer them to protective services; the status of a draft national anti-trafficking strategy remains unknown (2015)

ZAMBIA

INTRODUCTION

Background: The territory of Northern Rhodesia was administered by the former British South Africa Company from 1891 until it was taken over by the UK in 1923. During the 1920s and 1930s, advances in mining spurred development and immigration. The name was changed to Zambia upon independence in 1964. In the 1980s and 1990s, declining copper prices, economic mismanagement, and a prolonged drought hurt the economy. Elections in 1991 brought an end to one-party rule and propelled the Movement for Multiparty Democracy (MMD) to government. The subsequent vote in 1996, however, saw increasing harassment of opposition parties and abuse of state media and other resources. The election in 2001 was marked by administrative problems, with

three parties filing a legal petition challenging the election of ruling party candidate Levy MWANAWASA. MWANAWASA was reelected in 2006 in an election that was deemed free and fair. Upon his death in August 2008, he was succeeded by his vice president, Rupiah BANDA, who won a special presidential byelection later that year. The MMD and BANDA lost to the Patriotic Front (PF) and Michael SATA in the 2011 general elections. SATA, however, presided over a period of haphazard economic management and attempted to silence opposition to PF policies. SATA died in October 2014 and was succeeded by his vice president, Guy SCOTT, who served as interim president until January 2015, when Edgar LUNGU won the presidential byelection and completed SATA's term. LUNGU then won a full term in August 2016 presidential elections.

Demographic profile: Zambia's poor, youthful population consists primarily of Bantu-speaking people representing nearly 70 different ethnicities. Zambia's high fertility rate continues to drive rapid population growth, averaging almost 3 percent annually between 2000 and 2010. The country's total fertility rate has fallen by less than 1.5 children per woman during the last 30 years and still averages among the world's highest, almost 6 children per woman, largely because of the country's lack of access to family planning services, education for girls, and employment for women. Zambia also exhibits wide fertility disparities based on rural or urban location, education, and income. Poor, uneducated women from rural areas are more likely to marry young, to give birth early, and to have more children, viewing children as a sign of prestige and recognizing that not all of their children will live to adulthood. HIV/AIDS is prevalent in Zambia and contributes to its low life expectancy.

Zambian emigration is low compared to many other African countries and is comprised predominantly of the well-educated. The small amount of brain drain, however, has a major impact in Zambia because of its limited human capital and lack of educational infrastructure for developing skilled professionals in key fields. For example, Zambia has few schools for training doctors, nurses, and other health care workers. Its spending on education is low compared to other sub-Saharan countries.

black the people of Zambia, and orange the country's mineral wealth; the eagle represents the people's ability to rise above the nation's problems

National symbol(s): African fish eagle; national colors: green, red, black, orange

National anthem: name: "Lumbanyeni Zambia" (Stand and Sing of Zambia, Proud and Free)

lyrics/music: multiple/Enoch Mankayi SONTONGA

note: adopted 1964; the melody, from the popular song "God Bless Africa," is the same as that of Tanzania but with different lyrics; the melody is also incorporated into South Africa's anthem

ECONOMY

Economy—overview: Zambia had one of the world's fastest growing economies for the ten years up to 2014, with real GDP growth averaging roughly 6.7% per annum, though growth slowed during the period 2015 to 2017, due to falling copper prices, reduced power generation, and depreciation of the kwacha. Zambia's lack of economic diversification and dependency on copper as its sole major export makes it vulnerable to fluctuations in the world commodities market and prices turned downward in 2015 due to declining demand from China; Zambia was overtaken by the Democratic Republic of Congo as Africa's largest copper producer.

Despite recent strong economic growth and its status as a lower middle-income country, widespread and extreme rural poverty and high unemployment levels remain significant problems, made worse by a high birth rate, a relatively high HIV/AIDS burden, and by market-distorting agricultural and energy policies. Zambia has raised \$7 billion from international investors by issuing separate sovereign bonds in 2012, 2014, and 2015, significantly increasing the country's public debt burden to 56% of GDP; the government plan refinanced \$2.8 billion worth of Eurobonds in 2017 to cut debt servicing costs.

Poor management of water resources has also contributed to a power generation shortage, which has hampered industrial productivity and contributed to an increase in year-on-year inflation to more than 20% in 2016. Zambia's currency, the kwacha, also depreciated sharply against the dollar through 2016, leading the

central bank to restrict lending. Rampant spending in recent years has increased the fiscal deficit to over 8% in 2017 and may encourage the government to seek external financing from the IMF to fund the shortfall.

ZIMBABWE

INTRODUCTION

Background: The UK annexed Southern Rhodesia from the former British South Africa Company in 1923. A 1961 constitution was formulated that favored whites in power. In 1965 the government unilaterally declared its independence, but the UK did not recognize the act and demanded more complete voting rights for the black African majority in the country (then called Rhodesia). UN sanctions and a guerrilla uprising finally led to free elections in 1979 and independence (as Zimbabwe) in 1980. Robert MUGABE, the nation's first prime minister, has been the country's only ruler (as president since 1987) and has dominated the country's political system since independence. His chaotic land redistribution campaign, which began in 1997 and intensified after 2000, caused an exodus of white farmers, crippled the economy, and ushered in widespread shortages of basic commodities. Ignoring international condemnation, MUGABE rigged the 2002 presidential election to ensure his reelection.

In 2005, the capital city of Harare embarked on Operation Restore Order, ostensibly an urban rationalization program, which resulted in the destruction of the homes or businesses of 700,000

mostly poor supporters of the opposition. MUGABE in 2007 instituted price controls on all basic commodities causing panic buying and leaving store shelves empty for months. General elections held in March 2008 contained irregularities but still amounted to a censure of the ZANU-PF-led government with the opposition winning a majority of seats in parliament. Movement for Democratic Change—Tsvangirai opposition leader Morgan TSVANGIRAI won the most votes in the presidential poll, but not enough to win outright. In the lead up to a run-off election in June 2008, considerable violence against opposition party members led to the withdrawal of TSVANGIRAI from the ballot. Extensive evidence of violence and intimidation resulted in international condemnation of the process. Difficult negotiations over a power-sharing “government of national unity,” in which MUGABE remained president and TSVANGIRAI became prime minister, were finally settled in February 2009, although the leaders failed to agree upon many key outstanding governmental issues. MUGABE was reelected president in 2013 in balloting that was severely flawed and internationally condemned. As a prerequisite to holding the election, Zimbabwe enacted a new constitution by referendum, although many provisions in the new constitution have yet to be codified in law. In November 2017, Vice President Emmerson MNANGAGWA took over following a military intervention that forced MUGABE to resign. MNANGAGWA was inaugurated president days later, promising to hold presidential elections in 2018.

Nationality: *noun:* Zimbabwean(s)

adjective: Zimbabwean

Ethnic groups: African 99.4% (predominantly Shona; Ndebele is the second largest ethnic group), other 0.4%, unspecified 0.2% (2012 est.)

Languages: Shona (official; most widely spoken), Ndebele (official, second most widely spoken), English (official; traditionally used for official business), 13 minority languages (official; includes Chewa, Chibarwe, Kalanga, Koisan, Nambya, Ndau, Shangani, sign language, Sotho, Tonga, Tswana, Venda, and Xhosa)

Religions: Protestant 74.8% (includes Apostolic 37.5%, Pentecostal 21.8%, other 15.5%), Roman Catholic 7.3%, other Christian 5.3%, traditional 1.5%, Muslim 0.5%, other 0.1%, none 10.5% (2015 est.)

Demographic profile: Zimbabwe's progress in reproductive, maternal, and child health has stagnated in recent years. According to a 2010 Demographic and Health Survey, contraceptive use, the number of births attended by skilled practitioners, and child mortality have either stalled or somewhat deteriorated since the mid-2000s. Zimbabwe's total fertility rate has remained fairly stable at about 4 children per woman for the last two decades, although an uptick in the urban birth rate in recent years has caused a slight rise in the country's overall fertility rate. Zimbabwe's HIV prevalence rate dropped from approximately 29% to 15% since 1997 but remains among the world's highest and continues to

suppress the country's life expectancy rate. The proliferation of HIV/AIDS information and prevention programs and personal experience with those suffering or dying from the disease have helped to change sexual behavior and reduce the epidemic.

Historically, the vast majority of Zimbabwe's migration has been internal—a rural-urban flow. In terms of international migration, over the last 40 years Zimbabwe has gradually shifted from being a destination country to one of emigration and, to a lesser degree, one of transit (for East African illegal migrants traveling to South Africa). As a British colony, Zimbabwe attracted significant numbers of permanent immigrants from the UK and other European countries, as well as temporary economic migrants from Malawi, Mozambique, and Zambia. Although Zimbabweans have migrated to South Africa since the beginning of the 20th century to work as miners, the first major exodus from the country occurred in the years before and after independence in 1980. The outward migration was politically and racially influenced; a large share of the white population of European origin chose to leave rather than live under a new black-majority government.

In the 1990s and 2000s, economic mismanagement and hyperinflation sparked a second, more diverse wave of emigration. This massive out migration—primarily to other southern African countries, the UK, and the US—has created a variety of challenges, including brain drain, illegal migration, and human smuggling and trafficking. Several factors have pushed highly skilled workers to go abroad, including unemployment, lower wages, a lack of resources, and few opportunities for career growth.

ECONOMY

Economy—overview: Zimbabwe’s economy depends heavily on its mining and agriculture sectors. Following a decade of contraction from 1998 to 2008, the economy recorded real growth of more than 10% per year in the period 2010-13, before falling below 3% in the period 2014-17, due to poor harvests, low diamond revenues, and decreased investment. Lower mineral prices, infrastructure and regulatory deficiencies, a poor investment climate, a large public and external debt burden, and extremely high government wage expenses impede the country’s economic performance.

Until early 2009, the Reserve Bank of Zimbabwe (RBZ) routinely printed money to fund the budget deficit, causing hyperinflation. Adoption of a multi-currency basket in early 2009—which allowed currencies such as the Botswana pula, the South Africa rand, and the US dollar to be used locally—reduced inflation below 10% per year. In January 2015, as part of the government’s effort to boost trade and attract foreign investment, the RBZ announced that the Chinese renminbi, Indian rupee, Australian dollar, and Japanese yen would be accepted as legal tender in Zimbabwe, though transactions were predominantly carried out in US dollars and

South African rand until 2016, when the rand's devaluation and instability led to near-exclusive use of the US dollar. The government in November 2016 began releasing bond notes, a parallel currency legal only in Zimbabwe which the government claims will have a one-to-one exchange ratio with the US dollar, to ease cash shortages. Bond notes began trading at a discount of up to 10% in the black market by the end of 2016.

Zimbabwe's government entered a second Staff Monitored Program with the IMF in 2014 and undertook other measures to reengage with international financial institutions. Zimbabwe repaid roughly \$108 million in arrears to the IMF in October 2016, but financial observers note that Zimbabwe is unlikely to gain new financing because the government has not disclosed how it plans to repay more than \$1.7 billion in arrears to the World Bank and African Development Bank. International financial institutions want Zimbabwe to implement significant fiscal and structural reforms before granting new loans. Foreign and domestic investment continues to be hindered by the lack of land tenure and titling, the inability to repatriate dividends to investors overseas, and the lack of clarity regarding the government's Indigenization and Economic Empowerment Act.

Military service age and obligation: 18-24 years of age for voluntary military service; no conscription; women are eligible to serve (2012)

TRANSNATIONAL ISSUES

Disputes—international: Namibia has supported, and in 2004 Zimbabwe dropped objections to, plans between Botswana and Zambia to build a bridge over the Zambezi River, thereby de facto recognizing a short, but not clearly delimited, Botswana-Zambia boundary in the river; South Africa has placed military units to assist police operations along the border of Lesotho, Zimbabwe, and Mozambique to control smuggling, poaching, and illegal migration

Refugees and internally displaced persons: refugees (country of origin): 5,925 (Democratic Republic of Congo) (2016)

IDPs: undetermined (political violence, violence in association with the 2008 election, human rights violations, land reform, and economic collapse) (2015)

stateless persons: 300,000 (2016)

Trafficking in persons: current situation: Zimbabwe is a source, transit, and destination country for men, women, and children subjected to forced labor and sex trafficking; Zimbabwean women and girls from towns bordering South Africa, Mozambique, and Zambia are subjected to forced labor, including domestic servitude, and prostitution catering to long-distance truck drivers; Zimbabwean men, women, and children experience forced labor in agriculture and domestic servitude in rural areas; family members may recruit children and other relatives from rural areas with promises of work or education in cities and towns where they end up in domestic servitude and sex trafficking; Zimbabwean women and men are lured into exploitative labor situations in South Africa and other neighboring countries

tier rating: Tier 3—Zimbabwe does not fully comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so; the government passed an anti-trafficking law in 2014 defining trafficking in persons as a crime of transportation and failing to capture the key element of the international definition of human trafficking—the purpose of exploitation—which prevents the law from being comprehensive or consistent with the 2000 UN TIP Protocol that Zimbabwe acceded to in 2013; the government did not report on anti-trafficking law enforcement efforts during 2014, and corruption in law enforcement and the judiciary remain a concern; authorities made minimal efforts to identify and protect trafficking victims, relying

on NGOs to identify and assist victims; Zimbabwe's 2014 anti-trafficking law required the opening of 10 centers for trafficking victims, but none were established during the year; five existing shelters for vulnerable children and orphans may have accommodated child victims; in January 2015, an inter-ministerial anti-trafficking committee was established, but it is unclear if the committee ever met or initiated any activities (2015)

APPENDIX D

CROSS-REFERENCE LIST OF COUNTRY DATA CODES

GEOPOLITICAL ENTITIES and CODES (formerly FIPS PUB 10-4):

FIPS PUB 10-4 was withdrawn by the National Institute of Standards and Technology on September 2, 2008 based on Public Law 104-113 (codified OMB Circular A-119 and the National Technology Transfer and Advancement Act of 1995). The National Geospatial-Intelligence Agency (NGA), as the maintenance authority for FIPS PUB 10-4, has continued to maintain and provide regular updates to its content in a document known as Geopolitical Entities and Codes (GEC) (Formerly FIPS 1PUB 10-4).

ISO 3166: Codes for the Representation of Names of Countries (ISO 3166) is prepared by the International Organization for Standardization. ISO 3166 includes two- and three-character alphabetic codes and three-digit numeric codes that may be needed for activities involving exchange of data with international organizations that have adopted that standard. Except for the numeric codes, ISO 3166 codes have been adopted in the US as FIPS 104-1: American National Standard Codes for the Representation of Names of Countries, Dependencies, and Areas of Special Sovereignty for Information Interchange.

STANAG 1059: Letter Codes for Geographical Entities (8th edition, 2004) is a Standardization Agreement (STANAG) established and maintained by the North Atlantic Treaty Organization (NATO/OTAN) for the purpose of providing a common set of geo-spatial identifiers for countries, territories, and possessions. The 8th edition established trigraph codes for each country based upon the ISO 3166-1 alpha-3 character sets. These codes are used throughout NATO.

Internet: The Internet country code is the two-letter digraph maintained by the International Organization for Standardization (ISO) in the ISO 3166 Alpha-2 list and used by the Internet Assigned Numbers Authority (IANA) to establish country-coded top-

level domains (ccTLDs).

CROSS-REFERENCE LIST OF HYDROGRAPHIC DATA CODES

IHO 23-4th: *Limits of Oceans and Seas*, Special Publication 23, Draft 4th Edition 1986, published by the International Hydrographic Bureau of the International Hydrographic Organization.

IHO 23-3rd: *Limits of Oceans and Seas*, Special Publication 23, 3rd Edition 1953, published by the International Hydrographic Organization.

ACIC M 49-1: *Chart of Limits of Seas and Oceans*, revised January 1958, published by the Aeronautical Chart and Information Center (ACIC), United States Air Force.

DIAM 65-18: *Geopolitical Data Elements and Related Features*, Data Standard No. 4, Defense Intelligence Agency Manual 65-18, December 1994, published by the Defense Intelligence Agency. The US Government has not yet adopted a standard for hydrographic codes similar to the Federal Information Processing Standards (FIPS) 10-4 country codes. The names and limits of the following oceans and seas are not always directly comparable because of differences in the customers, needs, and requirements of the individual organizations. Even the number of principal water bodies varies from organization to organization. *Factbook* users, for example, find the Atlantic Ocean and Pacific Ocean entries useful, but none of the following standards include those oceans in their entirety. Nor is there any provision for combining codes or overcodes to aggregate water bodies. The recently delimited Southern Ocean is not included.

APPENDIX G

WEIGHTS AND MEASURES

Note: At this time, only three countries—Burma, Liberia, and the US—have not adopted the International System of Units (SI, or metric system) as their official system of weights and measures. Although use of the metric system has been sanctioned by law in the US since 1866, it has been slow in displacing the American adaptation of the British Imperial System known as the US Customary System. The US is the only industrialized nation that does not mainly use the metric system in its commercial and standards activities, but there is increasing acceptance in science, medicine, government, and many sectors of industry.
